The Politics of the Italian Army 1861-1918 John Whittam, 2024-11-01 First published in 1977 The Politics of the Italian Army provides a comprehensive overview of the role played by the army in Italian history and politics from 1861 1918 Divided into three major parts the book attempts to do three things to observe some of the familiar sights of nineteenth and early twentieth century Italian history from a slightly different viewpoint to enquire into why one of the least militaristic of societies has been plunged periodically into aggressive wars by the deliberate action of its governments and finally to provide an account of civil military relations in Italy for use in comparative studies The author discusses themes such as the First War of Independence Fanti and the creation of the Italian army the consolidation of the army the army and the crisis of the late 1890s the Libyan war and non intervention This is an important historical reference work for students and scholars of Italian history military history and political history of Europe

Military Interventions in Civil Wars Kamil C. Klosek, 2021-09-27 This book examines the motivations of military interventions in civil wars with a focus on the role of foreign direct investment FDI and the arms trade The book assumes a state centric view of international relations whereby states remain the dominant actors on the world stage It breaks away from the conventional wisdom that military interventions for economic interests are a product of domestic corporate lobbying and instead argues that states intervene to protect but not advance existing corporate investments for national strategic interests The work introduces new concepts of military interventions proxy interventions and indirect interventions which are determined by arms trade relationships between the permanent members of the United Nations Security Council UNSC and recipient countries and utilizes insights from principal agent theory whereby the permanent members of the UNSC delegate military interventions in civil wars to other countries The book concludes by examining the transformative effect of FDI on the willingness of a state to intervene militarily in a civil war focusing on the case of China in Sub Saharan Africa Provided that the current positive trends in FDI and arms trade persist we are likely to see more and not fewer military interventions in the future This book will be of much interest to students of civil wars military interventions security studies and International Relations

Bullets Not Ballots Jacqueline L. Hazelton, 2021-05-15 In *Bullets Not Ballots* Jacqueline L Hazelton challenges the claim that winning hearts and minds is critical to successful counterinsurgency campaigns Good governance this conventional

wisdom holds gains the besieged government popular support denies support to the insurgency and makes military victory possible Hazelton argues that major counterinsurgent successes since World War II have resulted not through democratic reforms but rather through the use of military force against civilians and the co optation of rival elites Hazelton offers new analyses of five historical cases frequently held up as examples of the effectiveness of good governance in ending rebellions the Malayan Emergency the Greek Civil War the Huk Rebellion in the Philippines the Dhofar rebellion in Oman and the Salvadoran Civil War to show that although unpalatable it was really brutal repression and bribery that brought each conflict to an end By showing how compellence works in intrastate conflicts Bullets Not Ballots makes clear that whether or not the international community decides these human moral and material costs are acceptable responsible policymaking requires recognizing the actual components of counterinsurgent success and the limited influence that external powers have over the tactics of counterinsurgent elites
