James Edgar Johnson, 1969      *Full Circle* James E. Johnson, 1964      **Air Power and the Evacuation of Dunkirk** Harry Raffal, 2021-07-15 The evacuation of Dunkirk has been immortalised in books prints and films narrated as a story of an outnumbered inexperienced RAF defeating the battle hardened Luftwaffe and protecting the evacuation This book revives the historiography by analysing the air operations during the evacuation Raffal draws from German and English sources many for the first time in the context of Operation DYNAMO to argue that both sides suffered a defeat over Dunkirk This work examines the resources and tactics of both sides during DYNAMO and challenges the traditional view that the Luftwaffe held the advantage The success that the Luftwaffe achieved during DYNAMO including halting daylight evacuations on 1 June is evaluated and the supporting role of RAF Bomber and Coastal Command is explored in detail for the first time Concluding that the RAF was not responsible for the Luftwaffe's failure to prevent the evacuation Raffal demonstrates that the reasons lay elsewhere      **Winged Warfare** Michael Paris, 1992 This original study provides a significant reinterpretation of the development of air power in Britain highlighting how in the period before 1914 aerial warfare was already becoming an increasingly forceful concept      Last War of the Superfortresses Leonid Krylov, Yuriy Tepsurkaev, 2024-07-12 In *Last War of the Superfortresses* the authors provide a detailed history of the confrontation between Soviet fighters and the United States Far East Air Force's B 29 Superfortress bombers during the Korean War of 1950-1953 drawing on Military documents in the Central Archive of the Ministry of Defence of the Russian Federation in Podolsk as well as published Western sources The recollections of pilots who served in the 64th Fighter Air Corps and who participated personally in the events described are also widely used Almost all the battles that took place between Soviet fighters and the Superfortresses are analyzed in detail and the authors have on the basis of a comparison of Soviet archive documents and data from published Western sources attempted to clarify the actual losses on both sides in these battles Particular attention has been paid to key events in the history of the confrontation between the MiG 15 and B 29 such as the air battles of April and October 1951 which had a significant impact on the course of the Korean War and influenced the development of military aviation in both the USSR and the USA Extensive losses in combat with the MiGs served as one of the most influential arguments for curtailing the piston engine B 36 and B 50 bomber programs and boosting development of one of the most famous aircraft in the history of global aviation the B 52 Stratofortress The authors analyze the advantages and the disadvantages of the La 11 and the MiG 15bis the principal fighters of the 64th Fighter Air Corps from the point of view of their ability to intercept the B 29s Attention has been paid to the tactics of the opposing sides and to how these changed over the course of the war along with the technical aspects of the confrontation between Soviet fighters and Superfortresses *Last War of the Superfortresses* is illustrated with photographs from the personal archives of veterans of the
