neoliberal finance capitalism Some of the major aspects considered by the essays include the decentering of production and development of global value systems crisis of social reproduction and the rising informalisation of work Equity, Evaluation, and International Cooperation Gabriella Y. Carolini,2022 Equity Evaluation and International Cooperation provides a grounded analysis of the production of international development cooperation in urban infrastructure projects with a critical eye toward whether South South cooperation provides any particular value as a form of development partnership The Aid Lab Naomi Hossain,2017 From an unpromising start as the basket case to present day plaudits for its human development achievements Bangladesh plays an ideological role in the contemporary world order offering proof that the neo liberal development model works under the most testing conditions How were such rapid gains possible in a context of chronically weak governance The Aid Lab subjects this so called Bangladesh paradox to close scrutiny evaluating public policies and their outcomes for poverty and development since Bangladesh s independence in 1971 Countering received wisdom that its gains owe to an early shift to market oriented economic reform it argues that a binding political settlement a social contract to protect against the crises of subsistence and survival united the elite the masses and their aid donors in the wake of the devastating famine of 1974 This laid resilient foundations for human development fostering a focus on the poorest and most precarious and in particular on the concerns of women In chapters examining the environmental political and socioeconomic crisis of the 1970s the book shows how the lessons of the famine led to a robustly pro poor growth and social policy agenda empowering the Bangladeshi state and its non governmental organizations to protect and enable its population to thrive in its engagements in the global economy Now a middle income country Bangladesh s role as the world s laboratory for aided development has generated lessons well beyond its borders and Bangladesh continues to carve a pioneering pathway through the risks of global economic integration and climate change Going Nowhere Fast Sabina Lawreniuk,Laurie Parsons,2020-08-06 Rising levels of global inequality and migrant flows are both critical global challenges Set within the Southeast Asian nation of Cambodia Going Nowhere Fast sets out to answer a question of global importance how does inequality persist in our increasingly mobile world Inequality is often referred to as the greatest threat to democracy society and economy and yet opportunity has apparently never been more accessible Long and short distance transport from motorbikes to aeroplanes are available to more people than ever before and telecommunications have transformed our lives ushering in an era of translocality in which the behaviour of people and communities is influenced from hundreds or even thousands of miles apart Yet amidst these complex flows of people ideas and capital persistent inequality cuts a jarringly static figure Going Nowhere Fast brings together a decade of research to examine this uneven development in Cambodia making a case for inequality as a total social fact rather than an economic phenomenon in which stories stigma obligation and assets combine to lock social structures in place Going Nowhere Fast Inequality in the Age of Translocality speaks from an in depth perspective to an issue of global relevance how inequality persists in our hypermobile world

Focusing on pressing issues in Cambodia that resonate beyond it investigates how human movement within and across the nation's borders are intertwined with societal threats and challenges including of precarious labour and agricultural livelihoods climate and environmental change the phenomenon of land grabbing and the rise of popular nationalism **They Eat Our Sweat** Daniel E. Agbiboa, 2022 They Eat Our Sweat examines the corruption complex in Africa in the context of transportation Focusing on Lagos Nigeria Agbiboa shows that corruption is driven by the imperatives of urban economic competition **Developmentalism** Graham Harrison, 2020-06-19 Why do so few countries achieve development success Achieving development requires many changes over a short period of time generating instability and risk It is a deep and integrated economy of change involving force strategic thinking and ideological conviction it emerges when successful development is seen as necessary for the survival of a political order Developmentalism engages with the moral issues that this raises Developmentalism The Normative and Transformative within Capitalism uses a historical comparative approach to understand development as a transformation which involves a deep and integrated political economy of change a shift from a state of capital ascendance to capital dominance It is only through a transformation towards capital dominance that mass poverty reduction and the construction of a commonwealth are possible However capitalist development is extremely difficult and requires a highly exacting political endeavour The politics of development is conceptualized as developmentalism a strategy and ideology in which governments exercise heavy directive power endure instability and crisis and secure a rudimentary legitimacy for their efforts This book argues that developmentalism requires a conflation of successful capitalist transformation with some form of existential insecurity of the state itself It flourishes when capitalist transformation connects to profound questions of sovereignty statehood nation building and elite survival Developmentalism shows deep contextualisation of capitalist transformation as well as the massive improvements in material life that it has generated
