Formal Semantics And Pragmatics For Natural Language Querying:

Formal Semantics and Pragmatics for Natural Language Querying James Clifford, 2004-03-25 Connects the semantics of databases to that of natural language and links them through a common view of the semantics of time **Exploring Time, Tense, and Aspect in Natural Language Database Interfaces** Ion Androutsopoulos, 2002 Drawing upon tense and aspect theories temporal logics and temporal databases this cross discipline book examines relevant issues from the three areas developing a unified theoretical framework that can be used to build natural language interfaces to temporal databases

Natural Language Processing and Information Systems Zoubida Kedad, Nadira Lammari, Elisabeth Métais, Farid Meziane, Yacine Rezgui, 2007-08-15 This book constitutes the refereed proceedings of the 12th International Conference on Applications of Natural Language to Information Systems NLDB 2007 held in Paris France in June 2007 It covers natural language for database query processing email management semantic annotation text clustering ontology engineering natural language for information system design information retrieval systems and natural language processing techniques

Computer and Information Sciences - ISCIS 2004 Cevdet Aykanat, Tugrul Dayar, Ibrahim Korpeoglu, 2004-10-14 This book constitutes the refereed proceedings of the 19th International Symposium on Computer and Information Sciences ISCIS 2004 held in Kemer Antalya Turkey in October 2004 The 99 revised full papers presented together with an invited paper were carefully reviewed and selected from 335 submissions The papers are organized in topical sections on artificial intelligence and machine learning computer graphics and user interfaces computer networks and security computer vision and image processing database systems modeling and performance evaluation natural language processing parallel and distributed computing real time control applications software engineering and programming and theory of computing **Intensional Programming II** Ian T Jolliffe, Manolis Gergatsoulis, Panos Rondogiannis, 2000-03-23 There is a growing interest in programming languages and systems based on nonclassical logics such as temporal logics interval logics modal and intuitionistic logics In fact a whole new programming paradigm called intensional programming has been created with applications in a wide range of areas including parallel programming dataflow computation temporal reasoning scientific computation real time programming temporal and multidimensional databases spreadsheets attribute grammars and Internet programming This volume presents ongoing research as well as future directions of this new and fascinating area of research

Conceptual Modeling - ER 2004 Paolo Atzeni, Wesley Chu, Hongjun Lu, Shuigeng Zhou, Tok Wang Ling, 2005-01-17 On behalf of the Organizing Committee we would like to welcome you to the proceedings of the 23rd International Conference on Conceptual Modeling ER 2004 This conference provided an international forum for technical discussion on conceptual modeling of information systems among researchers developers and users This was the third time that this conference was held in Asia the first time was in Singapore in 1998 and the second time was in Yokohama Japan in 2001 China is the third largest nation with the largest population in the world Shanghai the largest city in China and a great metropolis famous in

Asia and throughout the world is therefore a most appropriate location to host this conference This volume contains papers selected for presentation and includes the two keynote talks by Prof Hector Garcia Molina and Prof Gerhard Weikum and an invited talk by Dr Xiao Ji This volume also contains industrial papers and demo poster papers An additional volume contains papers from 6 workshops The conference also featured three tutorials 1 Web Change Management and Delta Mining Opportunities and Solutions by Sanjay Madria 2 A Survey of Data Quality Issues in Cooperative Information Systems by Carlo Batini and 3 Visual SQL An ER Based Introduction to Database Programming by Bernhard Thalheim *na* , Progress in Advanced Computing and Intelligent Engineering Khalid Saeed, Nabendu Chaki, Bibudhendu Pati, Sambit Bakshi, Durga Prasad Mohapatra, 2017-12-21 The book focuses on both theory and applications in the broad areas of communication technology computer science and information security This two volume book contains the Proceedings of International Conference on Advanced Computing and Intelligent Engineering These volumes bring together academic scientists professors research scholars and students to share and disseminate information on knowledge and scientific research works related to computing networking and informatics to discuss the practical challenges encountered and the solutions adopted The book also promotes translation of basic research into applied investigation and convert applied investigation into practice

Methodological Issues in Applied Social Psychology Fred B. Bryant, John Edwards, R. Scott Tindale, Emil J. Posavac, Linda Heath, Eaaron Henderson-King, Yolanda Suarez-Balcazar, 2013-11-11 Many authors have argued that applying social psychology to the solution of real world problems builds better theories Observers have claimed for example that of human behavior applied social psychology reveals more accurate principles because its data are based on people in real life circumstances Helmreich 1975 Saxe Leventhal 1980 and discloses important gaps in existing theories Fisher 1982 Mayo LaFrance 1980 Undoubtedly many concrete examples can be mustered in support of these claims But it also can be argued that applying social psychology to social issues and problems builds better research methods Special methodological problems arise and new perspectives on old methodological problems emerge when researchers leave the laboratory and tackle social problems in real world settings Along the way we not only improve existing research techniques but also develop new research tools all of which enhance our ability to obtain valid results and thereby to understand and solve socially relevant problems Indeed Campbell and Stanley's 1966 seminal work on validity in research design grew out of the application of social science in field settings In this spirit the principal aim of this volume is to present examples of methodological advances being made as researchers apply social psychology in real life settings *Journal of Management Information Systems* , 1994 Formal Semantics and Pragmatics for Natural Languages Franz Guenther, Siegfried J. Schmidt, 2012-12-06 The essays in this collection are the outgrowth of a workshop held in June 1976 on formal approaches to the semantics and pragmatics of natural languages They document in an astoundingly uniform way the developments in the formal analysis of natural languages since the late sixties The avowed aim of the workshop was in fact to assess the progress

made in the application of formal methods to semantics to confront different approaches to essentially the same problems on the one hand and on the other to show the way in relating semantic and pragmatic explanations of linguistic phenomena. Several of these papers can in fact be regarded as attempts to close the semiotic circle by bringing together the syntactic, semantic and pragmatic properties of certain constructions in an explanatory framework, thereby making it more than obvious that these three components of an integrated linguistic theory cannot be as neatly separated as one would have liked to believe. In other words, not only can we not elaborate a syntactic description of a fragment of a language and then proceed to the semantics, as Montague pointed out already forcefully in 1968, we cannot hope to achieve an adequate integrated syntax and semantics without paying heed to the pragmatic aspects of the constructions involved. The behavior of polarity items, quantifiers like any conditionals or even logical particles like and and or in non-indicative sentences is clear-cut evidence for the need to let each component of the grammar inform the other.

Linguistic Concepts and Methods in CSCW
 John H. Connolly, Lyn Pemberton, 2013-04-17
 Linguistic Concepts and Methods in CSCW is the first book devoted to the innovative new area of research in CSCW. It concentrates on the use of language in context, the area most widely researched in conjunction with CSCW, but also examines grammatical construction, semantics and the significance of the spoken, written and graphic mediums. A variety of other related topics such as sociolinguistics, stylistics, psycholinguistics, computational linguistics and applied linguistics are also covered. This book will be of interest to researchers in CSCW, linguistics and computational linguistics. It will also provide invaluable reading for industrial and commercial researchers who are interested in the implications of such research for the design of marketable systems.

Database and Expert Systems Applications
 Dimitris Karagiannis, 2013-11-11
 The Database and Expert Systems Applications (DEXA) conferences are dedicated to providing an international forum for the presentation of applications in the database and expert systems field, for the exchange of ideas and experiences and for defining requirements for the future systems in these fields. After the very promising DEXA 90 in Vienna, Austria, we hope to have successfully established with this year's DEXA 91 a stage where scientists from diverse fields interested in application-oriented research can present and discuss their work. This year there was a total of more than 250 submitted papers from 28 different countries in all continents. Only 98 of the papers could be accepted. The collection of papers in these proceedings offers a cross-section of the issues facing the area of databases and expert systems, i.e. topics of basic research interest on one hand and questions occurring when developing applications on the other. Major credit for the success of the conference goes to all of our colleagues who submitted papers for consideration and to those who have organized and chaired the panel sessions. Many persons contributed numerous hours to organize this conference. The names of most of them will appear on the following pages. In particular, we wish to thank the Organization Committee Chairmen Johann Gordes, A. Min Tjoa and Roland Wagner who also helped establishing the program. Special thanks also go to Gabriella Wagner and Anke Ruckert. Dimitris Karagiannis
