## **Frontlines Snapshots Of History:**

*Frontlines* Nicholas Moore, Sidney Weiland, 2001 *Frontlines* relates the personal stories of Reuters correspondents who have found themselves in remarkable situations. They surprise and entertain with vivid flashes of detail: the warts on the neck of a tipsy Nikita Krushchev or the chill draught of air that marked the split second before a V-2 missile detonated. Includes photos and the story.

**Images Performing History** Katarzyna Ruchel-Stockmans, 2015-09-18 The operative role of the photographic media in making and remaking history. History is increasingly made in images not only because its records are largely photographic but also because our ideas about the past are formed in visual terms. This book offers a discussion of contemporary art practices which question the received notions of historical representations after the pivotal changes of 1989 in Europe. These art practices reveal in different ways the operative role of the photographic media in making and remaking history. Not limited to a particular artistic medium, they demonstrate how history is forged through enacting or re-enacting its past forms while on the other hand they indicate how copying and quoting can contribute to creating a new operative aesthetics. By foregrounding a performative character of images, art is shown to construct an alternative knowledge of the past. Among others, the works of the following artists are discussed in this book: Zofia Kulik, Yael Bartana, Harun Farocki and Andrej Ujic, Luc Tuymans, Dierk Schmidt.

Front Lines of Community Hermann Kappelhoff, 2018-04-23 Based on the premise that a society's sense of commonality depends upon media practices, this study examines how Hollywood responded to the crisis of democracy during the Second World War by creating a new genre: the war film. Developing an affective theory of genre cinema, the study's focus on the sense of commonality offers a new characterization of the relationship between politics and poetics. It shows how the diverse ramifications of genre poetics can be explored as a network of experiential modalities that make history graspable as a continuous process of delineating the limits of community.

*The Big Time* Michael MacCambridge, 2023-10-10 Indispensable history. Sally Jenkins, bestselling author of *The Right Call*, a captivating chronicle of the pivotal decade in American sports when the games invaded prime time and sports moved from the margins to the mainstream of American culture. Every decade brings change, but as Michael MacCambridge chronicles in *THE BIG TIME*, no decade in American sports history featured such convulsive cultural shifts as the 1970s. So many things happened during the decade: the move of sports into prime time television; the beginning of athletes gaining a sense of autonomy for their own careers; integration becoming at least within sports more of the rule than the exception; and the social revolution that brought females more decisively into sports as athletes, coaches, executives, and spectators. More than politicians, musicians, or actors, the decade in America was defined by its most exemplary athletes. The sweeping changes in the decade could be seen in the collective experience of Billie Jean King and Muhammad Ali, Henry Aaron and Julius Erving, Kareem Abdul Jabbar and Joe Greene, Jack Nicklaus and Chris Evert, among others, who redefined the role of athletes and athletics in American culture. The Seventies witnessed the emergence of spectator sports as an ever-expanding mainstream phenomenon.

as well as dramatic changes in the way athletes were paid portrayed and packaged In tracing the epic narrative of how American sports was transformed in the Seventies a larger story emerges of how America itself changed and how spectator sports moved decisively on a trajectory toward what it has become today the last truly big tent in American culture
