Methodological Approaches for Workplace Research and Management Chiara Tagliaro, Marko

Orel, Ying Hua, 2023-09-14 This book explores a wide range of methodological approaches to examining various forms of workplace physical environments. It focuses on pressing questions regarding the relationship between the spatial component of the workplace including its progressive hybridisation with other physical and virtual places and its users be they public organisations private companies or start up businesses and solopreneurs. International contributors address a range of methods that are applicable both in research and practice to confront the most cutting edge workplace related issues. The assumption is that work has been changing thanks to the virtualisation of many activities and that homeworking and hybrid working modes are expected to increase significantly after Covid 19. Thus spaces hosting work need to adapt accordingly. Researchers and practitioners have been struggling to determine how much space will be needed by companies what kind of space will better host different work activities which workers are more suited for working from home and which instead are more productive if they have an office based working arrangement. The necessary evolution of the office should follow evidence based decisions on the abovementioned matters which are only possible through rigorous investigations. This volume aims to support these investigations which call for inventive applications of qualitative and quantitative methodologies. By doing so the book will encourage solid practices and thorough research agendas in workplace design management and use. Contributions come from different disciplines including facilities management real estate management psychology design architecture sociology and organisation studies. Chapters highlight the importance of appropriate methodologies borrowed from different fields in addressing contemporary questions and developments in workplaces. By analysing the challenges and opportunities for conducting rigorous research in different workplace settings this book will be critical reading for both academics and students as well as for decision makers and professionals who deal with workplace design and management. A Short History of the Future W. Warren Wagar, 1999-08 Narrated by a far future historian Peter Jensen leaves an account of the world from the 1990s to the opening of the 23rd century as a gift to his granddaughter. A combination of fiction and scholarship this third edition of Wagar's speculative history of the future alternates between descriptions of world events and intimate glimpses of this historian's family into the first centuries of the new millennium.

Educational Futures Ivana Milojevic, 2005-05-19 This book provides an overview and analysis of current tensions debates and key issues within OECD nations particularly Australia the USA Canada and the UK with regard to where education is and should be going. Using a broad historical analysis it investigates ideas and visions about the future that are increasingly evoked to support arguments about the imminent demise of the dominant modern educational model. Focusing neither on prediction nor prescription this text suggests the goal is an analysis of the ways in which the notion of the future circulates in contemporary discourse. Five specific discourses are explored globalisation new information and communications technologies feminist indigenous and

spiritual The book demonstrates the connections between particular approaches to time visions of the future and educational visions and practices The author asserts that every approach to educational change is inherently based on an underlying image of the future Culture and International History Jessica C. E. Gienow-Hecht, Frank Schumacher, 2004-01-01

Combining the perspectives of 18 international scholars from Europe and the United States with a critical discussion of the role of culture in international relations this volume introduces recent trends in the study of Culture and International History It systematically explores the cultural dimension of international history mapping existing approaches and conceptual lenses for the study of cultural factors and thus hopes to sharpen the awareness for the cultural approach to international history among both American and non American scholars The first part provides a methodological introduction explores the cultural underpinnings of foreign policy and the role of culture in international affairs by reviewing the historiography and examining the meaning of the word culture in the context of foreign relations In the second part contributors analyze culture as a tool of foreign policy They demonstrate how culture was instrumentalized for diplomatic goals and purposes in different historical periods and world regions The essays in the third part expand the state centered view and retrace informal cultural relations among nations and peoples This exploration of non state cultural interaction focuses on the role of science art religion and tourism The fourth part collects the findings and arguments of part one two and three to define a roadmap for further scholarly inquiry A group of commentators survey the preceding essays place them into a larger research context and address the question Where do we go from here The last and fifth part presents a selection of primary sources along with individual comments highlighting a new genre of resources scholars interested in culture and international relations can consult **Transforming the future** Miller, Riel, 2018-07-09 People are using the future to search for better ways to

achieve sustainability inclusiveness prosperity well being and peace In addition the way the future is understood and used is changing in almost all domains from social science to daily life This book presents the results of significant research undertaken by UNESCO with a number of partners to detect and define the theory and practice of anticipation around the world today It uses the concept of Futures Literacy as a tool to define the understanding of anticipatory systems and processes also known as the Discipline of Anticipation This innovative title explores new topics such as Futures Literacy and the Discipline of Anticipation the evidence collected from over 30 Futures Literacy Laboratories and presented in 14 full case studies the need and opportunity for significant innovation in human decision making systems This book will be of great interest to scholars researchers policy makers and students as well as activists working on sustainability issues and innovation future studies and anticipation studies **Developments in Higher Education: National Strategies and**

Global Perspectives (Penerbit USM) Shukran Abd. Rahman, 2013 Developments in Higher Education National Strategies and Global Perspectives brings together a collection of meticulously researched articles providing insights into the changing nature of higher education through internationalisation and its consequent impact on the futures of higher education These

articles are intended for academics policymakers and researchers in higher education to enhance their understanding leading ultimately to sustainable human capital development The book seeks to present a comprehensive discussion on internationalisation as a variable in higher education and hence derive alternative futures of higher education systems It also suggests a different perspective regarding the appraisal of higher learning institutions and the subsequent influence on policy recommendations Many of these important aspects are gathered together under topics such as Internationalising Higher Education A Malaysian Perspective Rankings and Policy Contradictions Is It Time to Move Beyond Rankings and Campuses 2060 Four Futures of Higher Education in Four Alternative Futures of Society This book is recommended to anyone seeking to further enhance their knowledge in higher education especially in regards to policymaking

Transdisciplinary Sustainability Studies Katri Huutoniemi, Petri Tapio, 2014-06-05 Arising out of human environment interaction sustainability problems resist disciplinary categories and simple solutions This book offers a fresh approach to practical and methodological concerns in transdisciplinary environmental and sustainability studies It illustrates methodological means by which researchers professionals and decision makers can address complex environmental issues While scientific reasoning is mostly guided by disciplinary traditions transdisciplinary research rests on other cognitive strategies As it does not have a ready made stance toward problems figuring out what the puzzle is and what the answer might look like are crucial aspects of transdisciplinary inquiry Through examples from environment and sustainability studies the volume discusses heuristic schemes that can give structure to this exploration By focusing on heuristics rather than on methods concepts or general guidelines the book argues that a problem centered approach often resists the rigor of methodology Learning from experience provides valuable rules of thumb checklists and other cognitive schemes for making ill defined problems more tangible Written by an international team of authors the chapters draw examples from dealing with issues in environmental protection transport and climate policy ecosystem services and disservices environmental beliefs and attitudes and more Together with more theoretically oriented chapters they show that the intellectual processes needed to tackle complex sustainability problems are as much about heuristic problem solving as they are about methodical work

Future Intelligence Shlomo Shoham, 2011-02-01 As the pace of change has grown more rapid an emphasis on survival and short term thinking has increasingly pervaded the realm of leadership and political decision making In a bold response to this problem the Israeli Knesset established the Commission for Future Generations and appointed the former judge Shlomo Shoham as head of the Commission in 2001 Shoham was tasked with the difficult work of representing the needs interests and rights of those not yet born Drawing upon his legal and political experience Shoham today demonstrates how we can overcome the pitfalls of short term thinking by developing our future intelligence This kind of intelligence he argues is the key to infusing public administration with visionary thinking and creative foresight Endorsements From Shimon Peres President of the State of Israel In his book Future Intelligence Judge ret Shlomo Shoham provides a practical model on how

to enhance sustainability in government and policy defining bodies to serve the future of mankind and nature in a changing planet Future Intelligence turns to the decision makers of today to break away from the conservative outlook and adopt a long term vision for posterity From Horst Köhler former President of the Federal Republic of Germany Shlomo Shoham presented the work of the Commission for Future Generations at the First Forum on Demographic Change of the former German President in 2005 For President Horst Köhler and other participants Shoham's conceptual contributions proved immensely valuable in helping lay out new means of dealing with the fundamental challenges facing all countries including Germany

The Future of Peace and Justice in the Global Village Thomas R. McFaul, 2006-09-30 Many authors have written on the effect technology economics and politics have on globalization but few have addressed the potential impact of world religions on the future direction of globalization McFaul's fascinating book explores what others have not the part the world's major religions Hinduism Buddhism Jainism Zoroastrianism Judaism Christianity and Islam will play in bringing either greater peace and justice or hatred and hostility to the global village Will these religions which exert the greatest amount of influence worldwide be a force for good or ill in the emerging global village of the 21st century This book answers that question and more Covering the religions to which the majority of world's population adheres it offers insight into the commonalities differences and potential for coming together to create peace to be found among the major faiths The world's seven major religions are covered and topics such as sexuality ethics violence and the tension between secular and sacred arenas are discussed for each McFaul argues that if the leaders and laity of these religions are able to find common ground efforts toward peace and justice in the global village can be more effective and lasting If they accentuate their differences he suggests they will only produce more hatred and hostility

Cultural Heritage and the Future Cornelius Holtorf, Anders Höglberg, 2020-12-10 Cultural Heritage and the Future brings together an international group of scholars and experts to consider the relationship between cultural heritage and the future Drawing on case studies from around the world the contributing authors insist that cultural heritage and the future are intimately linked and that the development of futures thinking should be a priority for academics students and those working in the wider professional heritage sector Until recently the future has never attracted substantial research and debate within heritage studies and heritage management and this book addresses this gap by offering a balance of theoretical and empirical content that will stimulate multidisciplinary debate in the burgeoning field of critical heritage studies Cultural Heritage and the Future questions the role of heritage in future making and will be of great relevance to academics and students working in the fields of museum and heritage studies archaeology anthropology architecture conservation studies sociology history and geography Those working in the heritage professions will also find much to interest them within the pages of this book
