**Fuelling War** Philippe Le Billon, 2013-06-17 A generous endowment of natural resources should favour rapid economic and social development The experience of countries like Angola and Iraq however suggests that resource wealth often proves a curse rather than a blessing Billions of dollars from resource exploitation benefit repressive regimes and rebel groups at a massive cost for local populations This Adelphi Paper analyses the economic and political vulnerability of resource dependent countries assesses how resources influence the likelihood and course of conflicts and discusses current initiatives to improve resource governance in the interest of peace It concludes that long term stability in resource exporting regions will depend on their developmental outcomes and calls for a broad reform agenda prioritising the basic needs and security of local populations

**Oil Wars** Mary Kaldor,Terry Lynn Karl,Yahia Said,2007-03-20 Are oil rich countries prone to war And if so why There is a widely held belief that contemporary wars are motivated by the desire of great powers like the United States or Russia to control precious oil resources and to ensure energy security This book argues that the main reason why oil rich countries are

prone to war is because of the character of their society and economy. Sectarian groups compete for access to oil resources and finance their military adventures through smuggling oil, kidnapping oil executives or blowing up pipelines. Outside intervention only makes things worse. The use of conventional military force as in Iraq can bring neither stability nor security of supply. This book examines the relationship between oil and war in six different regions: Angola, Azerbaijan, Colombia, Indonesia, Nigeria, and Russia. Each country has substantial oil reserves and has a long history of conflict. The contributors assess what part oil plays in causing aggravating or mitigating war in each region and how this relation has altered with the changing nature of war. It offers a novel conceptual approach bringing together Kaldor's work on new wars and Karl's work on the petro state.

International Law and the War with Islamic State Saeed Bagheri, 2021-07-15. Armed non-state actors (ANSAs) often have economic aims that international law needs to respond to. This book looks at the aim of Islamic State to create an effective government with an economically independent regime which focused on key oilfields in Syria and Iraq. Having addressed Islamic State's quest for energy resources in Iraq and Syria, the book explores the lawfulness of the war with Islamic State from a variety of legal aspects. It has been attempted to make inroads into the most controversial aspects of contradictions in the application of *jus ad bellum* and *jus in bello* particularly when discussing the use of extraterritorial armed force against ANSAs and the obligation to protect civilian objects including the natural environment. The question is whether the targeting of energy resources should be regarded as a violation of the laws of armed conflict even though the war with Islamic State being classified as a non-international armed conflict. Ambitious in scope, the study argues that legal theory and state practice are still problematic as to how and under what conditions states can justify resorting to military force in foreign territory and to what extent they can target natural resources as being part of state property. Furthermore, it goes on to examine the differences between international and non-international armed conflicts to establish whether there is any difference in the targeting of energy resources as part of the war-sustaining capabilities of either party. Through an examination of the Islamic State case, the book offers a comprehensive study to close the gaps in *jus in bello* by contextualising the questions of civilian protection, victimisation, and state responsibility by evaluating the US's war-sustaining theory as a justification for the destruction of a territorial state's natural resources that are occupied by ANSAs.
