Fossil Detective:

The Fossil Detectives Douglas Palmer, Hermione Cockburn, 2012-08-30 Fossils provide us with a tantalizing glimpse of Britain's prehistoric past and hold the key to unlocking the secrets of life's history and evolution. Since the appearance of primitive organisms in Britain more than a billion years ago, oceans, deserts, swamps, and vast mountains have come and gone in our corner of western Europe; forests of long extinct trees, flowers, and grasses have covered the land, and dinosaurs and other strange creatures have roamed across it. How do we know? The evidence is all around us in the rocks and fossils that lie beneath the landscape. In this highly informative and practical book, which accompanies the BBC series, presenter Hermione Cockburn and renowned palaeontologist Douglas Palmer take an in-depth look at the most exciting fossil stories from around the country. When and why were dinosaur fossils first discovered in Britain? How was the biggest fish ever to have swum in the sea unearthed near Peterborough? What do modern medical techniques have to offer fossil hunters? Packed with colour photographs and illustrations, *Fossils Detectives* is full of surprising facts and features. And for those who want to try their hand at some fossil detecting of their own, the book includes an extensive regional gazetteer of fossil hunting sites and places to visit and guidance on identifying your fossil finds.
