**Social Exchange in Developing Relationships** Robert L. Burgess, Ted L. Huston, 2013-09-11. Social Exchange in Developing Relationships is a collection of papers that deals with the systematic study of the development of relationships. The papers discuss several theoretical perspectives such as evolutionary theory, personality theory, cognitive developmental theory, equity theory, role theory, and attribution theory. One paper discusses romantic relationships, the evolution of first acquaintance to close or intimate commitment. Another paper presents the hypothesis that the factors causing a relationship to begin will also probably steer intermediate cognitive processes eventually influencing the nature of the relationship. Commitment requires specific concepts such as input levels contributed to the relationship, duration of these inputs, and their consistency of occurrence. The equity theory suggests that equity principles determine the selection of one's mate and how they, the partners, will get along in the future. One paper analyzes the dynamic theories of social relationships and the resulting research strategies that the conceptualization of a parameter of a social relationship can affect the choice of data collection techniques and other matters. Sociologists, psychologists, historians, students, and academicians doing sociological research can benefit greatly from this collection.

**The Emerging Field of Personal Relationships** Robin Gilmour, Steve Duck, 2021-10-07. Originally published in 1986, this book is a result of the first International Conference on Personal Relationships held in 1982. The conference itself was a significant event in publicly bringing together major figures whose work was starting to define the new area of personal relationships. The chapters are arranged to follow the structure of the conference program with major opening and closing discussions covering the whole field and the rest of the chapters grouped under the headings of Depiction and Taxonomy of Relationships, Development and Growth of Relationships, and Disorder and Repair of Relationships. The result is by no means a comprehensive treatment of the field, but the editors hoped that the book highlighted significant issues in personal relationship research as well as some excellent examples of the ways in which issues and problems were being tackled at the time. They also hoped that it would have an effect on the future development of the field of personal relationships by indicating its value and potential.
