Found Generation Chinese Communists In Europe During The Twenties:

The Found Generation Marilyn A. Levine, 2016-06-01 In contrast to the Lost Generation of youth in the West who were disoriented and disillusioned by the First World War and its aftermath the Chinese youth born between 1895 and 1905 not only believed they had a duty to save their nation but pursued their goal through social and political experimentation The vigorous purpose and optimism of this Found Generation contrasted with the apathy and detachment of their Western counterparts who followed a different path in coming to terms with the new world of the twentieth century Just after the First World War sixteen hundred Chinese young men and women traveled to Europe most of them to France as members of the Work Study Movement Their goal was to study Western technology and culture and utilize this knowledge to achieve national salvation and they planned to finance their study at European schools by factory work While in Europe many of these students became politicized partly through their exposure to European political ideas such as Marxism and partly through the social network based on shared experience that transcended what would have separated them in China One important result of this political activity was the formation of the European Branches of the Chinese Communist Organizations ECCO The Found Generation explores the origins development and significance of the ECCO highlights the differences between it and the Communist home organization and describes its impact on the Chinese Communist Party The founders of the ECCO shared values and goals with their compatriots in China but their experiences and opportunities in Europe molded them in different ways that can be traced in their later careers On their return to China many of the young activists including Zhou Enlai Deng Xiaoping Chen Yi Cai Hesen Li Lisan Zhu De Nie Rongzhen and Wang Ruofei quickly assumed powerful positions in Chinese politics and their influence is still felt today Levine's examination of the early experiences of this important cohort of Chinese leaders helps explain their adherence to the Leninist concept of Party discipline and their tenacious hold over central governmental power The Found Generation is a pioneering study based on original sources including interviews with several prominent participants in the Work Study Movement and the ECCO Chinese studies and memoirs and Chinese and French periodicals It provides otherwise unavailable information and analysis about the political leadership of modern China and by pointing out the differences between the Chinese radicals in Europe and in China it furthers our understanding of the conflicts motivations and values of modern Chinese leaders

Chinese Grammarology

Yurou Zhong, 2019-11-12 Today Chinese characters are described as a national treasure the core of the nation's civilizational identity Yet for nearly half of the twentieth century reformers waged war on the Chinese script They declared it an archaic hindrance to modernization portraying the ancient system of writing as a roadblock to literacy and therefore science and democracy Movements spanning the political spectrum proposed abandonment of characters and alphabetization of Chinese writing although in the end the Communist Party opted for character simplification Chinese Grammatology traces the origins transmutations and containment of this script revolution to provide a groundbreaking account of its formative effects on Chinese literature and culture and lasting implications for the encounter between the alphabetic and nonalphabet worlds Yurou Zhong explores the growth of competing Romanization and Latinization movements aligned with the clashing Nationalists and Communists She finds surprising affinities between alphabetic reform and modern Chinese literary movements and examines the politics of literacy programs and mass education against the backdrop of war and revolution Zhong places the Chinese script revolution in the global context of a phonocentric dominance that privileges phonetic writing contending that the eventual retention of characters constituted an anti ethnocentric anti imperial critique that coincided with postwar decolonization movements and predated the emergence of Deconstructionism By revealing the consequences of one of the biggest linguistic experiments in history Chinese Grammatology provides an ambitious rethinking of the origins of Chinese literary modernity and the politics of the science of writing *Shifu, Soul of Chinese Anarchism* Edward S.

Krebs, 1998 The most comprehensive study of Shifu available this valuable work explores the life and political milieu of a central figure in Republican China Born in 1884 Shifu was brought down in 1915 by overwork poverty and tuberculosis Yet during that short span he became the most influential anarchist of his time Drawing on a wealth of primary source material Krebs provides an intellectual biography of this committed revolutionary and analyzes the importance of Shifu's thought during the New Culture May Fourth years as his followers fought for influence with the Marxists and later over the issue of alliance with the Nationalists Placing Shifu's life within the dynamic intellectual and political currents of the time the author describes Shifu's early work as an assassin within the anti Qing movement Examining the influence on Shifu of Confucianism and Buddhism Krebs highlights reform Buddhism's close relationship with revolutionary activism Most significantly Shifu's unflagging work to propagate anarchism during the early years of the Republic and his interactions with other socialists reveal a hitherto unknown level of activity among socialist revolutionaries This important book thus offers fresh insights not only into the anarchist movement itself but into the broader history of Chinese socialism as well **International Student**

Activism and the Politics of Higher Education CindyAnn Rose-Redwood, Reuben Rose-Redwood, 2024-03-19 From international tuition hikes and discriminatory immigration policies to racially motivated violence and geopolitical tensions international students encounter numerous political issues while studying abroad Yet it is often assumed that international students are politically passive and disengaged rather than actively contributing to the political life of higher education

institutions and the host country more generally The present book challenges this assumption by bringing together the work of scholars from various fields of study to examine international student activism advocacy and political engagement in higher education settings Drawing upon different research approaches this book showcases scholarship exploring the multifaceted ways in which international students engage with the political as well how the policy environments and socio political atmospheres in both host and home countries shape these experiences Far from being passive bystanders international students have exercised their political agency through diverse forms of collective action over the past century and this edited collection calls for a renewed focus on the political dimensions of the international student experience

Marxist Intellectuals and the Chinese Labor Movement Daniel Y. K. Kwan,1997 Deng Zhongxia the organizer and leader of the Guangzhou Hong Kong General Strike of 1925 26 was one of China s foremost labor activists Marxist Intellectuals and the Chinese Labor Movement is the first English language examination of Deng s career and thought It extends into a wider assessment of the relationship between the Chinese labor movement and the Chinese Communist revolution considering the conflicting interests of workers and Marxist intellectuals and the differences between local and national concerns

Knowledge, Power, and Networks Cécile Armand,Christian Henriot,Huei-min Sun,2022-09-12 In the past decades the world has watched the rise of China as an economic and military power and the emergence of Chinese transnational elites What may seem like an entirely new phenomenon marks the revival of a trend initiated at the end of the Qing The redistribution of power wealth and knowledge among the newly formed elites matured during the Republican period This volume demonstrates both the difficulty and the value of re thinking the elites in modern China It establishes that the study of the dynamic tensions within the elite and among elite groups in this epochal era is within reach if we are prepared to embrace forms of historical inquiry that integrate the abundant and even limitless historical resources and to engage with the rich repertoire of digital techniques instruments available and question our previous research paradigms This renewed approach brings historical research closer to an integrative data rich history of modern China **Mao** Alexander V.

Pantsov,Steven I. Levine,2013-10-29 Originally published in a different version in 2007 in Russian by Molodaia Gvardiia as Mao Tzedun Title page verso **Zhou Enlai** Michael Dillon,2020-01-23 Enigmatic Eminence grise the power behind the

throne these phrases sum up Zhou Enlai s long and varied but always pivotal political career in the Chinese Communist Party from the 1920s to 1970s Born in 1898 Zhou witnessed several of the most important events in China s modern history and was a close associate of both the nationalist leader Chiang Kai Shek and communist leader Mao Zedong whom he served under as China s first premier from 1949 until 1976 Zhou was also a major ally of Deng Xiaoping a source for example of major influence on his Four Modernizations in agriculture industry science and technology and the military He was thus the prime architect of China s drive towards superpower status and one of the key determinants of China s central role in the modern world Zhou does not conform readily to any of the stereotypes of communist leaders Chinese or otherwise Cultivated

and urbane he was a sympathetic and intellectual character who was well liked by non communists foreigners and his staff He was one of the most complex figures in the politics of contemporary China and certainly one of the most interesting although his influence was never all that obvious In this book Michael Dillon restores him to his rightful place in history and analyses the role of a man who was a genuine statesman rather than just a political operator *Global Perspectives on Recruiting International Students* Belal Shneikat, Cihan Cobanoglu, Cem Tanova, 2021-06-01 Although many countries have created effective strategies to recruit more international students due to proven economic and social benefits recruiting international students as a field of research lacks coherence Filling this gap this book provides a holistic and comprehensive overview of this emerging research area *Portraits of Women in International Law* Immi Tallgren, 2023 This fascinating volume offers a set of biographies of women and gender non conforming people who made a difference in international law but who in most cases were never well known or have been forgotten These portraits describe each individual s engagement with international law the context in which they worked and the barriers they faced *Occidentalism* Xiaomei Chen, 2002 This revised and expanded edition of the first comprehensive study of Occidentalism in post Mao China includes a new preface foreword and chapter on Chinese diaspora writings in the Chinese language Xiaomei Chen offers an insightful account of the unremittingly favorable depiction of Western culture and its negative characterization of Chinese culture in post Mao China since 1978 She examines the cultural and political interrelationship between the East and West from a vantage point more complex than that accommodated by most current theories of Western imperialism and colonialism Going beyond Edward Said s construction in Orientalism of cross cultural appropriations as a defining facet of Western imperialism Chen argues that the appropriation of Western discourse what she calls Occidentalism can actually have a politically and ideologically liberating effect on contemporary non Western culture She maintains that simplistic allegations of Orientalism frequently found in current critical discourses seriously underestimate the complexities of intercultural and multicultural relationships Using China as the focus of her analysis Chen examines a variety of cultural media from Shakespearean drama to modernist poetry to contemporary Chinese television and popular fiction She thus places sinology in the general context of Western theoretical discourses such as Eurocentrism postcolonialism nationalism modernism feminism and literary hermeneutics showing that it has a vital role to play in the study of Orient and Occident and their now unavoidable symbiotic relationship Occidentalism presents a new model of comparative literary and cultural studies that reenvisions cross cultural appropriation It will be indispensable to future discussions of Orientalism Occidentalism and postcolonialism as well as subaltern studies Asian studies comparative literature cultural studies and non Western drama **Heretics in Revolutionary China** Xuduo Zhao, 2023-05-08 In this book Xuduo Zhao revisits the early twentieth century Chinese revolution by focusing on two forgotten Cantonese socialists Chen Gongbo and Tan Pingshan By analyzing a host of previously untapped primary sources Zhao discovers a social democratic approach within the newly founded Chinese

Communist Party and argues that its decline marked a key moment in the Chinese communist movement The study of these two figures and the ebbs and flows of their lives reflects and reveals the fundamental tensions in the Chinese revolution which have shaped China's political trajectory to contemporary times and the broader political social and cultural landscapes of Republican China

The Human Tradition in Modern China Kenneth J. [The Rise of Political Intellectuals in Modern China](#) Shakhar Rahav, 2015-02-17 The May Fourth movement 1915 1923 is widely considered a watershed in the history of modern China This book is a social history of cultural and political radicals based in China's most important hinterland city at this pivotal time Wuhan Current narratives of May Fourth focus on the ideological development of intellectuals in the seaboard metropolises of Beijing and Shanghai And although scholars have pointed to the importance of the many cultural political societies of the period they have largely neglected to examine these associations seeing them only as seedbeds of Chinese communism and its leaders like Mao Zedong This book by contrast portrays the everyday life of May Fourth activists in Wuhan in cultural political societies founded by local teacher and journalist Yun Daiying 1895 1931 The book examines the ways by which radical politics developed in hinterland urban centers from there into a nation wide movement which ultimately provided the basis for the emergence of mass political parties namely the Nationalist Party Guomindang and the Chinese Communist Party CCP The book's focus on organizations everyday life and social networks provides a novel

interpretation of where mechanisms of historical change are located The book also highlights the importance of print culture in the provinces It demonstrates how provincial print culture combined with small local organizations to create a political movement The vantage point of Wuhan demonstrates that May Fourth radicalism developed in a dialogue between the coastal metropolises of Beijing and Shanghai and hinterland urban centers The book therefore charts the way in which seeds of political change grew from individuals through local organizations into a nation wide movement and finally into mass party politics and subsequently revolution The book thus connects everyday experiences of activists with the cultural political ferment which gave rise to both the Chinese Communist party and the Nationalist Party

Chinese Migrants and Internationalism Gregor Benton, 2007-05-23 The transnational and diasporic dimensions of early Chinese migrant politics opened in the late nineteenth century when Chinese radical groups bent on overthrowing the Qing dynasty 1644 1911 vied with one another to win Chinese overseas to their modernizing projects and immigrants who had suffered discrimination welcomed their proposals The radicals concentration on Chinese communities abroad as outposts of Chinese politics and culture strengthened the stereotype of Chinese as clannish unassimilable xenophobic and deeply introverted This book argues that such a view has its roots less in historical truth than in political and ideological prejudice and obscures a rich vein of internationalist practice in Chinese migrant or diasporic history which the study aims to restore to visibility In some cases internationalist alliances sprang from the spontaneous perception by Chinese and other non Chinese migrants or local workers of shared problems and common solutions in everyday life and work At other times they emerged from under the umbrella of transnationalism when Chinese nationalist and anti imperialist activists overseas received support for their campaigns from local internationalists or the alliances were the product of nurturing by Chinese or non Chinese political organizers including anarchists communists and members of internationalist cultural movements like Esperantism Based on sources in a dozen languages and telling hitherto largely unknown or forgotten stories of Chinese migrant experiences in Russia Germany Cuba Spain and Australia this study will appeal to students and scholars of Chinese history labour studies and ethnic migration studies alike

A Century of Student Movements in China Xiaobing Li, Qiang Fang, 2019-12-02 In this book the authors offer their unique perspectives on the important roles Chinese students and intellectuals played in the shaping of the twentieth century China Their answers to these pivotal questions explore new nationalistic spirit modern world views and willingness of self sacrifice which had attributed to the spontaneous actions of the students as a New Culture emerged during the May Fourth Movement These articles show how China nurtured these spontaneous student movements even though the Nationalist Party in the Republic of China and the Communist Party in the People's Republic had exerted tight control over schools Both governments established organizations as well as operations among students that effectively turned some of the student movements into a political instrument by the parties for their own agenda

Architecture and the Landscape of Modernity in China before 1949 Edward Denison, 2017-02-17 This book

explores China's encounter with architecture and modernity in the tumultuous epoch before Communism an encounter that was mediated not by a singular notion of modernism emanating from the west but that was uniquely multifarious deriving from a variety of sources both from the west and importantly from the east The heterogeneous origins of modernity in China are what make its experience distinctive and its architectural encounters exceptional These experiences are investigated through a re-evaluation of established knowledge of the subject within the wider landscape of modern art practices in China The study draws on original archival and photographic material from different artistic genres and architecturally concentrates on China's engagement with the west through the treaty ports and leased territories the emergence of architecture as a profession in China and Japan's omnipresence not least in Manchuria which reached its apogee in the puppet state of Manchukuo The study's geographically temporally and architecturally inclusive approach framed by the concept of multiple modernities questions the application of conventional theories of modernity or post colonialism to the Chinese situation By challenging conventional modernist historiography that has marginalised the experiences of the west's other for much of the last century this book proposes different ways of grappling with and comprehending the distinction and complexity of China's experiences and its encounter with architectural modernity
