Chapter 6 Qualitative and Quantitative Measurement

1) How does a researcher use the conceptual definition of a construct in operationalization and conceptualization?

Answer:

- Conceptualization is the process of thinking through a construct. It is the process of taking a construct and refining it by giving it a conceptual definition.
- Operationalization links a conceptual definition to a specific set of measurement techniques or procedures, the construct's operational definition (i.e., a definition in terms of the specific operations of actions a researcher carries out).

Diff: 6 Type: ES Page Ref: 108–110

Learning Objective: 1. Define conceptualization and operationalization.

Skill: 21. Recognizes and can describe the parts of the measurement process

2) How do reliability and validity differ? How do they complement each other? Can a measure be reliable but invalid? How?

Answer:

- Reliability means dependability or consistency. It suggests that the same thing is repeated or recurs under the identical or very similar conditions. The opposite of reliability is a measurement that yields erratic, unstable, or inconsistent results.
- Validity suggests truthfulness and refers to the match between a construct, or the way a researcher conceptualizes the idea in a conceptual definition, and a measure. It refers to how well an idea about reality "fits" with actual reality.
- Reliability is necessary for validity and is easier to achieve than validity. Although reliability is necessary in order to have a valid measure of a concept, it does not guarantee that a measure will be valid. It is not a sufficient condition for validity. A

Wright, 2015-05-27 The study of history in Canada has a history of its own and its development as an academic discipline is a multifaceted one The Professionalization of History in English Canada charts the transition of the study of history from a leisurely pastime to that of a full blown academic career for university trained scholars from the mid nineteenth to the late twentieth century Donald Wright argues that professionalization was not in fact a benign process nor was it inevitable It was deliberate Within two generations historians saw the creation of a professional association the Canadian Historical Association and rise of an academic journal the Canadian Historical Review Professionalization was also gendered In an effort to raise the status of the profession and protect the academic labour market for men male historians made a concerted effort to exclude women from the academy History s professionalization is best understood as a transition from one way of organizing intellectual life to

another What came before professionalization was not necessarily inferior but rather a different perspective of history As well Wright argues convincingly that professionalization inadvertently led to a popular inverse the amateur historian whose work is often more widely received and appreciated by the general public
