Fortune Or Failure Missed Opportunities And Chance Discoveries:

Fortune Or Failure Alexander Kohn,1989-01 Looks at the role of chance in scientific discovery and discusses the philosophy of scientific research Scientific Discovery Aharon Kantorovich,1993-07-01 Kantorovich analyzes the notion of discovery He views the process as inference and questions whether there is logic or method to discovery He provides an alternative perspective on scientific discovery that explains the difficulties in finding a satisfactory method of discovery Within the framework of evolutionary epistemology discovery is treated as a phenomenon in its own right having psychological and social dimensions Science is viewed as a continuation of the evolutionary process whereby creative discovery plays a role similar to blind mutation in biological evolution From this perspective serendipity and tinkering are key notions in understanding the creative process **Precision Process Technology** M.P.C. Weijnen,A.A.H. Drinkenburg,2012-12-06 New process technology strategies are required to cope with the future Fossil feedstocks are losing ground in favour of renewable feedstocks and secondary resources Conventional processing routes using thermal sledgehammer techniques are replaced by highly selective bio catalytic conversions The future process engineer is neither allowed to think in terms of unit operations nor to take for granted the conventional practice of continuous steady state processing Hybrid systems and transient operations are more and more frequently encountered The continuing impressive progress being made in process modelling and control will revolutionize the process industries In the new generation of chemical production processes the keyword is precision Precision in terms of selectivity and of efficiency is required to maximize the utilisation of materials and energy Moreover enhanced precision is needed to exploit the quality of materials and energy to the full extent Only by reducing the squandering of materials energy and quality will a harmonious relationship be established between the process industries the economy and the environment Process integration as well as an integrated effort by the disciplines involved in process technology will be of crucial importance in attaining the goals of precision process technology These emerging strategies involve an active exchange of tools and ideas between a variety of disciplines not only in plant design and operation but even more in the early stages of process development and design By looking from various angles at what the future has in store for the process industries this volume systematically lifts the corners of the veil and may inspire to establish a new tradition of precision in process technology Happy Accidents Morton A. Meyers,2011-09 A fascinating and highly accessible look at the surprising role serendipity has played in some of the most important medical discoveries in the twentieth Chances for Peace Elie Podeh,2015-11-15 Drawing on a newly developed theoretical definition of missed opportunity Chances for Peace uses extensive sources in English Hebrew and Arabic to systematically measure the potentiality levels of opportunity across some ninety years of attempted negotiations in the Arab Israeli conflict With enlightening revelations that defy conventional wisdom this study provides a balanced account of the most significant attempts to forge peace initiated by the world s superpowers the Arabs including the Palestinians and Israel

From Arab Zionist negotiations at the end of World War I to the subsequent partition the aftermath of the 1967 War and the Sadat Initiative and numerous agreements throughout the 1980s and 1990s concluding with the Annapolis Conference in 2007 and the Abu Mazen Olmert talks in 2008 pioneering scholar Elie Podeh uses empirical criteria and diverse secondary sources to assess the protagonists roles at more than two dozen key junctures A resource that brings together historiography political science and the practice of peace negotiation Podeh s insightful exploration also showcases opportunities that were not missed Three agreements in particular Israeli Egyptian 1979 Israeli Lebanese 1983 and Israeli Jordanian 1994 illuminate important variables for forging new paths to successful negotiation By applying his framework to a broad range of power brokers and time periods Podeh also sheds light on numerous incidents that contradict official narratives This unique approach is poised to reshape the realm of conflict resolution

Re-visioning Science Education from Feminist Perspectives ,2010-01-01

Women in science education are placed in a juxtaposition of gender roles and gendered career roles Using auto biography and auto ethnography this book examines the challenges and choices of academic women in science education and how those challenges have changed or remained consistent since women have become a presence in science education The book s contributors span a temporal and spatial continuum and focus on how a variety of issues relate to the paradoxes for academic women in science education Science is characterized as a masculine endeavor while teaching is described as women s true profession Thus female academics involved in science education are positioned in two paradoxes First as teachers they are involved in a feminized profession However within that profession women faculty in science education work in a discipline viewed as a masculine enterprise Further these women work in educational institutions that have higher status and prestige than their sisters in elementary middle or high schools Second female professors are bearded mothers Women who have engaged in science education value rationality and logic and assume authority as participants in academe The use of logic the acceptance of authority and the assumption of power are masculine gender stereotyped characteristics This situation places women in a paradox because others including peers and students expect them to display stereotypic female gender dispositions such as mothering nurturing sacrificing their needs for others and a commitment to the institution The topics include discussing how their engagement with science impacted their career trajectories and re direction from science to science education the relationships of cultural and racial factors on career trajectories and the dialectical relationship between women s private public lives and their agency collective and individual in the academy and its enactment within academic fields The book documents the lives and careers of academic women in science education from the United States Australia the Caribbean United Kingdom and Europe

Novel Strategies in the Design and Production of Vaccines Sara Cohen,Avigdor Shafferman,2013-06-29 Vaccination is one of the most efficient and cost effective methods of promoting human health and has been in clinical use for at least 200 years Nevertheless infectious diseases continue to constitute a constant threat to the well being of humanity Common pathogens once believed to be under control

acquire increased virulence and resistance to drugs while exotic microorganisms emerged from hidden reservoirs to cause yet incurable diseases in humans These changes together with epidemic outbreaks related to political and socio economic instabilities increase the needs for the development of new advanced vaccines In this volume devoted to the proceedings of the 39th OHOLO Conference we present some of the recent strategies for the design and production of novel vaccines The advent of recombinant DNA technology has stimulated the production of several subunit vaccines In spite of the obvious advantages to this approach the limited immunogenicity of many subunit candidates has hindered their development Strategies to enhance the immunogenicity of subunit vaccines is therefore critical Several approaches toward this goal including design of novel adjuvants and delivery systems as well as design of advantageous carriers are presented here Among the carriers evaluated here are polypeptides flagellin HBV core antigen J3 galactosidase attenuated virions Vaccinia Sindbis and nonpathogenic licensed bacteria Salmonella

New Trends in Fluorescence Spectroscopy Bernard Valeur, Jean-Claude Brochon, 2012-12-06 Fluorescence is more and more widely used as a tool of investigation analysis control and diagnosis in many fields relevant to physical chemical biological and medical sciences New technologies continuously emerge thanks to the progress in the design of light sources e.g. laser diodes detectors 3D 4D and compact ultrafast electronic devices In particular much progress has been made in time resolved fluorescence microscopy FRET Fluorescence Lifetime Imaging Microscopy FCS Fluorescence Correlation Spectroscopy Furthermore the sensitivity now allows one to detect a single molecule in the restricted field of a confocal microscope which actually offers the possibility to study phenomena at a molecular level The development of new fluorescent probes is still a necessity In particular the growing use of lasers implies high resistance to photo degradation Fluorescence emission at long wavelengths is also a distinct advantage Furthermore in vivo inclusion of new fluorescent aromatic residues in proteins offer new potentialities in biology of ions and molecules is Fluorescence based selective detection still the object of special attention Considerable effort is being made in the design of supramolecular systems in which the recognition event is converted into a fluorescence signal easily detected New fluorescent sensors for clinical diagnosis and detection of pollutants in atmosphere and water are extensively developed All these developments justify the regular publication of books giving the state of the art of the methods and applications of fluorescence spectroscopy

The Travels and Adventures of Serendipity Robert K. Merton, Elinor Barber, 2011-11-28 From the names of cruise lines and bookstores to an Australian ranch and a nudist camp outside of Atlanta the word serendipity that happy blend of wisdom and luck by which something is discovered not quite by accident is today ubiquitous This book traces the word's eventful history from its 1754 coinage into the twentieth century chronicling along the way much of what we now call the natural and social sciences The book charts where the term went with whom it resided and how it fared We cross oceans and academic specialties and meet those people both famous and now obscure who have used and abused serendipity We encounter a linguistic sage walk down the illustrious halls of the Harvard Medical School attend the

serendipitous birth of penicillin and meet someone who manages serendipity for the U S Navy The story of serendipity is fascinating that of The Travels and Adventures of Serendipity equally so Written in the 1950s by already eminent sociologist Robert Merton and Elinor Barber the book though occasionally and most tantalizingly cited was intentionally never published This is all the more curious because it so remarkably anticipated subsequent battles over research and funding many of which centered on the role of serendipity in science Finally shortly after his ninety first birthday following Barber s death and preceding his own by but a little Merton agreed to expand and publish this major work Beautifully written the book is permeated by the prodigious intellectual curiosity and generosity that characterized Merton s influential On the Shoulders of Giants Absolutely entertaining as the history of a word the book is also tremendously important to all who value the miracle of intellectual discovery It represents Merton s lifelong protest against that rhetoric of science that defines discovery as anything other than a messy blend of inspiration perspiration error and happy chance anything other than serendipity
