Difficult Topics in Group Psychotherapy Jerome Gans, 2018-05-08 This book contains eleven selected papers on difficult topics group therapists encounter in their work Based on the author's forty years in the field these papers include the topics of shame courage hostility combined individual and group therapy money indirect communication difficult patients silence and the missed session Written from a psychodynamic orientation with a relational emphasis they pay special attention to countertransference An autobiographical introduction to each paper discusses what experiences have led the author to write on each topic These introductions honor the role that personal experience has played in the evolution of Dr Gan's therapeutic presence A Century of Psychiatry, Psychotherapy and Group Analysis Ronald Sandison, 2001-01-01 In a very Jungian way the writing is episodic and discursive and the whole is embellished with dreams Most readers will find something of interest I was drawn to the story of his time as a psychiatrist at Powick Hospital in the 1950s and the development of the unit treating patients with combined LSD and psychotherapy Others may relish his many examples of group work in action or the tantalizing glimpses of Louis Zinkin as his analyst in the 1980s Journal of Analytical Psychology This compelling book argues for the integration of medical and psychoanalytic models of the workings of the mind and applies an integrated approach to general psychiatric practice and psychotherapy Ronald Sandison looks at the seminal ideas of key figures such as Freud Jung and Foulkes and shows how they have transformed the way people perceive themselves and society He draws on his experience of over fifty years of psychiatric practice which include twenty years work in the former mental hospitals He interweaves and enriches his account with personal experiences and with his dreams This biographical material extends his concept of searching for and finding a unifying principle not only for psychiatry but also for himself Sandison challenges the exclusive use of the medical model in psychiatry arguing that psychoanalysis and its derivatives are the most effective treatments in psychiatry as they take into account the inner life of the client He shows how the prescription of clinical drugs to alleviate mental symptoms can present a barrier to the therapeutic relationship This book brings together the key ideas in psychotherapy in the last century it gives an essential overview that will enable practitioners and theoreticians to gain a deeper understanding of their own work and its significance within the development of this significant field **The Theatre of Truth** , 2008-02-26 Doctoral Dissertation University of California Berkeley 1995ABSTRACT Jacob Moreno MD 1889 1974 is

known today as the founder of psychodrama which he defined as the science which explores the truth by dramatic methods This dissertation investigates Moreno primarily as a theatre artist It starts with a philosophical analysis of the concepts of acting improvisation and spontaneity and then consolidates the elements of Moreno s theory of the nature and function of theatre which are dispersed throughout his writings and have never been thoroughly collected in one place It also examines how Moreno discovered the healing power of drama while he directed his Theatre of Spontaneity in Vienna 1920s and in New York 1930s The appendix contains Moreno s earliest theatrical text The Godhead as Comedian translated for the first time in its entirety from the 1919 German edition 325 pages including 19 p of German and English references chronology www.scheiffele.com
