Daleka Doroha Michael Podworniak,2023-11-06 Daleka Doroha which was originally published in 1963 in Ukrainian is a memoir of Michael Podworniak who in March 1944 left his beloved Volyn in Ukraine and crossed into Halychyna which during that time was under Polish control He left behind his family because Germany had invaded his village and set it on fire His journey continued to Warsaw and when it became evident that only starvation and other dangers awaited him as the German front continued to advance He elected to go into forced labor into Germany in exchange for food and a place to sleep The book describes the hardships of life in a German labor camp which was eventually attacked by Allied bombers and fighter planes It was only God s grace that preserved his life and let him see the end of the war After the war ended all foreigners were required to settle in refugee camps as the Allied occupiers decided their fate During the years after the war the author together with a group of singers made two tours of the refugee camps in Germany where Slavic people were staying God blessed these trips and hundreds were converted after hearing the songs and the preaching of the Word Every page of the book contains interesting and often tragic stories which the author experienced before he together with his wife and son boarded a ship for Canada **Smoky the Brave** Damien Lewis,2018-12-04 The extraordinary touching true story of Smoky the smallest and arguably bravest dog of World War II In February 1944 as Japanese military advances threatened to overwhelm New Guinea a tiny four pound Yorkshire Terrier was discovered hiding in the island s thick jungles A total mystery as to her origins she was adopted by US Army Air Force Corporal William Bill Wynne an air crewman in a photo reconnaissance squadron becoming an irreplaceable lucky charm for the unit When Smoky saved Wynne s life by barking a warning of an incoming kamikaze attack he nicknamed her the angel from a foxhole Smoky s exploits continued when she jumped for the unit in a specially designed parachute and famously joined the aircrews flying daring sorties in the war torn

skies But her most heroic feat was running a cable through a seventy foot pipe no wider than four inches in places to enable critical communication lines to be run across an airbase which had just been seized from the enemy saving hundreds of ground crew from being exposed to enemy bombing In recognition of her efforts Smoky was awarded eight battle stars Smoky the Brave brings to vivid life the danger and excitement of the many missions of World War II s smallest hero *The Reichsbank Robbery* Colin Roderick Fulton,2013-01-19 Historical fact meets heart stopping action in a World War II thriller full of intrigue and fast paced action sure to appeal to fans of wartime fiction Heritage and History In February 1945 the US Air Force launched the largest daytime bombing offensive against Berlin dropping over 2 250 tons of bombs on the German capital Germany s state bank the Reichsbank received twenty one direct hits leaving the building badly damaged and the priceless contents of its vaults at risk It was just the chance SS accountant Maj Friedrich Schonewille was waiting for Having never believed in the Fuhrer or the Reich Schonewille is a man out for himself Recruiting his own father brother and his secret Jewish wife he concocts a plan to get rich as his homeland falls First they ll have to get the goods Then they ll have to stay ahead of the Nazis Then they ll have to keep from getting captured by either the Allies or Russians And then all they have to do is not turn on each other In this breakneck visually evocative novel Colin Roderick Fulton imagines a scenario that could have easily happened in the dying days of the war *The Historical Novels Review*

P-38 Lightning in Detail & Scale, Part 2 Haagen Klaus,Bert Kinzey,2024-12-24 Lockheed s P 38 Lightning was a unique aircraft even on the drawing board When the prototype XP 38 first flew in January 1939 it was the fastest fighter plane of its day It also possessed the longest range and had the heaviest armament of any fighter Each subsequent version improved upon the preceding one Early versions of the Lightning faced significant operational issues British fuels in the United Kingdom had some incompatibilities with the P 38 s exhaust driven turbo supercharged engines In all theaters the early Lightnings dealt with high speed compressibility issues and chronic engine cooling problems The compressibility and engine cooling issues were overcome with the late Lightning variants first delivered to the U S Army Air Forces in August 1943 These aircraft were the most refined and definitive P 38s They played no small role in the successful conclusion of World War II by the Allies especially in the Pacific Theater In 1998 Detail the P 38J through P 38M variants the F 5B through F 5G photo recon aircraft and the Droop Snoot and Pathfinder special purpose variants The XP 49 and XP 58 which were based on the Lightning are also briefly examined This publication features expanded and revised historical overviews of the later model P 38s along with detailed descriptions of each variant Also included are numerous line drawings created by Lloyd Jones specifically for Detail Scale that point out the specific changes made to each variant as the design was continuously improved The Late Lightning Details chapter features new and expanded content compared to the original 1998 book The chapter is illustrated with scores of detailed and meticulously restored photographs accompanied by captions that explain both important features and subtle differences between P 38 variants While some of these images are original archival material the great majority were chosen

from hundreds of photos taken specifically for this book by the authors and their contributors As is the case in all volumes in the Detail Scale Series a Modelers Section provides comprehensive reviews of the plastic model kits of the featured aircraft Since the original release of this publication the world of P 38 scale modeling has been particularly impacted by the release of the Tamiya 1/48th scale P 38J and the Trumpeter 1/32nd scale P 38L These kits and many more dating back to the 1960s are examined in depth Recommendations are made as to which kits in each scale are best and suggestions for corrections and improvements are presented P 38 Lightning in Detail Scale Part 2 contains 270 high resolution photographs almost 190 of which are in color The details chapter alone has 169 photos including 145 color images Ghosts of the Air Martin Caidin,1995 There are events witnessed in that half way region between heaven and earth that defy all rational explanation For years author and pilot Martin Caidin collected these strange but true stories of aerial hauntings from experienced pilots and astronauts His startling conclusion Something is out there **The Aviation History** Rely Victoria Petrescu,Florian Ion Petrescu,2013 According to Aulus Gellius Archytas the Ancient Greek philosopher mathematician astronomer statesman and strategist was reputed to have designed and built around 400 BC the first artificial self propelled flying device a bird shaped model propelled by a jet of what was probably steam said to have actually flown some 200 metres This machine which its inventor called The Pigeon may have been suspended on a wire or pivot for its flight The 9th century Muslim Berber inventor Abbas Ibn Firnas s glider is considered by John Harding to be the first attempt at heavier than air flight in aviation history In 1010 AD an English monk Eilmer of Malmesbury purportedly piloted a primitive gliding craft from the tower of Malmesbury Abbey Eilmer was said to have flown over 200 yards 180 m before landing breaking both his legs He later remarked that the only reason he did not fly further was because he forgot to give it a tail and he was about to add one when his concerned Abbot forbade him any further experiments Bartolomeu de Gusmão Brazil and Portugal an experimenter with early airship designs In 1709 demonstrated a small airship model before the Portuguese court but never succeeded with a full scale model Pilâtre de Rozier Paris France first trip by a human in a free flying balloon the Montgolfière built by Joseph Michel and Jacques Étienne Montgolfier 9 km covered in 25 minutes on October 15 1783 see Le Globe below for first unmanned flight 2 months earlier Professor Jacques Charles and Les Frères Robert two French brothers Anne Jean and Nicolas Louis variously shared three milestones of pioneering flight Le Globe the first unmanned hydrogen gas balloon flew on 26 August 1783 On 1 December 1783 La Charlière piloted by Jacques Charles and Nicolas Louis Robert made the first manned hydrogen balloon flight In 1951 the Lockheed XFV 1 and the Convair XFY tailsitters were both designed around the Allison YT40 turboprop engine driven *Air Force Magazine* ,2006-07 **Fragment Ardhi - Kubaini Maovu** , Turning The Tide Thomas McKelvey Cleaver,2024-08-15 Packed with personal accounts of the action this is a vivid narrative history of the often overlooked USAAF campaign in North Africa and Sicily in World War II In 1942 the Western Allies needed to take the offensive against the Axis to relieve pressure on the Soviet Union With planning for a cross Channel invasion beset by

logistical and operational difficulties in May 1942 President Roosevelt ordered his military leaders to prepare to support the British in the Mediterranean This led to the first USAAF units arriving in the Middle East in July firstly as reinforcements for the British and later as part of the Operation Torch landings in French Morocco and Algeria in November In little over ten months from the summer of 1942 the USAAF in North Africa grew from nothing to a senior partner providing aircraft and crews the other Allies were unable to match The Axis forces that had controlled almost the entire southern shore of the Mediterranean had been swept from the African continent thanks in no small part to the efforts of the USAAF Using first hand accounts from pilots and other aircrew Tom Cleaver describes how the USAAF units that landed in Morocco were forced to learn their own lessons in combat with veteran Luftwaffe units and how the experience gained in the skies over North Africa and Sicily was invaluable in developing the air forces that would dominate the skies over Europe in the latter years of the war
