under the sponsorship of the European Coordinating Committee for Artificial Intelligence ECCAI FAIR 91 the first of an intended series of international workshops addresses issues which belong to the theoretical foundations of artificial intelligence considered as a discipline focused on concise theoretical description of some aspects of intelligence by toolsand methods adopted from mathematics logic and theoretical computer science The intended goal of the FAIR workshops is to provide a forum for the exchange of ideas and results in a domain where theoretical models play an essential role It is felt that such theoretical studies their development and their relations to AI experiments and applications have to be promoted in the AI research community   Logic Programming '89 Koichi Furukawa,Hozumi Tanaka,1991-04-24 This volume contains selected papers presented at the Eighth Logic Programming Conference held in Tokyo 1989 Various topics in logic programming are covered The first paper is an invited talk by Prof Donald Michie Chief Scientist of the Turing Institute entitled Human and Machine Learning of Descriptive Concepts and introduces various research results on learning obtained by his group There are eleven further papers organized into sections on reasoning logic programming language concurrent programming knowledge programming natural language processing and applications A paper on knowledge programming introduces a flexible and powerful tool for incorporating and organizing knowledge using hypermedia Another paper presents the constraint logic programming language cu Prolog designed for combinatorial problems the way cu Prolog solves the constraints is based on program transformation   Evolving Knowledge Bases João Alexandre Leite,2003 An Evolving Knowledge Base EKB is capable of self evolution by means of its internally specified behaviour In this thesis the author incrementally specifies semantically characterizes and illustrates with examples the concepts and tools necessary to the development of EKBs   Expert Systems in Engineering Georg Gottlob,Wolfgang Nejdl,1990-09-12 The goal of the International Workshop on Expert Systems in Engineering is to stimulate the flow of information between researchers working on theoretical and applied research topics in this area It puts special emphasis on new technologies relevant to industrial engineering expert systems such as model based diagnosis qualitative reasoning planning and design and to the conditions in which they operate in real time with database support The workshop is especially relevant for engineering environments like CIM computer integrated manufacturing and process automation   **Truth Maintenance Systems** João P. Martins,Michael Reinfrank,1991-07-24 The Truth Maintenance Workshop was held in August 1990 during the European Conference on Artificial Intelligence in Stockholm Sweden Ten selected papers eight of them presented at the workshop are included in this volume The papers can be grouped into four main areas Meta level control the goal here is to specify some meta criteria to control the behavior of the TMS Extensions of TMS here the aim is to incorporate new mechanisms into TMS like systems Foundations there is now much interest in providing formal descriptions of TMS proving results about them and relating them with other non monotonic formalisms Belief revision TMS can be considered as providing support to manage the more general problem of belief revision   **Computational Medicine in Data Mining and Modeling** Goran
