Revising Reality Chris Gavaler, Nat Goldberg, 2024-05-30 The past is fixed what happened happened But our descriptions of that past are in constant flux creating branching networks of contradictory accounts more complex than any fictional franchise Revising Reality uses pop culture and media concepts of revision to untangle our real world histories with startlingly revelatory results Novels comics films and TV shows can continue previous events sequels reinterpret events retcons or restart events remakes and audiences can ignore any of these revisions rejects Drawing on these four kinds of revision derived from franchises such as Star Wars Harry Potter The Lord of the Rings and Marvel comics Chris Gavaler and Nat Goldberg make sense of the stories we tell about a remarkable range of actual events including scientific discoveries Supreme Court cases historical moments folk heroes and even trans names and human memory They ask What happened to the original green scaled dinosaurs after scientists decided dinosaurs had multi colored feathers When overturning Roe v Wade did the Supreme Court end the right to abortion or did the Court claim that the right of the previous half century never existed Since Ronald Reagan increased taxes expanded government and championed amnesty for undocumented immigrants who is the Ronald Reagan whom today's conservatives champion as a model president When a trans person comes out as trans has their gender changed or has their gender remained consistent Are our memories accounts of real events or some kind or kinds of revision And if our memories are in flux what does that say about our memory dependent identities Revising Reality answers these and so many more questions providing surprising new tools for explaining the world and our relationship to it
