Fossil Birds from the Oligocene Jebel Qatrani Formation, Fayum Province, Egypt D. Tab Rasmussen, Storrs L. Olson, Elwyn L. Simons, 1987 Fossils from fluvial deposits of early Oligocene age in Egypt document the earliest known diverse avifauna from Africa comprising at least 13 families and 18 species Included are the oldest fossil records of the Musophagidae turacos Pandionidae ospreys Jacanidae jacanas and Balaenicipitidae shoebilled storks Other families represented are the Accipitridae hawks and eagles Rallidae rails Gruidae cranes Phoenicopteridae flamingos Ardeidae herons Ciconiidae storks and Phalacrocoracidae cormorants A highly distinctive rostrum is described as a new family Xenerodiopidae probably most closely related to herons A humerus lacking the distal end is tentatively referred to the same family Two new genera and three species of large to very large jacanas are described from the distal ends of tarsometatarsi This Oligocene avifauna resembles that of modern tropical African assemblages The habitat preferences of the constituent species of birds indicate a tropical swampy vegetation choked fresh water environment at the time of deposition

Paleogene Fossil Birds Gerald Mayr, 2022-02-12 This second completely revised edition of Paleogene fossil birds gives a comprehensive updated overview of the avian fossil record from a geological period that lasted from the end Cretaceous mass extinction event 66 million years ago to the end of the Oligocene epoch 23 mya Paleogene avifaunas are highly diversified and not only feature unusual archaic groups without close living relatives but also offer unique insights into the evolution and biogeographic history of extant birds The main body of the book constitutes an in depth survey of the known diversity of Paleogene avifaunas The reader is introduced into basic skeletal features of extinct avian taxa with these fossil forms being placed into a phylogenetic context in the light of current hypotheses on the interrelationships of extant birds The geographical and temporal occurrences of the various fossil groups are outlined and their evolutionary significance is discussed Concluding sections inform more general aspects of Paleogene avifaunas such as possible causes of major faunal changes In addition to being a reference work for the early evolution of modern birds from a paleornithological perspective the present work also enables researchers in other fields of vertebrate paleontology to gain an improved understanding of Paleogene ecosystems Numerous color photos of representative specimens furthermore make the new edition attractive to a wider audience interested in the avian fossil record
