The Fuel Tax Protests in Europe, 2000-2001 John Vincent Mitchell,Müge Dolun,2001 In September 2000 the distribution of oil products in Britain and France was disrupted for a week This study analyzes the protest in the context of the history of European fuel taxes and asks whether the demonstrations showed a limit to the potential for eco taxes **The Fuel Tax Protests in Europe, 2000-2001** John Vincent Mitchell,Müge Dolun,2001 In September 2000 the distribution of oil products in Britain and France was disrupted for a week This study analyzes the protest in the context of the history of European fuel taxes and asks whether the demonstrations showed a limit to the potential for eco taxes **Transport Lessons from the Fuel Tax Protests of 2000** Kiron Chatterjee,2017-07-05 The UK fuel tax protests of September 2000 generated considerable debate about fuel prices and taxation and put transport in the media spotlight Away from the immediate events and debates surrounding the protests the experience offered the opportunity for longer term lessons on transport to be gained The editors of this volume Glenn Lyons and Kiron Chatterjee saw the opportunity to get fresh insight into car dependence and conducted a large scale travel behaviour survey to find out how car users coped when restricted in being able to buy petrol This book presents their findings and collects together articles written by other researchers on a range of topics including fuel taxation transport pricing policy acceptability travel behaviour and goods distribution [A World History of Tax Rebellions](#) David F. Burg,2004-06-01 A World History of Tax Rebellions is an exhaustive reference source for over 4 300 years of riots rebellions protests and war triggered by abusive taxation and tax collecting systems around the world Each of the chronologically arranged entries focuses on a specific historical event analyzing its roots and socio economic context *Climate Change and Power* Christiaan Vrolijk,2010-09-23 This book provides an essential guide to the challenges facing the power sector but is equally enlightening to other industrial emitters policy makers and non governmental organizations Charles Nicholson Group Senior Advisor BP The electricity industry is one of the main contributors of carbon to the atmosphere Reducing these emissions is critical to achieving international targets and mitigating climate change Economic instruments including emissions trading taxes and voluntary agreements will be crucial However across Europe there are widely different electricity systems and policies will have different effects This book describes the characteristics of the main European electricity regimes defining the range of instruments available and assessing the potential of each in each regime and for Europe as a whole *Contesting Rurality* Michael Woods,2017-05-15 Rural issues have gained national prominence in Britain in recent years The future of hunting the Foot and Mouth outbreak farm income and agricultural reform and housing development have all claimed political and media attention promoted by a vocal rural lobby and headline grabbing protests and demonstrations Combining detailed empirical research and case studies with theoretically informed critical analysis this book provides an overview of the contemporary politics of the British countryside It explores how and why rural issues have suddenly achieved such political prominence by examining the

changing politics and governance of rural Britain from the local to the national scale over the past century It investigates the social economic and institutional restructuring of rural communities and argues that we are witnessing not so much a rural politics but a politics of the rural in which the definition and representation of rurality itself has become the key focus of conflict

Geographies of Rural Cultures and Societies Moya Kneafsey, 2017-09-08 The last decade or so has witnessed a flourishing of research in rural geography in particular approaches which have developed socio cultural perspectives on rural issues This book brings together well established and newer researchers to examine the position of rural social and cultural geography at the beginning of the 21st century and to suggest new research agendas It offers critical evaluations of theoretical positions and advances introduces new conceptual and methodological tools and reports on recent empirical work on a variety of topical issues in a number of countries With diverse theoretical and empirical content the book makes a valuable contribution to the development of research into changing social and cultural geographies of rurality in developed or Western countries

The Rural Richard Munton, 2017-05-15 The rural has long been regarded as an important site of geographical inquiry even if our understanding of it has not always been treated as conceptually different from the urban That said rural research has pursued a number of distinct empirical agendas ranging from the operation and impacts of agribusiness to local resistance to global food supply chains to differing representations of the rural In doing so rural geographers have critically examined the relevance and significance of ideas drawn from numerous traditions including political economy ecological modernization and cultural theory amending them as appropriate in their search to understand the nature and trajectory of rural areas Up until the 1980s attention remained largely focused upon agriculture as the primary land use but increasingly new forms of rural consumption housing recreation nature conservation have taken centre stage as the primacy of local agricultures has been undermined by reduced state protection and new rural populations which have migrated out from the city More recently research has been dominated by the cultural turn with particular emphases upon society nature relations interpretations of landscape marginalised others and analyses of the relations between representation and practice In the last decade a more holistic view of the rural bringing together different aspects of the two previous themes has emerged through more politically oriented studies of rural governance concerned with the functioning of interest groups participation protest and the allocation and management of resources The volume is thus structured into three sections concerned with agriculture and food the rural and rural governance The great majority of the selected papers combine both empirical material often highly informative case studies and important conceptual arguments about change in the rural condition that can be linked to ideas being employed elsewhere in Geography and the Social Sciences more generally These critical reflections have been drawn very largely from research conducted in advanced economies which at least provide some commonality of experience allowing the transfer of ideas between what otherwise might be seen as very differing geographical contexts
