body of writings by women exists that casts the era of western expansion in a different light In this study of American women s writings about the West between 1830 and 1930 a European scholar provides a reconstruction and new vision of frontier narrative from a perspective that has frequently been overlooked or taken for granted in discussions of the frontier Brigitte Georgi Findlay presents a range of writings that reflects the diversity of the western experience Beginning with the narratives of Caroline Kirkland and other women of the early frontier she reviews the diaries of the overland trails letters and journals of the wives of army officers during the Indian wars professional writings focusing largely on travel by women such as Caroline Leighton from the regional publishing cultures that emerged in the Far West during the last quarter of the century and late nineteenth and early twentieth century accounts of missionaries and teachers on Indian reservations Most of the writers were white literate women who asserted their own kind of cultural authority over the lands and people they encountered Their accounts are not only set in relation to a masculine frontier myth but also investigated for clues about their own involvement with territorial expansion By exploring the various ways in which women writers actively contributed to and at times rejected the development of a national narrative of territorial expansion based on empire building and colonization the author shows how their accounts are implicated in expansionist processes at the same time that they formulate positions of innocence and detachment Georgi Findlay has drawn on American studies scholarship feminist criticism and studies of colonial discourse to examine the strategies of women s representation in writing about the West in ways that most theorists have not She critiques generally accepted stereotypes and assumptions both about women s writing and its difference of view in particular and about frontier discourse and the rhetoric of westward expansion in general as she offers a significant contribution to literary studies of the West that will challenge scholars across a wide range of disciplines

The Enchantments of Mammon Eugene McCarraher, 2019-11-12 An extraordinary work of intellectual history as well as a scholarly tour de force a bracing polemic and a work of Christian prophecy McCarraher challenges more than 200 years of post Enlightenment assumptions about the way we live and work The Observer At least since Max Weber capitalism has been understood as part of the disenchantment of the world stripping material objects and social relations of their mystery and magic In this magisterial work Eugene McCarraher challenges this conventional view Capitalism he argues is full of sacrament whether one is prepared to acknowledge it or not First flowering in the fields and factories of England and brought to America by Puritans and evangelicals whose doctrine made ample room for industry and profit capitalism has become so thoroughly enmeshed in the fabric of our society that our faith in the market has become sacrosanct Informed by cultural history and theology as well as management theory The Enchantments of Mammon looks to nineteenth century Romantics whose vision of labor combined reason creativity and mutual aid for salvation In this impassioned challenge to some of our most firmly held assumptions McCarraher argues that capitalism has hijacked our intrinsic longing for divinity and urges us to break its hold on our souls A majestic achievement It is a work of great moral and spiritual intelligence and

one that invites contemplation about things we can't afford not to care about deeply. Commonweal. More brilliant, more capacious, and more entertaining page by page than his most ardent fans dared hope. The magnitude of his accomplishment: an account of American capitalism as a religion will stun even skeptical readers. Christian Century

Transnational Frontiers of Asia and Latin America since 1800 Jaime Moreno Tejada, Bradley Tatar, 2016-08-19

Frontiers are wild. The frontier is a zone of interaction between distinct polities, peoples, languages, ecosystems, and economies, but how do these frontier spaces develop? If the frontier is shaped by the policing of borders by the modern nation-state, then what kind of zones, regions, or cultural areas are created around borders? This book provides 16 different case studies of frontiers in Asia and Latin America by interdisciplinary scholars charting the first steps toward a transnational and transcontinental history of social development in the borderlands of two continents. Transnationalism provides a shared focus for the contributions, drawing upon diverse theoretical perspectives to examine the place-making projects of nation-states. Through the lenses of different scales and time frames, the contributors examine the social processes of frontier life and how the frontiers have been created through the exertions of nation-states to control marginal or borderland peoples. The most significant cases of industrialization, resource extraction, and colonization projects in Asia and Latin America are examined in this book, revealing the incompleteness of frontiers as modernist spatial projects but also their creativity as sources of new social patterns, new human adaptations, and new cultural outlooks and ways of confronting power and privilege. The incompleteness of frontiers does not detract from their power to move ideas, peoples, and practices across borders, both territorial and conceptual. In bringing together Asian and Latin American cases of frontier-making, this book points toward a comparativist and cosmopolitan approach in the study of statecraft and modernity. For scholars of Latin America and/or Asia, it brings together historical themes and geographic foci, providing studies accessible to researchers in anthropology, geography, history, politics, cultural studies, and other fields of the human sciences.
