Fossils The Evolution And Extinction Of Species:

Fossils Niles Eldredge, 1991 In this fascinating exploration of the fossil record Niles Eldredge overturns the traditional view of evolution as a slow and inevitable process and he shows that lifeforms generally do not evolve to any significant degree until after massive extinction This rhythm of life a concept developed by Eldredge and Stephen Jay Gould known as punctuated equilibria in evolution is revealed by the fossilized remains of the earth's ancient flora and fauna Distinguished photographer Murray Alcosser augments Eldredge's text with 160 luminous color plates illustrating more than 250 different fossil specimens In this new paperback edition *Fossils* becomes an accessible text with appeal to a broad audience including natural history readers and students [The Evolution and Extinction of the Dinosaurs](#) David E. Fastovsky, David B.

Weishampel, 2005-02-07 This 2005 edition of *The Evolution and Extinction of the Dinosaurs* is a unique comprehensive treatment of this fascinating group of organisms It is a detailed survey of dinosaur origins their diversity and their eventual extinction The book can easily be used as a teaching textbook for a class but it is also written as a series of readable entertaining essays covering important and timely topics appealing to non specialists and all dinosaur enthusiasts birds as living dinosaurs the new feathered dinosaurs from China warm bloodedness Along the way the reader learns about dinosaur functional morphology physiology and systematics using cladistic methodology in short how professional paleontologists and dinosaur experts go about their work and why they find it so rewarding The book is spectacularly illustrated by John Sibbick a world famous illustrator of dinosaurs commissioned exclusively for this book [Extinction and Evolution](#) Niles
