

Mapped Where Does Our Food Come From?

THE HISTORICAL ORIGINS OF OUR FOOD

Over time we have evolved the crop species that build our national diets.

Did you know that over two-thirds of national crops originated from somewhere else?

Staple crops are those that are the most routinely grown and consumed. They can vary between country depending on availability.

Countries that produce the world's staple crops today are vital to global food security.

When the production and distribution of staple crops are threatened, the consequences can be felt globally.

Let's take a look at the top agricultural producers of some of the world's staple crops.

TOP 3 GLOBAL PRODUCERS OF EACH STAPLE CROP % share of global production

Global food security is heavily dependent on staple crops and the countries that produce them.

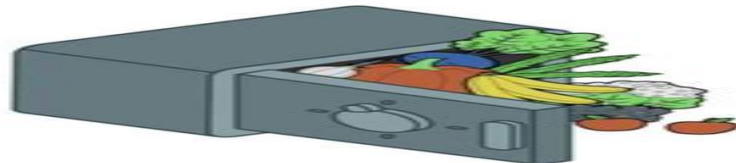

October 2000

THE FUTURE OF FOOD SECURITY

Early food security solutions involved transplanting crops from other regions to supplement diets. Now crop yields must be increased to strengthen our food security — fertilizers are a vital step in this process.

It's estimated that by 2050 the world will need to increase its food output by around **70%** in order to feed an ever-growing population.

Action must be taken to increase and diversify fertilizer supply across the globe to strengthen food security systems and crop production.

Brazil Potash extracts vital potash ore from the earth and returns it as fertilizer, fortifying food and helping to maintain continuous growth in the agricultural sector.
