Methodology of Science Mauricio Suárez, Mauro Dorato, Miklós Rédei, 2010-01-14 These volumes collect a selection of papers presented at the Founding Conference of the European Philosophy of Science Association meeting in Madrid The volumes provide an excellent overview of the state of the art in philosophy of science as practised nowadays in different European countries *Relativism Refuted* H. Siegel, 2013-06-29 Time: A Philosophical Analysis T. Chapman, 2012-12-06 This book is intended as an exposition of a particular theory of time in the sense of an interrelated set of attempted solutions to philosophical problems about it Generally speaking there are two views about time held by philosophers and some scientists interested in philosophical issues The first called the A theory after McTaggart's expression A determinations for the properties of being past present or future is often thought to be closer to our commonsense view of time or to the concept of time presupposed by ordinary language It includes at least the following theses a Logic ought really to include tensed quantifiers for existence on one of its important usages means present existence More generally we can't reduce all tensed

locutions to tenseless ones b The distinction between past present and future is an objective one It is not for example dependent on our consciousness of change some A theorists hold also that the distinction in effect is an absolute one

New Studies in Deontic Logic R. Hilpinen, 2012-12-06 The present volume is a sequel to Deontic Logic Introductory and Systematic Readings D Reidel Publishing Company Dordrecht 1971 its purpose is to offer a view of some of the main directions of research in contemporary deontic logic Most of the articles included in Introductory and Systematic Readings represent what may be called the standard modal approach to deontic logic in which de on tic logic is treated as a branch of modal logic and the normative concepts of obligation permission and prohibition are regarded as analogous to the alethic modalities necessity possibility and impossibility As Simo Knuuttila shows in his contribution to the present volume this approach goes back to late medieval philosophy Several 14th century philosophers observed the analogies between deontic and alethic modalities and discussed the deontic interpretations of various laws of modal logic In contemporary deontic logic the modal approach was revived by G H von Wright s classic paper Deontic Logic 1951 Certain analogies between deontic and alethic modalities are obvious and uncontroversial but the standard approach has often been criticized on the ground that it exaggerates the analogies and tends to ignore those features of normative concepts which distinguish them from other modalities

Scientific Progress Craig Dilworth, 2008-10-13 Kuhn and Feyerabend formulated the problem Dilworth provides the solution In the fourth edition of this highly original book Craig Dilworth answers the questions raised by the incommensurability thesis Logical empiricism cannot account for theory conflict Popperianism cannot account for how one theory is a progression beyond another Dilworth s Perspectivist conception of science covers both bases with a concept of scientific progress based on both rationalism and empiricism

Structures in Science Theo A.F. Kuipers, 2012-12-06 Although there is an abundance of highly specialized monographs learned collections and general introductions to the philosophy of science only a few 25 years synthetic monographs and advanced textbooks have appeared in the last The philosophy of science seems to have lost its self confidence The main reason for such a loss is that the traditional analytical logical empiricist approaches to the philosophy of science had to make a number of concessions especially in response to the work of Popper Kuhn and Lakatos With Structures in Science I intend to present both a synthetic mono graph and an advanced textbook that accommodates and integrates the insight of these philosophers in what I like to call a neo classical approach The resulting monograph elaborates several important topics from one or more perspectives by distinguishing various kinds of research programs and various ways of explaining and reducing laws and concepts and by summarizing an integrated explication presented in From Instrumentalism to Constructive Realism ICR of the notions of confirmation empirical progress and truth approximation

The Laws of Belief Wolfgang Spohn, 2012-03-29 Wolfgang Spohn presents the first full account of the dynamic laws of belief by means of ranking theory This book is his long awaited presentation of ranking theory and its ramifications He motivates and introduces the basic notion of a ranking function which recognises

degrees of belief and at the same time accounts for belief simpliciter He provides a measurement theory for ranking functions accounts for auto epistemology in ranking theoretic terms and explicates the basic notion of a deductive or non deductive reason The rich philosophical applications of Spohn s theory include a new account of lawlikeness an account of ceteris paribus laws a new perspective on dispositions a rich and detailed theory of deterministic causation an understanding of natural modalities as an objectification of epistemic modalities an account of the experiential basis of belief and thus a restructuring of the debate on foundationalism and coherentism and externalism and contextualism and finally a revival of fundamental a priori principles of reason fathoming the basics of empiricism and the relation between reason and truth and concluding in a proof of a weak principle of causality All this is accompanied by thorough comparative discussions on a general level as well as within each topic and in particular with respect to probability theory

A Model-Theoretic Realist Interpretation of Science E.B. Ruttkamp, 2013-03-14 In this book Emma Ruttkamp demonstrates the power of the full blown employment of the model theoretic paradigm in the philosophy of science Within this paradigm she gives an account of sciences as process and product She expounds the received statement and the non statement views of science and shows how the model theoretic approach resolves the spurious tension between these views In this endeavour she also engages the views of a number of contemporary philosophers of science with affinity to model theory This text can be read by specialists working in philosophy of science or formal semantics by logicians working on the structure of theories and by students in philosophy of science this text offers a thorough introduction to non statement accounts of sciences as well as a discussion of the traditional statement account of science

On Science, Inference, Information and Decision-Making A. Szaniawski, 2012-12-06 There are two competing pictures of science One considers science as a system of inferences whereas another looks at science as a system of actions The essays included in this collection offer a view which intends to combine both pictures This compromise is well illustrated by Szaniawski s analysis of statistical inferences It is shown that traditional approaches to the foundations of statistics do not need to be regarded as conflicting with each other Thus statistical rules can be treated as rules of behaviour as well as rules of inference Szaniawski s uniform approach relies on the concept of rationality analyzed from the point of view of decision theory Applications of formal tools to the problem of justice and division of goods shows that the concept of rationality has a wider significance Audience The book will be of interest to philosophers of science logicians ethicists and mathematicians

The Nature of Quantum Paradoxes G. Tarozzi, Alwyn van der Merwe, 2012-12-06 For three days in April of 1985 Cesena Italy was the scene of a national conference which was convened by the Assessorato alla Cultura of this town under the auspices of the Societa Italiana di Logica e Filosofia delle Scienze SILFS in order to celebrate two historical milestones the centenary of the birth of Niels Bohr who was to become the leader of the orthodox or Copenhagen interpretation of quantum theory and the fiftieth anniversary of the publication of the most influential challenge to this interpretation which was contained in the well known paper coauthored by Einstein

Podolsky and Rosen The proceedings of the Cesena meeting which are collected in the present volume are intended to provide an exhaustive and panoramic view of the most recent investigations carried out by Italian scientists and philosophers engaged in research on the foundations of quantum physics What emerges is a critical review of and alternative approaches to the orthodox interpretation of the Copenhagen school *Formal Methods in the Methodology of Empirical Sciences* Marian Przełęcki, Klemens Szaniawski, Grzegorz Malinowski, Ryszard Wójcicki, 1976
