John McGahern John Singleton,2023-11-17 John McGahern 1934 2006 believed that fiction could act as a window on the world Such windows however frame our fields of vision alter and shape our perspectives Far from being static the artist s perspective must continually evolve This book provides a literary analysis of John McGahern s artistic and poetic vision his ways of looking examining the shifting focus of this vision how and why it develops what effects such developments have on the work s forms and how these forms evolve at what times and in response to what stimuli This volume demonstrates that such developments mirror an analogous social expansion during the latter half of the twentieth century and argues that McGahern s literary spaces relate to his efforts to realise a more accommodating form to envelop the structureless society While the number of critical studies on McGahern has increased markedly in recent years research still tends to fall into the well established camps of social realism or literary aestheticism This text aims to explore the common ground between the material context and social worlds of each work and the hermeneutics of a traditional literary investigation It traverses such divides through close readings of McGahern s work with attention to the topopoetical production of images of the house the home and the family unit The book ultimately shows how attention to McGahern s literary spaces provides a greater understanding of the aesthetic vision and form of each novel and allows us to understand those aspects relative to the social cultural and political undercurrents of the works individually and collectively Architecture: Form, Space, and Order

Calcatinge,2011 The cultural landscape is what lies around us and has to be understood and learned to deal with The best way to do this is to start from the beginning in order to understand the contemporary iterations of the concept We will not reinvent the concept but we will try to create a new way to see it The operative concept of cultural landscape is part of a reality that is seen and visioned differently by each individual This means that the concept has an almost infinite number of meanings Thus this book presents some of the visions of the surrounding reality through the eyes of an architect **The**

Nature of Order, Book Three: A Vision of A Living World Christopher Alexander,2020-03-30 Christopher Alexander s series of ground breaking books including A Pattern Language and The Timeless Way of Building have pointed to fundamental truths of the way we build revealing what gives life and beauty and true functionality to our buildings and towns Now in The Nature of Order Alexander explores the properties of life itself highlighting a set of well defined structures present in all order and in all life from micro organisms and mountain ranges to good houses and vibrant communities From a practical point of view A Vision of a Living World is the most compelling of the four books Hundreds of photographs and plans of new buildings that have living structure and the processes which gave them life demonstrate for the first time what the concept of living structure can mean in buildings of our time and of the future The really good building The really good

space Places that reach an archetypal level of human experience reaching across centuries across continents across cultures across technology across building materials and climates They connect us to ourselves They connect us to our feelings What is more as we study them we realize that they all share a similar geometry How are they made The practical task of making beauty is the principal subject of this volume Hundreds of examples of buildings and places are shown New forms for large buildings public spaces communities neighborhoods lead to discussions about equally important small scale of detail and ornament and colour Many of the examples are built by Alexander and his colleagues other buildings explored take us around the world and through time With these examples lay people architects builders artists and students are able to make this new framework real for themselves understand how it works and understand its significance The book is a feast for the eyes and mind and heart Places created by living process Book 2 have living structure Book 1 and they connect us to our essence as people Book 4 The seven hundred pictures of Alexander s buildings and works of art shown in this book demonstrate in detail what he means Taken as a whole the four books create a sweeping new conception of the nature of things which is both objective and structural hence part of science and also personal in that it shows how and why things have the power to touch the human heart A step has been taken through which these two domains the domain of geometrical structure and the feeling it creates kept separate during four centuries of scientific thought from 1600 to 2000 have finally been united The Nature of Order constitutes the backbone of Building Beauty Ecologic Design Construction Process an initiative aimed at radically reforming architecture education with the emphasis of making as a way to access a transformative vision of the world The 15 fundamental properties of life guide our work and have given us much more than a set of solutions The Nature of Order has given us the framework in which we can search and build up our own solutions In order to be authentically sustainable buildings and places have to be cared for and loved over generations Beautiful buildings and places are more likely to be loved and they become more beautiful and loved through the attention given to them over time Beauty is therefore not a luxury or an option it includes and transcends technological innovation and is a necessary requirement for a truly sustainable culture Form and Space Vision Yves Le Grand,1967 VISION Abdel-moniem El-Shorbagy,2019-08-25 Hassan Fathy is one of the most important architects of the twentieth century whose works have had a widespread influence on the architecture of the Islamic world and whose ideas have extended to the Western world This book focuses on the complexity of Fathy s architecture and the richness and range of its theoretical intentions as well as assesses his attitudes towards modernism and the International Style The relationship of his philosophy to movements such as Post modernism community architecture and self help building eco architecture and sustainability and tendencies such as neo vernacular and earth building are also examined In addition important issues such as auto colonialism and symbolism in architecture and critical responses to his works and philosophy are discussed However this is an essential reading that explores and reveals the significance of Fathy s approach while placing him within the wider perspective of twentieth century architecture Art
