Frontiers Of Stress Research:

Frontiers of Stress Research Herbert Weiner, 1989 Stress and Somatic Symptoms Kyung Bong Koh, 2018-11-22 This book focuses on the assessment and treatment of patients with somatic symptoms based on biopsychosociospiritual model. Specific assessment skills and treatment techniques are required to approach them effectively. A broad spectrum of knowledge about stress is also needed because stress is closely related to the onset and course of disorders with somatic symptoms. This book consists of four parts: Part 1 Stress explores stress vulnerability and resilience; intermediate mechanisms between stress and illnesses such as psychoendocrinology and psychoimmunology; the measurement of stress and the relationship between stress and accidents; Part 2 Somatization deals with the concept, mechanisms, assessment, and treatment of somatization. In addition, somatic symptom and related disorders in DSM 5 is included. However, the approach to chronic pain is separately added to this part because pain is a major concern for patients with these disorders; Part 3 Specific physical disorders mainly deals with common and distressing functional physical disorders as well as major physical disorders. Therapeutic approach for individuals at risk of coronary heart disease is also included; Part 4 Religion, spirituality, and psychosomatic medicine emphasizes the importance of a biopsychosociospiritual perspective in an approach for patients with somatic symptoms, especially depressed patients with physical diseases and patients with terminal illnesses because of the growing need for spirituality in such patients. This book explores stress and a variety of issues relevant to the assessment and treatment of disorders with somatic symptoms in terms of biopsychosociospiritual perspectives. It will be of interest to researchers and healthcare practitioners dealing with stress, health, and mental health. Proceedings of the International Workshop on Navigating the Digital Business Frontier for Sustainable Financial Innovation (ICDEBA 2024) Junfeng Lu, 2025-02-22 This is an open access book. Against this background, the International Conference on Digital Economy and Business Administration in 2024 will establish three sub-venues aiming to further deepen academic research and practical discussions in this field. This sub-venue will delve into the development of digital economy and finance, highlight practical experiences in digital financial ecosystem construction, and explore the comprehensive impact of digital economy on the financial industry. Additionally, the sub-venue will invite local innovative financial enterprises to share their practical achievements, showcasing advanced applications of digital technology in financial services. This sub-venue looks forward to deepening the profound understanding of the development of digital economy and finance in this conference, promoting scholars, researchers, and industry professionals to achieve deeper cooperation and innovation in this field. This will not only contribute to the sustainable development of Hangzhou's digital economy and finance but also provide valuable experience and references for research and practices in the global digital economy and finance field, promoting the sustainable development of the industry. **Frontier Research on High Performance Concrete and Mechanical Properties** Ping Xiang, Haifeng Yang, Jianwei Yan, 2024-11-25 This open access book focuses on cutting edge research in high performance

concrete Concrete has been a main construction material all over the world in the past century As the demand for construction rises the need for concrete with stronger performance grows as well Existing studies on high performance concrete are mainly on fiber admixtures and reactive mineral powder admixtures with a focus on concrete proportioning and rheological properties Through in depth analysis of real world engineering cases and demonstration of the latest research achievements this book aims to provide a systematic review of research on high performance concrete for civil engineers and scholars in related research fields The topics of this book include but are not limited to the following 1 Fiber Reinforced Concrete and Admixture Factors 2 Effect of Mineral Reactive Powders on Concrete 3 High Performance Concrete Packing Density and Rheological Properties 4 High Performance Concrete Proportioning and Theoretical Research 5 Research on Mechanical Properties of High Performance Concrete

Weiner,1992-06 Overlooked in the early accounts was that all organisms face many additional types of natural challenges and obstacles in their efforts to survive and reproduce for example they must fight or escape predators replenish diminished food supplies and anticipate seasonal changes of climate Weiner s survey of the literature shows that much progress has been made in understanding the effects of exposing animals to these kinds of naturally occurring stressful experiences and their varied outcomes Under such conditions there appear patterns of integrated behavioral and physiological responses that are exquisitely attuned to the experience He carefully assesses the research on the ways in which neural circuits and peptidergic mechanisms in the brain generate and integrate these patterns In addition he presents new concepts about the perturbation of subsystems including biological clocks which may or may not lead to disease or ill health *Nanowired Delivery of Drugs and Antibodies for Neuroprotection in Brain Diseases with Co-morbidity Factors Part A* ,2023-10-03 Nanowired Delivery of Drugs and Antibodies for Neuroprotection in Brain Diseases with Co morbidity Factors Volume 171 in the International
