Stoutjesdijk, J.J. Barkman, 2015-11-24 In Microclimate Vegetation Fauna the ecologist meets the meteorologist it is about the biological aspects of microclimate and its variation in horizontal and vertical directions The great diversity found in the various habitats is stressed also as far as the microclimate is concerned The stronghold of this book on microclimatology or the minor weather in the immediate surroundings of plants and animals is its capacity to unravel the causal relationships between climate topography soils vegetation and fauna The manifold interactions in between are explained in detail and it is concluded that the connections are so intimate that each species has its own microclimate This book is unique and interesting for a wide audience It specifically targets natural scientists and students in biology with an interest in climatology and climatologists with an interest in biology **A Voyage of Exploration**, 1986 *The Climate Near the Ground* Rudolf Geiger, Robert H.
