EDMONDS EDMONDS (MARK. EDMONDS, JENNIFER.), 2025 *Heuristic Reasoning in Management Accounting* Jörn Sebastian Basel, Jörn Basel, 2012 Heuristics are short cuts and deliberately ignore information for instance through examining fewer cues or integrating less information However this collides with a view on management accountants

and controllers as rational agents which seems to suggest that all available information should be considered. As their role as information supplier is often accompanied with the task to assist managers in their judgment and decision making they have huge influence on these processes. Therefore it is of high relevance to know if how and which heuristics management accountants and controllers use. Furthermore we need to know which individual and situational factors influence their usage of heuristics. With a series of five empirical studies applying a mixed methods research design the author sheds light to these research questions and addresses some central claims of the potential biases but also the stunning benefits of relying on heuristic reasoning. Central to his discussion are dual process approaches which are debated in cognitive psychology. Scholars of these approaches claim that we should distinguish between two distinct processes or systems of the human mind. Following this interpretation heuristics are processes which are described as intuitive automatic fast and unconscious. They are routinized cognitive processes which are based on experience in certain social environments and thus often exhibit ecological rationality. Overall this book picks up an up to date topic in behavioural accounting research which not only is of relevance for researchers but as well for practitioners.

**ISE Fundamental Managerial Accounting Concepts** Thomas P. Edmonds, Christopher Edmonds, Mark A. Edmonds, Philip R. Olds, 2022-01-27 Fundamental Managerial Accounting Concepts focuses on the development of decision making skills helping students to truly understand managerial accounting concepts and improving their ability to make sound business decisions. The text places a heavy emphasis on service and merchandising companies. For example the budgeting chapter uses a merchandising business while most traditional texts use a manufacturing company. Using a service company is not only more relevant but also simplifies the learning environment thereby making it easier for students to focus on budgeting concepts rather than procedural details. The Edmonds author team also promotes a student's understanding of concepts by isolating and introducing the concepts individually in decision making contexts. This allows for students to not only comprehend the concepts but also to understand how business concepts interrelate which is a very critical part of seeing the bigger picture in accounting. Utilising a heavy emphasis on decision making and a unique approach to how accounting

concepts are introduced will provide your students the foundational knowledge they need to succeed in the classroom and beyond
