Comprehensive Frontier Of Kidney Disease (In 2 Volumes) Shanyi Lin, Chuanming Hao, Bi-cheng Liu, 2024-10-11. In a world where kidney injury poses an ever-growing threat to human health due to aging populations and changing lifestyles, understanding and combating renal diseases have never been more critical. This book delves into cutting-edge renal disease research where rapid developments have illuminated new technologies for diagnosis and treatment of the disease. The book systematically and comprehensively addresses clinical issues related to kidney diseases where readers can explore topics such as hypoxia-inducible factors and renal anemia pathogenesis of IgA nephropathy, hypertension, diabetic nephropathy, PLA2R antibodies and membranous nephropathy, immune nephropathy, treatments using biological agents, renal glucose and energy metabolism, the application of SGLT2 inhibitors and mechanisms of renal fibrosis. Written by over thirty experts who are actively shaping the field of nephrology in China and the USA, this book offers profound insights to understanding renal diseases, making it an indispensable resource for researchers, clinicians and readers seeking to grow their knowledge on the scientific issues of kidney disease.

Encyclopedia of Endocrine Diseases, 2018-09-12. *Encyclopedia of Endocrine Diseases* Second Edition, Five Volume Set, comprehensively reviews the extensive spectrum of diseases and disorders that can occur within the endocrine system. It serves as a useful and comprehensive source of information spanning the many and varied aspects of the endocrine and metabolic system. Students will find a concise description of the physiology and pathophysiology of endocrine and metabolic functions as well as their diseases. Each article provides a comprehensive overview of the selected topic to inform a broad spectrum of readers from advanced undergraduate students to research professionals. Chapters explore the latest advances and hot topics that have emerged in recent years, such as the molecular basis of endocrine and metabolic diseases, mutations, epigenetics, signaling, the pathogenesis and therapy of common endocrine diseases (e.g., diabetes and endocrine malignancies), new technologies in endocrine research, new methods of treatment and endocrine toxicology, and disruptors. Covers all aspects of endocrinology and metabolism. Incorporates perspectives from experts working within the domains of biomedicine (e.g., physiology, pharmacology and toxicology, immunology, genetics and clinical sciences) to provide readers with reputable, multi-disciplinary content from domain experts. Provides a one-stop resource for access to information as written by world-leading scholars in the field with easy cross-referencing of related articles to promote understanding and further research.

Glucose-sensing Receptor in Pancreatic Beta-cells Itaru Kojima, 2018-05-31. Since the 1970s there has been much discussion about the glucoreceptor and substrate site and which of these two is the dominant theory, but new findings on the glucose-sensing receptor have now shed new light on the glucoreceptor theory. This volume reviews recent advances

concerning the glucose sensing receptor in pancreatic beta cells The history of research into pancreatic beta cells is long and complex accordingly the first chapters present the history of this field and explain the hypothesis of insulin secretion mechanisms glucoreceptor theory Subsequent chapters examine the function and activity of the glucose sensing receptor in pancreatic beta cells such as identification channel pathway receptor signal and physiological role Readers will gain a thorough understanding of the glucose sensing receptor and glucose metabolism in pancreatic beta cells new insights into the pathophysiology of diabetes and learn about new targets for the treatment of diabetes **Proceedings of the**

Oxidative Stress and Aging R.C. Cutler, L. Packer, J. Bertram, A. Mori, 2012-12-06 Oxidative stress and aging Over the past several years there has been an extraordinarily rapid growth in our knowledge of free radical chemistry and its possible involvement in both normal essential biology and age related disease and dysfunction Much of this growth in the traditionally separate sciences of chemistry and molecular gerontology occurred independently with little interaction or communication between the scientists working in these two fields In view of the growing maturity of the two fields and the potential importance of advancing our knowledge in the area of oxidative stress and aging we perceived a critical need to organize an international conference the First International Conference on Oxidative Stress and Aging in Hawaii in 1994 to bring together the world's leading scientists in the fields of reactive oxygen species and molecular gerontology The objective of this conference was to provide a unique opportunity for scholars working in these two related and rapidly growing fields to participate in the exchange integration and synthesis of new concepts and ideas to engage in constructive criticism and to initiate new collaborative research projects The conference focused on the molecular and cellular aspects of aging as related to oxidative stress It was one of the largest and most comprehensive international conferences held in molecular gerontology At this conference a call was made for submission of papers to be used in the publication of a book covering the major contributions of the meeting

Genetic Technology: A New Frontier Assessment Office Of Technology, 2020-09-23 First published in 1982 This report examines the application of classical and molecular genetic technologies to micro organisms plants and animals This book is one of the first comprehensive documents on emerging genetic technologies and their implications for society The authors discuss the opportunities and problems involved describe current techniques and attempt to project some of the economic environmental and institutional impacts of those techniques The issues they raise go beyond those of technology utility and economic feasibility As we gain the ability to manipulate life we must face basic questions of just what life means and how far we can reasonably and safely allow ourselves to go
