Foundations And Changing Practices In Extension:

Foundations and Changing Practices in Extension Donald J. Blackburn, 1989 **Sustainable Goat Production in the Changing Climate** Veerasamy Sejian, M.V. Silpa, D. Thirunavukkarasu, 2025-06-01

Sustainable Goat Production in the Changing Climate aims to make the global scientific and academic communities aware of the potential of goats as a livestock of the future. When compared to more popular meat sources like cattle and swine, goats have a lower carbon footprint and can aid in mitigating the effects of climate change as well as improving food production, poverty, and equity issues. This book will discuss the implications of climate change on goat production systems and emphasize the physiological potential of goats to adapt to erratically changing climatic conditions. Furthermore, the book includes chapters on strategies to mitigate the effects of climate change on goat production and highlights novel technologies used to assess the impact of heat stress in goats. Technology transfer strategies and policy-related issues will also be covered. Written and edited by an international team of experts on goats, livestock, animal agriculture, and climate-smart food systems, **Sustainable Goat Production in the Changing Climate** will appeal to a broad audience from researchers to livestock specialists, veterinarians, and policymakers in food and sustainability. It explores the potential of goats as future livestock species for animal origin foods, summarizes the impact of climate change on goats and goat production systems, proposes technological interventions ranging from management to biotechnological solutions, identifies gaps in technology transfer activities and policymaking, and provides solutions.

Developing Human Capital in American Manufacturing Elaine B. Crutchfield, 2014-01-14

This qualitative case study of an American manufacturing organization describes the barriers which limited its ability to receive maximum return on its investment for training and development resources invested in their human assets. Changing global economics have forced organizations to the realization that their competitive advantage lies in developing and tapping into their human assets or human capital. Professionals, managers, human resource development specialists, and academicians alike have developed theories supporting the systematic development of human assets to improve performance and achieve organizational business goals. This book examines how one organization, typically described as a High Performance Organization, attempted to put theory into application. Specifically, the book examines the concepts of needs assessment, systems theory, organization development, human capital theory, and performance improvement. The results find a systemic failure in human asset development initiatives rooted in the failure to view the organization as a whole, systematically assess performance, and involve the entire organization in designing and implementing a holistic approach to improving performance and developing the organization's human assets. Specifically, inefficient organizational structure and lack of clearly defined business goals were significant barriers to the systematic development of their human assets.
