**How to Prevent and Reverse Heart Diseases** Prem Chhatwani,2013-01-29 3 Chelation Therapy how it works where to seek help Chelation Therapy has been in medical use for decades to treat the patients intoxicated with heavy metals like lead mercury arsenic and many others The procedure involves use of FDA approved chelating agents like ethylene diamine tetra acetic acid EDTA Dimercaptosuccinic acid DMSA is another chelating agent used for the treatment of lead poisoning in children However chelation therapy has not been approved by FDA for anything other than removal of heavy metals Nevertheless Alternative medicine practitioners frequently use chelation therapy for helping patients with Heart disease Hardening of arteries reduces the flow of blood through them thus affecting the much needed nourishment and oxygen to different parts of body However administration of EDTA intravenously has proven time and time again effective against reversing the hardening of arteries and improving the blood flow The treatment is almost painless You simply lie down or sit up hooked up to a I V drip read your book sip on water or simply relax and watch TV The process takes about an hour and a half per sitting depending upon your dosage I am told 3 grams is full dose bag and one can start with half of that half bag You are encouraged to take a drink of water frequently as you would make a trip or two to empty your bladder to flush out the toxins The procedure is conducted and supervised under a qualified medical practitioner Your doctor will normally order blood test for you before and after few treatments to check your kidney function Also your doctor will decide the total number and the frequency of these treatments depending on your situation So basically the chelating agent like EDTA binds with the deposits and heavy metals in your blood and thus slowly flushing them out in

your urine Hence the importance of drinking water

### Introducing Integrative Medicine

According to ACAM integrative medicine combines conventional care with alternative medicine to improve patient care Rather than practice one type of medicine integrative physicians will often combine therapies and treatment approaches to ensure the best results for their patients ACAM physicians do not shun western medicine in fact they practice western care every day These physicians are unique in that they incorporate appropriate and proven alternative treatment options

### Introducing ACAM

American College For Advancement In Medicine ACAM organization located in Irvine California trains and certify all licensed healthcare providers including M D s DO s ND s Phd s and DC s and many more in integrative medicine

### Chelation Therapy

is one example They maintain a list of certified Chelation therapists around the world Contact ACAM in USA at 1 800 532 3688 Monday Friday 8 00 AM 5 00 PM Mountain Time or click on to this link <http://acam.site-ym.com/search/custom.asp?id=1758> Click on Health Resources and select Physician link Then select from Specialties Chelation Therapy from drop down list Select country and hit continue You should have list of doctors certified by ACAM Note In some countries you may not find any doctor Note Some of these treatments may not be covered by your medical insurance

### Important Note

Readers are advised to be careful about using Oral Chelation products Research shows that it may take a very long time months or years in some cases to see any desired benefits However intravenous Chelation Therapy many times is able to achieve these required benefits in days Unfortunately IV therapy could be expensive as it may not be covered by your medical insurance In that case Oral Chelation would be a alternate choice

### The Chelation Process

Before actual treatment is scheduled your doctor should run your necessary lab reports for blood urine and kidney functions Also should check your blood for metal toxicity and go over your medical history including blood pressure and blood sugar This would help your doctor to adjust your EDTA dosage and frequency of treatments Your doctor knows best Just follow his her advice If your primary doctor has covered some of these tests very recently you should take copies of these reports to this doctor if you can However I warn you if you will ask your primary doctor about Chelation therapy most probably he will not approve it You see main stream medical practitioners do not believe in these treatments However when it was their own health involved these same doctors in several cases have opted for Chelation According to National Institute of Health over 800 000 patients opted for Chelation therapy in the United States in a single year Kindly note this process is also advisable for heart patients who have already gone through the bypass as chances are the vein grafts used in bypass do get clogged again within next year or

two The chelation has been successfully used even for patients over age 90 hence age is not a issue factor normally The process itself is painless It is intravenous prick with a needle to start the EDTA drip Though you are tied to IV equipment mostly on wheels you are free to move or use restroom as your arm is properly secured with tape You can also simply sit with pillow supporting your back or lie down You are free to move about talk to other patients undergoing the same treatment read a book or do your office paper work or watch TV or bring your kindle to read books like these It is always a pleasant atmosphere Trust me I have personally taken 12 treatments in year 2000 and now at age 75 I am planning to take few more treatments soon One of the reason I have generated this kindle publication is to let people know that I am talking from my own experience as well As they say it is better to die healthy when you are very old than to die young and unhealthy Normal duration of this treatment is between 1 2 hours You will start seeing some benefits after 4 to 5 treatments Ten to 30 treatments are common depending upon your personal medical issues You can also ask your doctor if you are a good candidate for a lower dosage or half a bag treatments saving you time and may be money Make sure you communicate well with your doctor if Chelation makes you feel dizzy or uncomfortable weak or lethargic due to low blood pressure possibly 99% of the times I believe you will have no side effects EDTA is a mild diuretic and if you have frequent visits to bathroom consider that as a good sign Drink plenty of water to help flush your kidneys Average cost for Chelation treatments Costs vary from clinic to clinic but would run approx around 100 150 per treatment Most of the insurance providers do not cover the cost If you have time and patience and money you can fight the insurance provider and plead your case I believe insurance pays if the chelation is for removal of toxic metals Check with your doctor Almost 12 years ago when I took the treatments my insurance company finally paid half of the cost May be we should approach AARP group here in USA to fight for us They have a strong voice for seniors Let us now examine some actual case histories These case histories are collected from several sources as described below Source Everything You Should Know About Chelation Therapy by Dr Morton Walker and Dr Hitendra Shah This is a great book to read 1 R H is blind in his left eye as a result of a childhood accident unfortunately he goes blind on the other eye as well His doctor told him there is nothing that can be done for him However after 7 Chelation sessions his vision returns and at the same distance he reads better than his doctor 2 Stewart F an assembly line foreman was at the point of losing his gangrenous big toe However 20 Chelation treatments saved his foot 3 Harold W H M D was genetically predisposed to die early from a heart attack like his father and grandfather and many other family members He was advised to give up working as a doctor as the stress involved aggravated his condition After a first early heart attack he received a classic combination of Chelation treatments and improved his diet and lifestyle He returned to full health and was able to resume his duties 4 John H M D Clinical Professor of Surgery has given over 16 000 Chelation infusions to his patients He uses EDTA Chelation on himself At the age of 70 he is still operating 15 hours a day 5 Ophelia 79 had a series of strokes She was no longer able to walk alone After more strokes she was hospitalized for the second time then

Her ankles were swollen and fluid was in the base of her lungs. She could not hear. She was semi comatose slipping in and out of sleep. Then one of her sons arrived with news about Chelation therapy. Her doctor could not promise the family anything as their Mamma was so far gone. She received the therapy and improved steadily. The paralysis left. Later she took 20 more at intervals of several months between series of 5. She is now well and carrying on a productive life. Her hearing has returned and her appetite that she had lost is so good the family says she eats anything put in front of her including Italian wine and sausage.
