morphemes or are related to ordering issues e g subjects precede finite verbs whenever there is number agreement between them All 24 chapters adopt a comparative perspective on these two fields of research highlighting cross linguistic grammatical similarities and differences within the Romance language family In addition many chapters address issues related to variation observable within individual Romance languages and grammatical change from Latin to Romance

Variation and Change in French Morphosyntax Anna Tristram,2017-07-05 Collective nouns such asmajorite or foulehave long been of interest to linguists for their unusual semantic properties and provide a valuable source of new data on the evolution of French grammar This book tests the hypothesis that plural agreement with collective nouns is becoming more frequent in French Through an analysis of data from a variety of sources including sociolinguistic interviews gap fill tests and corpora the complex linguistic and external factors which affect this type of agreement are examined shedding new light on their interaction in this context Broader questions concerning the methodological challenges of studying variation and change in morphosyntax and the application of sociolinguistic generalisations to the French of France are also addressed

Luis,2012-07-12 In most languages we find little words which resemble a full word but which cannot stand on their own Instead they have to lean on a neighbouring word like the d ve and unstressed em of Kim d ve helped em Kim would have helped them These are clitics and they are found in most of the world s languages In English the clitic forms appear in the same place in the sentence that the full form of the word would appear in but in many languages clitics obey quite separate rules of placement This book is the first introduction to clitics providing a complete summary of their properties their uses the reasons why they are of interest to linguists and the various theoretical approaches that have been proposed for them The book describes a whole host of clitic systems and presents data from over 100 languages   **The World's Major Languages** Bernard Comrie,2017-07-05 This volume features over fifty of the world s languages and language families The featured languages have been chosen based on the number of speakers their role as official languages and their cultural and historical importance Each language is looked at in depth and the chapters provide information on both grammatical features and on salient features of the language s history and cultural role This second edition has been updated and revised Two new languages Amharic and Javanese have been included This accessible volume will appeal to anyone with an interest in linguistics Key features Attention is paid to both grammatical and sociolinguistic featuresAttention is concentrated on the world s major languagesDesigned to be accessible to all readers with an interest in language   **The Cambridge History of the Romance Languages: Volume 1, Structures** Martin Maiden,John Charles Smith,Adam Ledgeway,2011 This Cambridge history is the definitive guide to the comparative history of the Romance languages Volume I is organized around the two key recurrent themes of persistence structural inheritance and continuity from Latin and innovation structural change and loss in Romance   **The Foundations of Linguistic Theory (RLE Linguistics B: Grammar)** Nigel Love,2014-02-03 For Roy Harris the fundamental problem about linguistics is that it has been led astray by the fact that we are capable intellectually of decontextualising our own verbal behaviour A whole interlocking system of doctrines about forms meanings and communication has arisen designed to support the idea that one particular kind of decontextualising analysis is a prerequisite for rather than a retrospective reflection on that behaviour Against this in 13 essays collected here for the first time Harris argues for a fresh start which

recognises that we create language as we go both as individuals and as communities just as we create our social structures forms of artistic expression moral values and everything else we call civilisation If Harris s thought can be put in a nutshell it is that all utterances whether written or spoken have to appear in a context and that context is an integral part of the utterance There is no such thing as a contextless utterance   **Language Acquisition in Romance Languages** Vicenç Torrens,2024-08-15 The research presented in this volume covers first language acquisition second language acquisition language heritage and language impairment Papers in this collection use a variety of experimental methods such as eye tracking elicitation tasks production tasks administered off line and untimed transcriptions of spontaneous speech production elicitation Truth Value Judgement tasks standardized tests and multiple choice tasks The studies included in this book try to cover most of the methods used in first and second language acquisition in typical and atypical populations This book will be useful for linguists speech therapists and psycholinguists working on first second and impaired language acquisition

Arguments as Relations John Bowers,2010-07-30 A radically new approach to argument structure in the minimalist program In Arguments as Relations John Bowers proposes a radically new approach to argument structure that has the potential to unify data from a wide range of different language types in terms of a simple and universal syntactic structure In many ways Bowers s theory is the natural extension of three leading ideas in the literature the minimalist approach to Case theory particularly Chomsky s idea that Case is assigned under the Agree function relation the idea of introducing arguments in specifiers of functional categories rather than in projections of lexical categories and the neo Davidsonian approach to argument structure represented in the work of Parsons and others Bowers pulls together these strands in the literature and shapes them into a unified theory These ideas together with certain basic assumptions notably the idea that the initial order of merge of the three basic argument categories of Agent Theme and Affectee is just the opposite of what has been almost universally assumed in the literature lead Bowers to a fundamental rethinking of argument structure He proposes that every argument is merged as the specifier of a particular type of light verb category and that these functional argument categories merge in bottom to top fashion in accordance with a fixed Universal Order of Merge UOM In the hierarchical structures that result from these operations Affectee arguments will be highest Theme arguments next highest and Agent arguments lowest exactly the opposite of the usual assumption Linguistic Inquiry Monographs 58
