Markedness in

Canaanite and Hebrew Verbs Paul D. Korchin, 2018-08-14 Semitic linguistics is arguably involved in its own version of a maximalist versus minimalist controversy with respect to verbal morphology. Dissent persists about whether and to what degree the Northwest Semitic verb paradigms underlying languages such as Biblical Hebrew and Amarna Canaanite *yaqtul* *yaqtulu* *yaqtula* are themselves determinative of tense aspect mood values as opposed to extra verbal structures ranging from syntax to discourse. To label a verb form as marked or unmarked for these values is to evoke a bountiful yet nebulous complex of theories about how language is built and employed. But Semitists have often unwittingly bleached markedness terms of their full historical and technical significance reducing them to generic appellations that are invoked in sporadic and nearly random fashions. By applying markedness to Semitic morphology in a consistent and rigorous manner this innovative book brings to bear a venerable linguistic construct on a persistent philological crux in order to achieve deeper clarity in the structures and workings of Canaanite and Hebrew verbs. Korchin's arguments hold relevance for translating and interpreting nearly every sentence in ancient texts such as the Hebrew Bible and the Amarna letters.

Language Arts in Asia Christina DeCoursey, 2012-01-17 This volume is the first of a series contributing to the academic study of Language Arts as an English language teaching paradigm. Language Arts has been widely used in native English speaking countries including Australia and New Zealand. Its recent adoption into the second language teaching curriculum in Hong Kong as well as similar initiatives within secondary and tertiary education in mainland China enhances its interest to scholars studying second language teaching and learning in Asian contexts. This book offers many papers and discussions of interest to teachers, language professionals, scholars and administrators. Its chapters explore current topics in Language Arts research including trends in the rapprochement of stylistics and linguistics, teaching approaches and learning outcomes. At the same time they offer diverse theoretical and methodological approaches of interest to the practitioner and policy maker as well as the researcher. The value of this volume lies particularly in strengthening the theoretical and methodological foundations of Language Arts. The use of literature and the arts in humanist education has a long history within Europe, being traditionally appreciated for its ability to transform leaders, instill finer sensibilities and question social ills. In its postcolonial incarnations, as the traditional subject areas were informed by critical and linguistic theories, language arts subject areas were less often used as they were understood to offer opportunities to analyse their functions as apology for leaders coopting the young and pacifying dissent, but less often used to teach second language skills. Language Arts curricula arising since the 1980s have increasingly embraced authentic voices, styles and genres. Contemporary Language Arts curricula use literature to teach reading based and communication skills in conjunction with critical and creative thinking. The movement of English language education beyond native English shores has placed Language Arts into a World Englishes frame and therefore its curricula have included the teaching of ethics, civics and intercultural sensitivity. The explosion of media and digital communications of the 1990s led to the adoption of media literacy as a crucial Language Arts skill. As digital innovations continue to impact the

teaching of English Language Arts has adopted multiliteracies These developments are represented in the papers included in this volume

Language, Corpora, and Technology in Applied Linguistics Muhammad Afzaal, Swaleha Bano Naqvi, Geng Qiang, 2023-11-27

As culture and society has become more digitalized especially when computer science and digital technologies have entered a new era in the twenty first century translation studies began to utilize a wide range of tools to enhance its reading of texts and contexts without which translation both as a practice and as a theorization could barely persist It has become more apparent that two extreme poles between macro and micro visions have formed the diversified terrains of translation studies On the one hand technologies like NLP topic modeling network analysis and data visualization make distant reading become possible thus allowing us to have a paradigmatic view of how human s ideas beliefs values knowledge and even emotions have spread in some patterns across cultural geographical and language divides in world history On the other hand corpus methods such as the use of keywords collocates and concordance lines changed the way by which texts were closely read from linear to vertical With microscope like corpus tools we could go deeper into the texture for perception of nuanced meaning While considering a fact that translation is seldom mono modal in conveying meaning we have to reconceptualize context as a multimodal environment where audio visual and other resources interact to convey and make meaning With regard to the fast development of digital technology translation studies take an active role in gaining an enhanced capability in promoting transformation Complexity has been favored in terms of theoretical framework and methodology New questions are asked old ones revisited with novel tools but more areas wait to be cultivated and more questions to be approached by combining quantitative and qualitative methods We could ask if digital technologies would bring new innovation to study of translation history a heavily walled land for traditional humanists who tend to repeat so what to question the less significance of data driven studies The idea of high quality machine translation has become so realistic in today s market that translation educators have to face the shock wave it brought to translation learners and practitioners and rethink the relation between human translators and algorithms Machine translation assisted communication could help remove boundaries for better communication but at the same time it also creates conflicts and leads to confrontation Thus understood it is imperative to give a concerned attention to digital translation studies that is to study translation by resorting to and drawing on the digital technologies This Research Topic is intended to promote current directions and new developments in cross disciplinary critical discourse research We welcome papers which from a critical analytical perspective deal with contemporary social scientific political economic or professional discourses and genres Papers addressing the highlighted topics are especially welcome In giving weight to these topics we wish to call to attention some of the most pressing problems currently facing the world

Translation Studies at the Interface of Disciplines João Ferreira Duarte, Alexandra Assis Rosa, Teresa Seruya, 2006-10-25

Translation Studies has been defined in terms of spatial metaphors stressing the need for disciplinary border crossings with the purpose of borrowing different approaches

orientations and tools from diverse academic fields. Such territorial incursions have resulted in a more thorough exploration of the home province as this volume is designed to show. The interdisciplinary nature of the venture arises out of the multiplicity of terrains involved and the theoretically motivated definition of the object itself. Translation has been perceived as communication in context; hence the study of translated texts as facts of target cultures means that they need to be investigated within particular situational and sociocultural environments, an enterprise which necessarily requires the collaboration of various disciplines. This volume has grown out of a conference held at the University of Lisbon in November 2002 and collects a selection of papers that focus on the crossdisciplinarity of Translation Studies, offering new perspectives on the current space of translation, on the importation and redefinition of theories, methodologies and concepts for the study of translation, and on the complex interplay of text and context in translation, creating dynamic interfaces with Sociology, Literary Theory, Cultural Studies, Discourse Analysis, Cultural History, among other disciplines.

The Function of Evil across Disciplinary Contexts Malcah Effron, Brian Johnson, 2017-02-15. The Function of Evil Across Disciplinary Contexts explores answers to two important questions about the age-old theme of evil: is there any use in using the concept of evil in cultural, psychological, or other secular evaluations of the world and its productions? Most importantly, if there is, what might these functions be? By looking across several disciplines and analyzing evil as it is referenced across a broad spectrum of phenomena, this work demonstrates the varying ways that we interact with the ethical dilemma as academics, as citizens, and as people. The work draws from authors in different fields, including history, literary and film studies, philosophy, and psychology, and from around the world to provide an analysis of evil in such topics as deeply canonical as Beowulf and Shakespeare to subjects as culturally resonant as Stephen King, Captain America, or the War on Terror. By bringing together this otherwise disparate collection of scholarship, this collection reveals that discussions of evil across disciplines have always been questions of how cultures represent that which they find socially abhorrent. This work thus opens the conversation about evil outside of field-specific limitations, simultaneously demonstrating the assumptions that undergird the manner by which such a conversation proceeds.

Central and Eastern European Literary Theory and the West Michał Mrugalski, Schamma Schahadat, Irina Wutsdorff, 2022-12-05. Literary theory flourished in Central and Eastern Europe throughout the twentieth century, but its relation to Western literary scholarship is complex. This book sheds light on the entangled histories of exchange and influence both within the region, known as Central and Eastern Europe, and between the region and the West. The exchange of ideas between scholars in the East and West was facilitated by both personal and institutional relations, both official and informal encounters. For the longest time, however, intellectual exchange was thwarted by political tensions that led to large parts of Central and Eastern Europe being isolated from the West. A few literary theories nevertheless made it into Western scholarly discourses via exiled scholars. Some of these scholars, such as Mikhail Bakhtin, became widely known in the West, and their thought was transposed onto new Western cultural contexts; others, such as Olga

Freidenberg were barely noticed outside of Russian and Poland This volume draws attention to the schools circles and concepts that shaped the development of theory in Central and Eastern Europe as well as the histoire croise e the history of translations transformations and migrations that conditioned its relationship with the West *Linguistics & Biblical Exegesis* Douglas Mangum, Josh Westbury, 2017-11-01 We rarely think about the way languages work because communicating in our native tongue comes so naturally to us The Bible was written in ancient Hebrew Aramaic and Greek languages no modern reader can claim to have a native understanding of A better understanding of how language works should help us understand the Bible better as we seek to discern the original intent and meaning of each biblical author In this book you will get a basic introduction to the field of linguistics its history its key concepts its major schools of thought and how its insights can shed light on various problems in biblical Hebrew and Greek Numerous examples illustrate linguistic concepts and technical terminology is clearly defined Learn how the study of language can enhance your Bible study *Soviet African Studies, 1918-59: General functional studies* Mary Holdsworth, 1961

Moral Emotion, Moral Cognition, and (Im)Moral Behavior in the Workplace Peixu He, Hongdan Zhao, Cuiling Jiang, Chuangang Shen, 2023-09-27 Moral behavior is subject to socially accepted moral norms and also has a pervasive influence on organizational performance With the emergence of ethical issues found in organizations practitioners and scholars pay increasing attention to ethics management Therefore workplace moral behavior e g pro social behavior and organizational citizenship behavior OCB and immoral behavior e g interpersonal abusive behavior deviant counterproductive behavior and unethical pro organizational behavior have also received substantial research interests over the past decades To date the most common framework used to study moral behavior has been the cognitive approach with abundant evidence demonstrating that emotion and cognition are the two core elements in generating and influencing workplace im moral behavior However limited studies have been conducted to explore the emotional cognitive processes or integrative moral emotion cognition system relevant to workplace moral behavior Despite our knowledge of the antecedents and consequences of workplace im moral behaviors more research on the generating mechanism influencing mechanism transformation mechanism and governance strategies is needed For example it is unclear how exhibiting im moral behavior in the workplace would impact the actor s and the third party observer s emotions thoughts feelings and subsequent behavior Besides the question of whether ethical unethical leader behavior would trigger a trickle down effect is underdeveloped which refers to the fact that how the behavior or perception of the top leaders affects employees from top to bottom along the formal vertical power chain In addition we have little knowledge on when how and why the ethical employees the so called good soldiers would engage in workplace immoral behavior and vice versa

The Manipulation of Literature (Routledge Revivals) Theo Hermans, 2014-08-07 First published in 1985 the essays in this edited collection offer a representative sample of the descriptive and systematic approach to the study of literary translation The book is a reflection of the theoretical thinking and practical research carried out by an international group of scholars

who share a common standpoint. They argue the need for a rigorous scientific approach to the phenomena of translation, one of the most significant branches of Comparative Literature, and regard it as essential to link the study of particular translated texts with a broader methodological position. Considering both broadly theoretical topics and particular cases and traditions, this volume will appeal to a wide range of students and scholars across disciplines.
