## Foundations Of Historical Knowledge:

**Foundations of Historical Knowledge** Morton Gabriel White, 1982      Foundations of Historical Knowledge Morton White, 1965      **Philosophical Foundations of Historical Knowledge** Murray G. Murphey, 1944      Philosophical Foundations of Historical Knowledge Murray G. Murphey, 1994-01-01      **Foundations of Knowledge** E. P. Papanoutsos, 1968-01-01

The inquiry into the foundations of knowledge is a systematic inquiry into the problem of truth. This problem constitutes one of the three main concerns of philosophical analysis, the others being the problem of beauty and the problem of goodness. Thus Evangelos P. Papanoutsos, Greece's leading contemporary philosopher, introduces this third book of his Trilogy of the Mind. The first two volumes covered aesthetics and ethics; this one is a major work in epistemology. Combining rigorous analysis with thoroughgoing scholarship, displaying an intimate acquaintance with the physical and humanistic sciences and drawing on a deep understanding of philosophical method and the history of philosophy, Professor Papanoutsos is held in high esteem by his European colleagues. This translation of his masterpiece will enhance his reputation and influence among readers of English. The themes of *The Foundation of Knowledge* range over the topics that have been continually challenging to the modern era of philosophers: being and consciousness, experience and reason, common sense and science, and the domains of knowledge, including the nature of philosophical knowledge. Special attention is paid to the analysis of theoretical consciousness, the problems of categorical thinking, the theory of judgment, mathematics and logic, and the limits of historical understanding.

*Historical Foundations of Education* Theodore Michael Christou, 2023-03-23

This volume considers history as a foundational discipline in education. It shows how history is a means for exploring what it means to be human by considering those stories, sources, forces, and contexts that shape the way we construct narratives. History is more than content; no matter what we might recall from our experiences in schools. The volume shows how studying history is one means of uncovering why institutions, beliefs, policies, and practices are as they are. Educational structures are like all things mutable. History empowers the individual to be an actor in this process of change and to act judiciously.

About the Educational Foundations series: Education as an academic field, taught at universities around the world, emerged from a range of older foundational disciplines. The Educational Foundations series comprises six volumes, each covering one of the foundational disciplines of philosophy, history, sociology, policy studies, economics, and law. This is the first reference work to provide an authoritative and up-to-date account of all six disciplines, showing how each field's ideas, methods, theories, and approaches can contribute to research and practice in education today. The six volumes cover the same set of key topics within education, which also form the chapter titles: Mapping the Field, Purposes of Education, Curriculum, Schools and Education Systems, Learning and Human Development, Teaching and Teacher Education, Assessment and Evaluation. This structure allows readers to study the volumes in isolation by discipline or laterally by topic and facilitates a comparative thematic reading of chapters across the volumes. Throughout the series, attention is paid to how the disciplines
