**Functional Structure in DP and IP**, 2002      Functional Structure in DP and IP Guglielmo Cinque, 2023 Presenting the results of a long term research project funded by the Italian government this text provides a comprehensive mapping of various functional structures in natural languages      **Manual of Romance Morphosyntax and Syntax** Andreas

Dufter, Elisabeth Stark, 2017-09-25 This volume offers theoretically informed surveys of topics that have figured prominently in morphosyntactic and syntactic research into Romance languages and dialects We define syntax as being the linguistic component that assembles linguistic units such as roots or functional morphemes into grammatical sentences and morphosyntax as being an umbrella term for all morphological relations between these linguistic units which either trigger morphological marking e g explicit case morphemes or are related to ordering issues e g subjects precede finite verbs whenever there is number agreement between them All 24 chapters adopt a comparative perspective on these two fields of research highlighting cross linguistic grammatical similarities and differences within the Romance language family In addition many chapters address issues related to variation observable within individual Romance languages and grammatical change from Latin to Romance      **Mapping the Left Periphery** Paola Beninca, Nicola Munaro, 2011-02-16 Mapping the Left Periphery the fifth volume in The Cartography of Syntactic Structures is entirely devoted to the functional articulation of the so called complementizer system the highest part of sentence structure The papers collected here identify on the basis of substantial empirical evidence new atoms of functional structure which encode specific features that are typically expressed in the left periphery The volume also submits the richly articulated CP structure to further crosslinguistic checking The research presented here has led to the identification of new important restrictions in the relative sequence of elements appearing in the left periphery With contributions from African languages Chinese Hungarian Romance languages and Italian dialects Mapping the Left Periphery will be of interest to syntacticians working on comparative syntax and more specifically on Romance grammar      The Lexicon-Syntax Interface Pritha Chandra, Richa Srishti, 2014-03-15 The present collection

offers fresh perspectives on the lexicon syntax interface drawing on novel data from South Asian languages like Bangla Hindi Urdu Kashmiri Kannada Malayalam Manipuri Punjabi and Telugu It covers different phenomena like adjectives nominal phrases ditransitives light verbs middles passives causatives agreement and pronominal clitics while trying to settle the theoretical tensions underlying the interaction of the lexicon with the narrow syntactic component All the chapters critically survey previous analyses in detail suggesting how these may or may not be extended to South Asian languages Novel explanations are proposed which handle not only the novel data presented here but also pave alternative ways to look at issues of minimalist architecture      **Studies on Agreement** João Costa, Maria Cristina Figueiredo Silva, 2006 The status of

agreement is a core issue in current morphological and syntactic theory The collection of papers in this volume focuses on important issues such as the nature of the relation between syntax and morphology in determining agreement relations whether and which syntactic configurations are relevant for determining agreement the relevance of verbal agreement for the purposes of EPP the inquiry into the existence of connections between verbal and DP internal agreement on the morphological and syntactic distinction of person number and gender agreement how and why AGREE and Spec head relations trigger different agreement effects and the type of relation that exists between head movement and morphological agreement The data collected come from a wide variety of languages and the studies presented discuss innovative and thought provoking ideas for dealing with agreement phenomena

**Determiners** Jila Ghomeshi,Ileana Paul,Martina Wiltschko,2009-10-28 This volume brings together recent work on the formal and interpretational properties of determiners across a variety of typologically and geographically unrelated languages It seeks to answer the core question of modern linguistic theory Which properties of languages are universal and which are variable In recent theorizing much of language variation is argued to stem from differences in the properties of features associated with functional heads As such this volume can be viewed as a case study of one such category the determiner D The contributions all investigate the status of D as a language universal by examining the language specific syntactic and semantic properties associated with this category This volume will appeal to researchers and students in syntax and semantics as well as to those who have more a specific interest in determiners and noun phrases

**Latin Word Order** A. M. Devine,Laurence D. Stephens,2006 Combining the rich empirical documentation of traditional philological approaches with the deeper theoretical insight of modern linguistics this work aims to reduce the intricate surface patterns of Latin word order to a simple and general cross categorical system of syntactic structure which translates into constituents of pragmatic and semantic meaning The book will be useful for advanced students and scholars in the fields of linguistics Latin and classics Jacket

**Continuity and Variation in Germanic and Romance** Sam Wolfe,Christine Meklenborg,2021 This volume offers a range of synchronic and diachronic case studies in comparative Germanic and Romance morphosyntax These two language families spoken by over a billion people today have played a central role in linguistic research but many significant questions remain about the relationship between them Following an introduction that sets out the methodological empirical and theoretical background to the book the volume is divided into three parts that deal with the morphosyntax of subjects and the inflectional layer inversion discourse pragmatics and the left periphery and continuity and variation beyond the clause The contributors adopt a diverse range of approaches making use of the latest digitized corpora and presenting a mixture of well known and under studied data from standard and non standard Germanic and Romance languages Many of the chapters challenge received wisdom about the relationship between these two important language families The volume will be an indispensable resource for researchers and students in the fields of Germanic and Romance linguistics historical and comparative linguistics and

morphosyntax      **Research on Old French: The State of the Art** Deborah L Arteaga, 2012-11-02 The present volume presents scholarly study into Old French as it is practiced today in all of its forms within a variety of theoretical frameworks from Optimality Theory to Minimalism to Discourse Analysis Many of the chapters are corpus based reflecting a new trend in the field as more electronic corpora become available The chapters contribute to our understanding of both the synchronic state and diachronic evolution not only of Old French but of language in general Its breadth is extensive in that contributors pursue research on a wide variety of topics in Old French focusing on the various subsystems of language All examples are carefully glossed and the relevant characteristics of Old French are clearly explained which makes it uniquely accessible to non specialists and linguists at all levels of training      *Atypical Demonstratives* Marco Coniglio, Andrew Murphy, Eva Schlachter, Tonjes Veenstra, 2018-08-21 Atypical demonstratives have not received adequate attention in the literature so far or have even been completely neglected By providing fresh insights and discussing new facets this volume contributes to the better understanding of this group of words starting from specific empirical phenomena and advances our knowledge of the various properties of demonstratives their syntactic multi functionality semantic feature specifications and pragmatic functions In addition some of the papers discuss different grammaticalization processes involving demonstratives in particular how and from which lexical and morphosyntactic categories they originate cross linguistically and which semantic or pragmatic mechanisms play which role in their emergence As such the different contributions guide the readers on an adventurous journey into the realm of different exotic species of demonstratives whose peculiar properties offer new exiting insights into the complex nature of demonstrative expressions themselves      **Locality Domains in the Spanish Determiner Phrase** M. Emma Ticio, 2009-12-03 Examining its subject from a generative perspective this highly detailed text deals with the syntax of nominal expressions It focuses on empirical data taken from the Spanish language though the author goes further to draw conclusions of wider theoretical interest from material culled from other languages too The book considers crucial phenomena in the nominal domain such as extraction out of nominal phrases and ellipsis in these phrases as well as their modification In doing so it provides the reader with a unified explanation of a number of phenomena that have not previously been analyzed under a single basic account In particular Ticio explores how economy notions interact with a number of functional categories with the length and type of movements allowed and with the existence of three internal domains within nominal expressions She uses these observations to inform her analysis of the structure of arguments and adjuncts in nominal expressions and of the potential these elements have for extraction To test the empirical adequacy of her analysis she employs phenomena such as the properties of attributive adjectives partial cliticization and nominal elision in Spanish nominal phrases      **Nominal Determination** Elisabeth Stark, Elisabeth Leiss, Werner Abraham, 2007 The following theoretical empirical points on the DP are discussed Article and its referential anaphoric properties by Abraham Determiners in Centering Theory Bartra On bare NPs in Old Spanish and Catalan identification of all
