Measuring and Controlling Sustainability attempts to provide such an assessment in 17 chapters organized into four main topic sections a organizations and social value creation concepts responsibilities and barriers b accounting measurement performance and diffusion of social value c practical and managerial insights from real life cases and d choices incentives guidance and ethics This research anthology provides a comprehensive collection of cutting edge theories and research that will further the development and advancement of measuring and controlling sustainable efforts in theory and managerial practice Australian national bibliography ,1961 APAIS, Australian Public Affairs Information Service ,1993 **APAIS 1991: Australian public affairs information service** , Independent Offices Appropriations United States.
