The papers cover the following topics algorithms formal methods and emerging fields Foundations of Perceptual Theory S.C. Masin, 1993-06-30 Historical analysis reveals that perceptual theories and models are doomed to relatively short lives. The most popular contemporary theories in perceptual science do not have as wide an acceptance among researchers as do some of those in other sciences To understand these difficulties the authors of the present volume explore the conceptual and philosophical foundations of perceptual science Based on logical analyses of various problems theories and models they offer a number of reasons for the current weakness of perceptual explanations New theoretical approaches are also proposed At the end of each chapter dicussants contribute to the conclusions by critically examining the authors ideas and analyses Fundamentals of Computation Theory F.
