**Communal Experience of the Kibbutz** Joseph Blasi,2017-07-28 Joseph Blasi documents and describes the workings of an existing kibbutz society to provide a model for Utopian thinking and clear up confusion concerning Utopian values He details the history and development of Kibbutz Vatik a pseudonym providing a systematic record of kibbutz culture daily life and

social arrangements economic cooperation and work politics education and attitudes of community members Despite its advantages as a model Utopia the kibbutz is not a perfect society Having eliminated the most serious forms of social economic political and educational fragmentation and violence the communal group is left with the complicated and mounting problems of keeping a fellowship alive and well Blasi assesses the community s advantages and disadvantages illuminating the interlocking dilemmas that cut across social and political concerns The Communal Experience of the Kibbutz updates our knowledge of kibbutz life in light of recent research It gives a detailed account of the Utopian community in the kibbutz and its activities The special quality of the kibbutz Blasi argues lies not so much in its proven success vis a vis other communal societies but in that it is a communal alternative that most Western peoples can readily visualize as a real option

professionals in the fields of social services education organizational consulting community work public policy and healthcare Using accessible language and extensive use of case examples this book will help reflective practitioners or practice oriented academics approach inquiry in ways that are coherent and consistent with a relational constructionist orientation This volume will be useful for undergraduates graduate students and practitioners engaged in professional development with particular use for those scholar practitioners who want to reflect on and learn from their practice and who want to produce practical results with and for those with whom they are working It is also aimed at those scholar practitioners who want to contribute to a wider understanding of how social relations groups organizations communities etc can work effectively
