leaders and average citizens think about the future of social political and economic life in America This influence has also been felt in the library and information science field Yet while there exists a massive critical literature on Bell s metaphor in the social political and economic literature librarians have failed to systematically grapple with it As a result they appear to be carrying on their own debate about the future in relative isolation from the most significant contributions to this intensely contested idea *The Foundations of Education for Librarianship* Jesse Hauk Shera,1972 Theoretical examination of the role of the librarian in the communication process together with a systematic study of higher education in library science and information science examines the nature of communication and information systems evaluates library schools in terms of curriculum administrative aspects etc and includes the historical background of librarys and library schools References
