paleontologist's journey. He details the best places to look for fossils, the art of how to find them and how to classify the major types. Prothero provides expert wisdom about typical fossils that an average person can hope to collect and how to hunt fossils responsibly and ethically. He also explores the lessons that both common and rarer discoveries offer about paleontology and its history as well as what fossils can tell us about past climates and present climate change. Captivating illustrations by the paleoartist Mary Persis Williams bring to life hundreds of important specimens. Prehistoric Journeys April Rhodes James, 2012-04-25. Dinosaurs, indelible real-life characters and a dramatic plunge down a judicial rabbit hole that occurs more often than imaginable. The book has been described as soul-searching, a roller coaster ride, and movie material; it has in fact now been adapted as a script. It charts the unique journey of a small family, the unconditional support of community, both local and national, and lessons learned as the result of amazing entrepreneurial experiences. All in all, it tells a compelling true story of survival despite curious challenges. This book is a Thank You and a message of possibility to anyone who promotes inspiration through honest intent.
