Frontiers Of Shrimp Research:

Frontiers of Shrimp Research P.F. DeLoach, W.J. Dougherty, M.A. Davidson, 1991-06-06 Shrimps are subject to great consumer demand in the United States. However, more than 1 billion worth of shrimp is now imported, more than twice the amount produced domestically. Domestic shrimp production, mostly from the trawler fleet in the Gulf of Mexico, is thought to be at its maximum sustainable yield of 91 000 MT. Heads off: Increased production of shrimp in the U.S. through mariculture has been motivated by the increasing demand for this product. The biology of penaeid shrimp and lack of technology for their culture present special problems in fisheries science: reproductive biology, endocrinology, nutrition, pathology, culture science, and future research. The purpose of the Frontiers of Shrimp Research symposium was to assess the status of shrimp research in these areas and to further foster the scientific collaboration vital for significant research advances. The participants included representatives of the science funding agencies, the mariculture industry, and representatives of both the scientific research and science policy communities. The subject matter should be of interest to a variety of readers. Advanced undergraduate, graduate students, mariculturists, and research workers will find this volume both interesting and informative.

Parvoviruses Jonathan Kerr, Susan Cotmore, Marshall E. Bloom, 2005-11-25 This comprehensive reference work brings together for the first time information on every aspect of the parvoviruses in a single volume. It presents the new system of parvovirus classification as agreed by the International Committee for the Taxonomy of Viruses (ICTV) and includes cutting edge information on the virology, molecular and cellular biology. *Distribution and Abundance of Fishes and Invertebrates in Gulf of Mexico Estuaries*, 1992 NOAA's Estuarine Living Marine Resources Program, *Distribution and Abundance of Fishes and Invertebrates in Gulf of Mexico Estuaries Volume 2, Species Life History Summaries*, August 1997, 1997 *Distribution and Abundance of Fishes and Invertebrates in Gulf of Mexico Estuaries: Species life history summaries*, 1992 The Progressive Fish Culturist U.S. Fish and Wildlife Service, 1993 Louisiana Coastal Area Ecosystem Restoration Study, 2004

Shellfish Safety and Quality Sandra E. Shumway, Gary E. Rodrick, 2009-01-28 Shellfish are a very popular and nutritious food source worldwide and their consumption has risen dramatically. Because of their unique nature as compared to beef and poultry, shellfish have their own distinct aspects of harvest, processing and handling. Edited by leading authorities in the field, this collection of review papers discusses issues of current interest and outlines steps that can be taken by the shellfish industry to improve shellfish safety and eating quality. Opening chapters provide an overview of the key issues associated with microbial and biotoxin contamination. Parts two and three then address in more detail methods to improve molluscan shellfish and crustacean quality and safety. Chapters focus on detection of algal toxins, monitoring and mitigation of the effects of harmful algal blooms, metals and organic contaminants, biofouling, disease control, and selective breeding. Part four reviews legislation, regulation, public confidence in shellfish, and risk management. Chapters on post-harvest issues such as depuration, storage and packaging complete the volume. With its distinguished editors and international team of experts,

Shellfish safety and quality is an essential reference for those in the shellfish industry managers policymakers and academics in the field Reviews the latest research on significant hazards such as microbial and biotoxin contamination Discusses effective management of shellfish safety and quality including emerging methods Examines improved packaging methods

Integrated Management of Water Resources in India: A Computational Approach Akhilesh Kumar Yadav, Kanchan Yadav, Vijay P. Singh, 2024-07-02 This book tackles the complexities of water management in India Using computational tools it provides comprehensive information on water availability demand climate change integrated management and governance A must read for researchers policymakers and water managers The book is structured to provide a holistic understanding of water resources in India and the need for an integrated approach to their management It explores various aspects of water management including data collection and analysis water allocation and planning water quality management and the intricate interdependencies within the water energy food nexus One of the key focuses of this book is the application of computational approaches in the management of water resources We explore the use of advanced modeling simulation and optimization techniques to facilitate decision making assess water availability and predict future scenarios By employing computational tools our goal is to bridge the gap between theoretical concepts and practical implementation empowering water managers policymakers researchers and other stakeholders to make informed and effective decisions Throughout the book we present case studies highlighting the application of computational approaches in diverse water management scenarios in India These case studies offer valuable information on real world challenges and demonstrate the potential of computational techniques to address complex water resources problems We also explore the importance of stakeholder engagement participatory approaches and collaborative governance models recognizing the importance of inclusive decision making processes and local knowledge in achieving sustainable water management The book is expected to serve as a valuable resource for students researchers professionals and policymakers involved in water resource management in India We aim to contribute to the ongoing efforts to ensure the availability of clean and adequate water resources for present and future generations

Concepts and Controversies in Tidal Marsh Ecology M.P. Weinstein, Daniel A. Kreeger, 2007-05-08 In 1968 when I forsook horticulture and plant physiology to try with the help of Sea Grant funds wetland ecology it didn't take long to discover a slim volume published in 1959 by the University of Georgia and edited by R A Ragotzkie L R Pomeroy J M Teal and D C Scott entitled Proceedings of the Salt Marsh Conference held in 1958 at the Marine Institute Sapelo Island Ga Now forty years later the Sapelo Island conference has been the major intellectual impetus and another Sea Grant Program the major backer of another symposium the International Symposium Concepts and Controversies in Tidal Marsh Ecology This one re-examines the ideas of that first conference ideas that stimulated four decades of research and led to major legislation in the United States to conserve coastal wetlands It is dedicated appropriately to two then young scientists Eugene P Odum and John M Teal whose inspiration has been the starting place for a generation of coastal wetland and
