**Foundations of Hegel's Social Theory** Frederick NEUHOUSER, Frederick Neuhouser, 2009-06-30 The author's purpose is to understand the philosophical foundations of Hegel's social theory by articulating the normative standards at work in his claim that the three central social institutions of the modern era the nuclear family civil society and the constitutional state are rational or good Its central question is what for Hegel makes a rational social order rational In addressing this question the book aspires to be faithful to Hegel's texts and to articulate a compelling theory of rational social institutions its aim is not only to interpret Hegel correctly but also to demonstrate the richness and power that his vision of the rational social order possesses Frederick Neuhouser's task is to understand the conceptions of freedom on which Hegel's theory rests and to show how they ground his arguments in defense of the modern

social world In doing so the author focuses on Hegel's most important and least understood contribution to social philosophy the idea of social freedom Neuhauser's strategy for making sense of social freedom is to show its affinities with Rousseau's conception of the general will The main idea that Hegel appropriates from Rousseau is that rational social institutions must satisfy two conditions first they must furnish the basic social preconditions of their members freedom and second all social members must be able subjectively to affirm their freedom conditioning institutions as good and thus to regard the principles that govern their social participation as coming from their own wills

practical purposes In this golden age of foundations an astonishing number of new ideas frameworks and results spawned by the quantum information theory experience have revolutionized the way we think about the subject with a new research community emerging worldwide including scientists from computer science and mathematics

**Foundation and outline of a historical theory of society** Balogh István,2024-12-16 After his first great deed of creating history man now seems to be working on another great deed of equal importance but perhaps the last to destroy himself by eliminating the conditions of his existence Aware of the consequences he continues to destroy his living environment to wage war against each other to pursue his self destructive passions In the face of the clamorous contradiction expressed in the characterisation they know but do not do the question arises with compelling force what are the driving forces and where do they arise which determine the actions of individuals and groups of people as well as the functioning of the majority of social institutions with such force that they ultimately override the motives the instinct and the discernment of life as well as the conscious sense of danger which are essential to the survival of human life Is there any chance of taming this vexing contradiction

**Slave Culture : Nationalist Theory and the Foundations of Black America** Sterling Stuckey Professor of History Northwestern University,1987-04-23 How were blacks in American slavery formed out of a multiplicity of African ethnic peoples into a single people In this major study of Afro American culture Sterling Stuckey a leading thinker on black nationalism for the past twenty years explains how different African peoples interacted during the nineteenth century to achieve a common culture He finds that at the time of emancipation slaves were still overwhelmingly African in culture a conclusion with profound implications for theories of black liberation and for the future of race relations in America By examining anthropological evidence about Central and West African cultural traditions Bakongo Ibo Dahomean Mendi and others and exploring the folklore of the American slave Stuckey has arrived at an important new cross cultural analysis of the Pan African impulse among slaves that contributed to the formation of a black ethos He establishes for example the centrality of an ancient African ritual the Ring Shout or Circle Dance to the black American religious and artistic experience Black nationalist theories the author points out are those most in tune with the implication of an African presence in America during and since slavery Casting a fresh new light on these ideas Stuckey provides us with fascinating profiles of such nineteenth century figures as David Walker Henry Highland Garnet and Frederick Douglas He then considers in detail the lives and careers of W E B Dubois and Paul Robeson in this century describing their ambition that blacks in American society while struggling to end racism take on roles that truly reflected their African heritage These concepts of black liberation Stuckey suggests are far more relevant to the intrinsic values of black people than integrationist thought on race relations But in a final revelation he concludes that with the exception of Paul Robeson the ironic tendency of black nationalists has been to underestimate the depths of African culture

in black Americans and the sophistication of the slave community they arose from
