Basic Principles in Applied Catalysis Manfred Baerns, 2004-01-22 Applied catalysis is based nowadays not only on empirical knowledge but also on the many insights that have been gained from the fundamental understanding of catalysis It also comprises knowledge and expertise from catalytic reaction engineering in particular kinetics of the catalytic reaction and its interplay with heat and mass transfer as well as fluid dynamics and the specific conditions prevailing in the type of reactor used Applied catalysis comprises many areas from a reaction point of view many types of catalytic materials from which catalysts are formed are needed to achieve high selectivities and space time yields last but not least catalysts should have a long life time to which its

deactivation is detrimental A catalytic material that fulfils all the demands then often requires special mechanical and thermal treatment to be used in practise Various books have been written about specific areas as mentioned above It is the intention of this contribution to present timely reports by well recognised experts in the field to outline the state of science and technology in selected but representative areas illustrating the basic principles of applied catalysis *Commercial*

University of Michigan Official Publication, 1968 Indigeneity in the Philippines Leah Abayao, Jimmy Fong, Carolyn Podruchny, 2025-09-30 In the Philippines the concept of Indigeneity is deeply intertwined with colonial history a pattern echoed across the globe Yet its

manifestation in the Philippines bears distinct features The Philippine Indigenous Peoples Rights Act of 1997 identifies as Indigenous groups who resisted colonization Today the Philippines recognizes approximately 110 diverse Indigenous ethnic groups that are made up of 14 17 million people This book aims to show how discussions of Indigeneity in the Philippines can contribute to the conversation about global Indigeneity by highlighting the distinct circumstances of the Philippines The fourteen essays in this volume are divided into four sections Defining Indigenous Peoples and their Rights Indigenous Knowledge Colonialism and Making Identities The interdisciplinary essays touch on Indigenous peoples throughout the Philippines and beyond to diasporas Most of the essays are rooted in northern Luzon in the Cordillera region reflecting the field's strength A variety of theoretical insights emerge in the volume but a common thread is each essay's firm grounding in specific people places and processes and the critical reading of source materials The twenty-four contributors teach us that Indigeneity in the Philippines is a complex and evolving identity brought to national attention by the hard work of Indigenous communities In the Philippines today Indigenous peoples continue to negotiate their rights affirm their presence and advocate for their concerns Indigenous knowledge has been flourishing in epistemologies rituals stories books and educational structures This volume of essays on Indigeneity in a nation that is known for its support of Indigenous groups is one of the first of its kind for Southeast Asia
