Foucault And Latin America Appropriations And Deployments Of Discursive Analysis:

Foucault and Latin America Benigno Trigo, 2002 *Foucault and Latin America* Benigno Trigo, 2013-02-01 Foucault and Latin America is the first volume to trace the influence of Foucault's theories on power discourse government subjectivity and sexuality in Latin American thought *Balinese Discourses on Music and Modernization* Brita Heimark Renee, 2013-08-21 While many Western scholars have discussed the technical aspects of Balinese music or the traditional contexts for performance little has been written in Western languages about Balinese discourses on their music This dissertation seeks to understand the experience of music in Bali according to Balinese voices through an analysis of oral and written dialogues on music mainly by musicians and dalangs shadow play puppeteers from the village of Sukawati scholars teachers administrators and students from the Indonesian College of the Arts STSI in the City of Denpasar The study examines the influence of modernization on the traditional arts and their role in society A concentration on Balinese discourses enables individual performers and scholars to represent themselves to a greater extent than previously seen in ethnomusicological scholarship making this study more of a critical discussion among equals than a Western interpretation of others This approach permits a rare view into contemporary Balinese conceptions and practices of music **Dangerous Coagulations?** Bernadette M. Baker, Katharina Elisabeth Heyning, 2004 This book brings together an outstanding group of scholars who draw on the works of Michel Foucault Eclectic in topic and method the essays illustrate Foucault's usefulness Dangerous Coagulations constitutes a departure from the more formulaic Foucault work that has emerged and highlights new possibilities for undertaking problematizing approaches to educational research **The Palgrave Handbook of the History of Human Sciences** David McCallum, 2022-08-27 The Palgrave Handbook of the History of Human Sciences offers a uniquely comprehensive and global overview of the evolution of ideas concepts and policies within the human sciences Drawn from histories of the social and psychological sciences anthropology the history and philosophy of science and the history of ideas this collection analyses the health and welfare of populations evidence of the changing nature of our local communities cities societies or global movements and studies the way our humanness or human nature undergoes shifts because of broader technological shifts or patterns of living This Handbook serves as an authoritative reference to a vast source of representative scholarly work in interdisciplinary fields a means of understanding patterns of social change and the conduct of institutions as well as the histories of these ways of knowing probe the contexts circumstances and conditions which underpin continuity and change in the way we count analyse and understand ourselves in our different social worlds It reflects a critical scholarly interest in both traditional and emerging concerns on the relations between the biological and social sciences and between these and changes and continuities in societies and conducts as 21st century research moves into new intellectual and geographic territories more diverse fields and global problematics *Excess Baggage* Jonathan Pitcher, 2009 *Excess Baggage* investigates how we read modern theory how we apprehend Latin American culture through

that theory why this approach is flawed and how our reading could be different It is a study of modernity's supersessive paradoxical attempts to outthink thought This methodology never autochthonous to any context despite its claims is traced through one of its more extreme moments the Enlightenment and then through the work of Freud Nietzsche and Marx and their more recent postmodern acolytes to the Reformation Although these thinkers are self-differentiating the divisions are artificial for each even in present formats references a preternatural origin that is subsequently projected into the future disavowing history's ability to perceive itself as anything other than revolutionary This book traces post 1960 Latin Americanism through readings by its critics cum theorists as dictatorially assigning a univocal reading to a continent's cultural production regardless of how ethical the theory may itself seem Though predominantly a metacritical work a reading of philosophy and its Latin Americanist manifestations there is also comparative reading of European North American and Latin American literature Meaning has always existed in all such contexts but is either eradicated or misread by the premises of our critical equipment In fact or fiction *Excess Baggage* appeals for an admission of contextualized mnemotechny inevitable in thought regardless and the real danger in the present milieu

Bibliographic Index, 2007 **Literary Onomastics** Dorothy Dodge Robbins, 2023-10-03 *Literary Onomastics* surveys different methods of studying names in works of literature and offers representative works of literary onomastic analysis Included in this volume are qualitative studies that examine select names as well as quantitative studies that examine entire systems of names These studies of literary names straddle centuries cross genres and defy simple categorization Leading and emerging scholars in this field provide insight into the namecraft of William Shakespeare Philip Sidney John Donne Julia Alvarez Ursula K Le Guin Zadie Smith George R R Martin and Britain's Rebel Writers The theories and methods they employ are associated with cultural linguistic rhetorical feminist and ethnic studies Collectively these scholars demonstrate the many approaches available to the study of names and naming practices in literary works Additionally they consider how names function in a variety of genres and mediums including poetry novels science fiction and fantasy

Space, Knowledge and Power Professor Stuart Elden, Dr Jeremy W Crampton, 2012-11-28 The first to engage Foucault's geographies in detail from a wide range of perspectives this book is framed around his discussions with the journal *Hodoté* in the mid 1970s The contributors including a number of key figures such as David Harvey Chris Philo Sara Mills Nigel Thrift John Agnew Thomas Flynn and Matthew Hannah discuss just what they find valuable and frustrating about Foucault's geographies This is a book which will both surprise and challenge

Medicine and Nation Building in the Americas, 1890-1940 Jose Amador, 2015-02-28 As medical science progressed through the nineteenth century the United States was at the forefront of public health initiatives across the Americas Dreadful sanitary conditions were relieved lives were saved and health care developed into a formidable institution throughout Latin America as doctors and bureaucrats from the United States flexed their scientific muscle This wasn't a purely altruistic enterprise however as Jose Amador reveals in *Medicine and Nation Building in the Americas 1890-1940*

Rather these efforts almost served as a precursor to modern American interventionism For places like Cuba Puerto Rico and Brazil these initiatives were especially invasive Drawing on sources in Cuba Puerto Rico Brazil and the United States Amador shows that initiatives launched in colonial settings laid the foundation for the rise of public health programs in the hemisphere and transformed debates about the formation of national culture Writers rethought theories of environmental and racial danger while Cuban reformers invoked the yellow fever campaign to exclude nonwhite immigrants Puerto Rican peasants flooded hookworm treatment stations and Brazilian sanitarians embraced regionalist and imperialist ideologies Together these groups illustrated that public health campaigns developed in the shadow of empire propelled new conflicts and conversations about achieving modernity and progress in the tropics *The Allure of Labor* Paulo Drinot, 2011-04-25 Reveals how Perus early twentieth century labor reforms excluded the majority of the countrys laborers They were indigenous and the nations elites saw indigeneity as incommensurable with work modernity and industrial progress

America's Shadow William V. Spanos, 2000 A study of imperialism that stretches from ancient Rome to the post Cold War World this provocative work boldly revises our assumptions about the genealogy of the West Rather than locating its source in classical Greece William V Spanos argues we should look to ancient Rome which first articulated the ideas that would become fundamental to the West s imperial project These founding ideas he claims have informed the American national identity and its foreign policy from its origins The Vietnam War is at the center of this book In the contradiction between the free world logic employed to justify U S intervention in Vietnam and the genocidal practices used to realize that logic Spanos finds the culmination of an imperialistic discourse reaching back to the colonizing rationale of the Roman Empire Spanos identifies the language of expansion in the white metaphors in Western philosophical discourse since the colonization of Greek thought by the Romans He shows how these metaphors and their role in metaphysical discourse have long been complicit in the violence of imperialism
