Fairbairn,Sue O'Connor,Benjamin Marwick,2009-02-01 Archaeological Science meetings will have a personality of their own depending on the focus of the host archaeological fraternity itself The 8th Australasian Archaeometry meeting follows this pattern but underlying the regional emphasis is the continuing concern for the processes of change in the landscape that simultaneously effect and illuminate the archaeological record These are universal themes for any archaeological research with the increasing employment of science based studies proving to be a key to understanding the place of humans as subjects and agents of change over time This collection of refereed papers covers the thematic fields of geoarchaeology archaeobotany materials analysis and chronometry with particular emphasis on the first two The editors Andrew Fairbairn Sue O Connor and Ben Marwick outline the special value of these contributions in the introduction The international nature of archaeological science will mean that the advances set out in these papers will find a receptive audience among many archaeologists elsewhere There is no doubt that the story that Australasian archaeology has to tell has been copiously enriched by incorporating a widening net of advanced science based studies This has brought attention to the nature of the environment as a human artefact a fact now more widely appreciated and archaeology deals with these artefacts among others in this way in this publication **Australian National Bibliography: 1992** National Library of Australia,1988 **Archaeological Science Under a Microscope** Michael Haslam,Gail Robertson,Alison Crowther,Sue Nugent,Luke Kirkwood,2009-07-01 These highly varied studies spanning the world demonstrate how much modern analyses of microscopic traces on artifacts are altering our perceptions of the past Ranging from early humans to modern kings from ancient Australian spears or Mayan pots to recent Maori cloaks the contributions demonstrate how starches raphides hair blood feathers resin and DNA have become essential elements in archaeology s modern arsenal for reconstructing the daily spiritual and challenging aspects of ancient lives and for

understanding human evolution The book is a fitting tribute to Tom Loy the pioneer of residue studies and gifted teacher who inspired and mentored these exciting projects **The History of Melanesian Society** William Halse Rivers Rivers,1914

The History of Melanesian Society William Halse Rivers Rivers,1968 **The Heart of the Pearl Shell** James F. Weiner,2022-08-19 For the Foi people who live on the edge of the central highlands of Papua New Guinea the flow of pearl shells is the heart of their social life The pearl shell is the exchange item that mediates the creation of their most important sexual and social roles The Heart of the Pearl Shell analyzes a number of myths of the Foi people elegantly bringing together significant ethnographic materials in a way that has important implications for the development of social theory in anthropology and in Melanesian studies Scholars of semiotic symbolic anthropology and of comparative religion will also share the author s interest in the meaning and role of mythology in Foi culture Instead of relying on orthodox methods of Freudian or structuralist interpretation James Weiner assumes there is a dialectical relationship between the images of Foi myth and the images of the Foi s social world He demonstrates how each set of these images is dependent upon the other for its creation This innovative study locates Foi social meaning in the re creation and attempted solution of the moral dilemmas that are crystallized in mythology and other poetic usages This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1988 **Plastic Reason**

Tobias Rees,2016-05-03 Throughout the twentieth century neuronal researchers knew the adult human brain to be a thoroughly fixed and immutable cellular structure devoid of any developmental potential Plastic Reason is a study of the efforts of a few Parisian neurobiologists to overturn this rigid conception of the central nervous system by showing that basic embryogenetic processes most spectacularly the emergence of new cellular tissue in the form of new neurons axons dendrites and synapses continue in the mature brain Furthermore these researchers sought to demonstrate that the new tissues are still unspecific and hence literally plastic and that this cellular plasticity is constitutive of the possibility of the human Plastic Reason grounded in years of fieldwork and historical research is an anthropologist s account of what has arguably been one of the most sweeping events in the history of brain research the highly contested effort to consider the adult brain in embryogenetic terms A careful analysis of the disproving of an established truth it reveals the turmoil that such a disruption brings about and the emergence of new possibilities of thinking and knowing **History of Number** Kay Owens,Glen Lean,Patricia Paraide,Charly Muke,2017-10-24 This unique volume presents an ecocultural and embodied perspective on understanding numbers and their history in indigenous communities The book focuses on research carried out in Papua New Guinea and Oceania and will help educators understand humanity s use of numbers and their development and change The authors focus on indigenous mathematics education in the early years and shine light on the unique processes

and number systems of non European styled cultural classrooms This new perspective for mathematics education challenges educators who have not heard about the history of number outside of Western traditions and can help them develop a rich cultural competence in their own practice and a new vision of foundational number concepts such as large numbers groups and systems Featured in this invaluable resource are some data and analyses that chief researcher Glendon Angove Lean collected while living in Papua New Guinea before his death in 1995 Among the topics covered The diversity of counting system cycles where they were established and how they may have developed A detailed exploration of number systems other than base 10 systems including 2 cycle 5 cycle 4 and 6 cycle systems and body part tally systems Research collected from major studies such as Geoff Smith s and Sue Holzknecht s studies of Morobe Province s multiple counting systems Charly Muke s study of counting in the Wahgi Valley in the Jiwaka Province and Patricia Paraide s documentation of the number and measurement knowledge of her Tolai community The implications of viewing early numeracy in the light of this book s research and ways of catering to diversity in mathematics education In this volume Kay Owens draws on recent research from diverse fields such as linguistics and archaeology to present their exegesis on the history of number reaching back ten thousand years ago Researchers and educators interested in the history of mathematical sciences will find History of Number Evidence from Papua New Guinea and Oceania to be an invaluable resource **US Defense Politics** Harvey M.

Sapolsky, Associate Professor of Political Science University of Notre Dame Eugene Gholz, Eugene Gholz, Caitlin Talmadge, 2008-08-06 This new textbook seeks to explain how US defense and national security policy is formulated and conducted The focus is on the role of the President Congress political partisans defense industries lobbies science the media and interest groups including the military itself in shaping policies It examines the following key themes US grand strategy who joins America s military how and why weapons are bought the management of defense public attitudes toward the military and casualties the roles of the President and the Congress in controlling the military the effects of 9 11 on security policy homeland security government reorganizations and intra and inter service relations The book shows how political and organizational interests determine US defense policy and warns against the introduction of centralising reforms In emphasizing the process of defense policy making rather than just the outcomes of that process this book signals a departure from the style of many existing textbooks **Ritual, History and Power** Maurice Bloch, 2020-12-16 This volume provides a collection of some of Maurice Bloch s most important work including influential essays on power hierarchy death and fertility

Altered Ecologies Simon Haberle, Janelle Stevenson, Matthew Prebble, 2010-11-01 Like a star chart this volume orientates the reader to the key issues and debates in Pacific and Australasian biogeography palaeoecology and human ecology A feature of this collection is the diversity of approaches ranging from interpretation of the biogeographic significance of plant and animal distributional patterns pollen analysis from peats and lake sediments to discern Quaternary climate change explanation of the patterns of faunal extinction events the interplay of fire on landscape evolution and models

of the environmental consequences of human settlement patterns The diversity of approaches geographic scope and academic rigor are a fitting tribute to the enormous contributions of Geoff Hope As made apparent in this volume Hope pioneered multidisciplinary understanding of the history and impacts of human cultures in the Australia Pacific region arguably the globe s premier model systems for understanding the consequences of humans colonization on ecological systems The distinguished scholars who have contributed to this volume also demonstrate Hope s enduring contribution as an inspirational research leader collaborator and mentor Terra Australis leave no doubt that history matters not only for land management but more importantly in alerting settler and indigenous societies alike to their past ecological impacts and future environmental trajectories The Science of Society William Graham Sumner,Albert Galloway Keller,Maurice Rea Davie,1927 Vols 1 3 paged continuously Vol 4 by W G Sumner A G Keller and M R Davie Published under the auspices of the Sumner Club on the foundation established in memory of Philip Hamilton McMillan of the class of 1894 Yale College Bibliographical note v 4 p 1193 1268 **The Volume Library** Abram Royer Brubacher,1923 Nature Sir Norman Lockyer,1915 **Trans-pacific Echoes And Resonances; Listening Once Again** Joseph Needham,Gwei-djen Lu,1985-05-01 This monograph is a review of the present state of knowledge of the relationships and consequences of over 25 centuries of interactions between the Amerindian and Asean Circum Pacific regions A fascinating special case of previous work by two Asianists on similar themes of the Euro Asian Continental land mass providing the theoretical framework within which the complexities of cultural cross pattern are studied The subjects dicussed individually begin with the elements of recording and writing continuing through the arts religion folklore and an eventual examination of the natural sciences and technology There is also a discussion in this context of evidence from and the relevance of ethno botany ethno zoology and ethno helminthology The underlying thesis of this volume is the relative independence and powerfully original development and evolution of Amerindian cultures and societies in Central and South America
