Your Path Direct to the Goal You Desire Brown Landone, 1996-09 104 lessons Contents Joy is Best Ten Essential Attitudes Pray for the Best Receiving the Best Sacrifice the Least for the Best Unity of Desires Scattered Desires Defeat the Best Use All Things to Attain the Best Dare to Act God Ever **Economies of English** Martin Leer, Genoveva Puskás, 2016-10-24 As the world still reels from the financial crisis of 2007 it seems timely to reflect on the connections between money and value embedded in all our discourses about economy language and literature The essays in this volume bring together a wide range of approaches to demonstrate how the discipline of English studies and language and literature studies more generally rest on a goldmine of largely unexamined economic metaphors from Ferdinand de Saussure's notions of linguistic value to the actual economic value of English as a second language from Shakespeare's uncanny eye for the ducary principle of the modern economy to Joyce's scrupulous meanness as an economy of style from women interrupting the circulation of money in early modern comedy to living well on nothing a day in Thackeray's *Vanity Fair* from derivatives in the poetics of Anne Carson to the generic economy of gay coming out films Paradigm Busters Kenyon, J. Douglas, 2015-03-01 Considered by many to be the magazine of record for ancient mysteries future science and unexplained anomalies *Atlantis Rising* provides some of the most astounding reading to be found anywhere Pulled from the pages of *Atlantis Rising* here is a collection of thirty concise and well illustrated articles by world class researchers like Philip Coppens Robert Schoch Frank Joseph Steven Sora and many others who offer thought provoking insights on some of today's most interesting if least understood topics Featuring *New Vindication for James Churchward* by Philip Coppens *Ancient Keys to the Future* by Walter Cruttenden *The Legend of Markawasi* by Robert M Schoch *Ph D Mystery of the Montauk Monster* by Steven Sora *Close Encounters of the Ball Lightning Kind* by Frank Joseph *The Project Serpo Saga* by Len Kasten *Places of the Builder Gods* by Freddy Silva In the articles collected for this book we hope to show that many of the beliefs of our supposedly advanced society are a long way from knowledge particularly in the areas of modern science ancient history and today's conventional wisdom If in so doing a few sacred paradigms are busted we say let the chips fall where they may J Douglas Kenyon Editor Publisher *Atlantis Rising* Money Mark F. Dobeck, Euel Elliott, 2006-12-30 Money makes the world go around From the earliest bartering systems to today's sophisticated electronic transfers of billions of dollars in a split second systems of exchange have conferred value upon goods and services and created the economic glue that binds individuals businesses communities and nations together In this volume the authors present a colorful history of money in its economic political socio cultural and even psychological context The first section focuses on banks and financial institutions The second part covers the role of currency in national sovereignty the impact of technology debt credit and equity and money markets The final chapters explore emerging issues such as risk management and emerging forms of money and investment in the electronic age Featuring a glossary and timeline charts and graphs index and references *Money* is an engaging introduction

to this vital component of the economy **Frozen Desire** James Buchan,1998 Frozen Desire is concerned with humanity itself Describing a portrait of Judas Buchan observes Money provokes people to act for the sake of payment in a fashion that if they knew how the action would turn out they would not contemplate This sustained wide ranging essay has a spiritual quality Paul Bailey Daily Telegraph Books of the Year A delightfully quirky book about one man s obsession with everybody else s obsession with money a great read William Keegan Guardian An original elegant powerful and often beautiful work Buchan in full flow is magnificent Nick Cohen New Statesman Easily the most pleasure I ve had from a book this year A journey through the dangerous and little exposed country between the novelist s rough pasture and the neat fields of the economist Martin Taylor Sunday Telegraph Buchan s picture of monetary culture strikes me as irrefutable Michael Dirda Washington Post A fascinating book full of learning and poetically written For its many insight into what money has meant to different people in history as well as for its passion Frozen Desire deserves to be read The Economist *True Stories* Francis Spufford,2017-01-01 An irresistible collection of favorite writings from an author celebrated for his bravura style and sheer unpredictability Francis Spufford s welcome first volume of collected essays gathers an array of his compelling writings from the 1990s to the present He makes use of a variety of encounters with particular places writers or books to address deeper questions relating to the complicated relationship between story telling and truth telling How must a nonfiction writer imagine facts vivifying them to bring them to life How must a novelist create a dependable world of story within which facts are in fact imaginary And how does a religious faith felt strongly to be true but not provably so draw on both kinds of writerly imagination Ranging freely across topics as diverse as the medieval legends of Cockaigne the Christian apologetics of C S Lewis and the tomb of Ayatollah Khomeini Spufford provides both fresh observations and thought provoking insights No less does he inspire an irresistible urge to turn the page and read on *God's Lecture* John L. Bowman,2005-09-12 God is pissed In the beginning God created heaven earth and all the animals They were part of a grand and perfect design It worked well and God was pleased Then one of the animals man started altering the design irritating God God gave man unlike the other animals a little cleverness which has caused him to jump the tracks Using this cleverness man has conceived created and implemented incredible unnatural and convoluted ideas constructs and systems These entities are upsetting God s patterns of nature Man is now doing things God never intended This has not only made God s plans go haywire but also threatens man himself God is in high dudgeon because man s imagination is debauching his perfect world To make matters worse man audaciously blames God for a world gone crazy God has patiently endured man s accusations but now intends to set him straight on the true nature of things and explain how he has screwed things up This is God s lecture and if man has any inkling of what is good for him he will listen Theology of Money Philip Goodchild,2009-06-22 Theology of Money is a philosophical inquiry into the nature and role of money in the contemporary world Philip Goodchild reveals the significance of money as a dynamic social force by arguing that under its influence moral evaluation is subordinated to economic

valuation which is essentially abstract and anarchic His rigorous inquiry opens into a complex analysis of political economy encompassing markets and capital banks and the state class divisions accounting practices and the ecological crisis awaiting capitalism Engaging with Christian theology and the thought of Carl Schmitt Georg Simmel Karl Marx Adam Smith and many others Goodchild develops a theology of money based on four contentions which he elaborates in depth First money has no intrinsic value it is a promise of value a crystallization of future hopes Second money is the supreme value in contemporary society Third the value of assets measured by money is always future oriented dependent on expectations about how much might be obtained for those assets at a later date Since this value when realized will again depend on future expectations the future is forever deferred Financial value is essentially a degree of hope expectation trust or credit Fourth money is created as debt which involves a social obligation to work or make profits to repay the loan As a system of debts money imposes an immense and irresistible system of social control on individuals corporations and governments each of whom are threatened by economic failure if they refuse their obligations to the money system This system of debt has progressively tightened its hold on all sectors and regions of global society With *Theology of Money* Goodchild aims to make conscious our collective faith and its dire implications

combination of markets and technology in the pursuit of efficiency destroys the potential of education to help societies nurture well being This book dives deeply into the overlapping crises of education today The author draws on decades of experience and many disciplines to celebrate the spirit of education and to frame it as a gift Other People's Struggles Nicholas Owen,2019-05-30 Other People s Struggles is the first attempt in over forty years to explain the place of conscience constituents in social movements Conscience constituents are people who participate in a movement but do not stand to benefit if it succeeds Why do such people participate when they do not stand to benefit Why are they sometimes present and sometimes absent in social movements Why and when is their participation welcome to those who do stand to benefit and why and when is it not The work proposes an original theory to answer these questions crossing disciplinary boundaries to draw on the findings of social psychology philosophy and political theory in search of explanations of why people act altruistically and what it means to others when they do so The theory is illustrated by examples from British history including the anti slavery movement the women s suffrage and liberation movements labor and socialist movements anti colonial movements anti poverty movements and movements for global justice Other People s Struggles also contributes to new debates concerning the rights and wrongs of speaking for others Debates concerning the limits of solidarity who can be an ally and on what terms have become topical in contemporary politics especially in identity politics and in the newest social movements The work provides a theoretical and empirical account of how these questions have been addressed in the past and how they might be framed today **Healing the Wounded Heart** Dan B. causes of trouble on both the individual and societal levels and the real reasons behind our collective sense of never enough whether it s time money sex security even war Loy s Buddhist Revolution is nothing less than a radical change in the ways we can approach our lives our planet the collective delusions that pervade our language culture and even our spirituality

Antilogic Bruce McComish,2001-11-28 There are many strange phenomena in the world of business and finance We discover many curious things comic and contentious that are not all explained by conventional finance or economic theory rather they follow the rules of antilogic Financial practitioners have been attempting to quantify monitor and control financial risk and yet in spite of modern quantitative analysis and highly sophisticated modelling techniques they are no more successful in this than in the past the world of finance and business just doesn t add up This highly controversial and thought provoking book written in a light and humorous style will not only entertain but also challenge readers to question conventional wisdom This book provides a clear look at the antilogic of the business world and financial markets It describes the background conditions that encourage the creation of antilogic and demonstrates how business personalities generate the antilogic concept Shows the antilogic created by accountants and looks at the role of cash and makes the discovery that much of antilogic stems from accepting as money something different which is defined in the book as Vapourcash and Anticash
