Fullness Of Space:

Transcendence and Sensoriness ,2015-06-02 Protestant theology and culture are known for a reserved at times skeptical attitude to the use of art and aesthetic forms of expression in a religious context In Transcendence and Sensoriness this attitude is analysed and discussed both theoretically and through case studies considered in a broad theological and philosophical framework of religious aesthetics Nordic scholars of theology philosophy art music and architecture discuss questions of transcendence the human senses and the arts in order to challenge established perspectives within the aesthetics of religion and theology Architectonic Space Hans van der Laan,1983 Architectonic Space is the most complete and coherent treatise on the nature purpose and meaning of architecture that has so far been attempted It is the product of its author s lifetime pursuit of an idea that has haunted him from childhood a search for the archetypal basis of the act of building Seeing architecture not merely as the expression but as the precondition of human culture Hans van der Laan believes that its principles must be sought within architecture itself rather than in technological social or ideological factors His buildings and writings stand out like tablets of stone amid the prevailing uncertainty and opportunism The style and method of his book its rational building up of an argument founded on simple everyday experience remind one forcibly of the early Greek thinkers just as Van der Laan s architecture recalls the houses and cities of the ancient world

Isotopography Niels Wilde,2024-08-19 While the concept of place remains undertheorized in Kierkegaard research this study argues that place is at the center of Kierkegaard s thinking The first part of the book shows that Kierkegaard s notion of situatedness as being placed in a socio historical situation conditioned by a situation prior to situatedness points to a realist position and a flat ontology Secondly the book develops a detailed analysis of the ontological structure of the existential place the place we ourselves are and concrete places the places where we are Place opens a qualified space within bounds the existence sphere an atmosphere of elemental attunement and attuned elementality Finally the book collects the dots from part one and two in a topological realist approach to Kierkegaard s theology and three main definitions of God God is love God is that everything is possible and God is the middle term The book concludes that Kierkegaard s existential topography reveals a realist position where we are is never exhausted by being the place where we are **The Space**

Within Robert McCarter,2016-11-15 Alvar Aalto once argued that what mattered in architecture wasn t what a building looks like on the day it opens but what it is like to live inside it thirty years later In this book architect and critic Robert McCarter persuasively argues that interior spatial experience is the necessary starting point for design and the quality of that experience is the only appropriate means of evaluating a work after it has been built McCarter reveals that we can t really know a piece of architecture without inhabiting its spaces and we need to counter our contemporary obsession with exterior views and forms with a renewed appreciation for interiors He explores how interior space has been integral to the development of modern architecture from the late 1800s to today and he examines how architects have engaged interior

space and its experiences in their design processes fundamentally transforming traditional approaches to composition Eloquenty placing us within a host of interior spaces he opens up new ways of thinking about architecture and what its goals are and should be

ART EDUCATION AND THREE DIMENSIONS Assoc. Prof. Firdevs SAĞLAM,2022-03-01 Art has become an essential part of human life because of its aesthetic structure its presence in communication its ability to stimulate emotions and thoughts The reason the art is included in education is to spread the art related gains across society The aim is to develop individuals who can adapt to the rapidly evolving and changing world especially with art training that helps to develop the creative characteristics The art education includes theoretical parts such as aesthetic art history cultural heritage as well as activities involving two dimensional or three dimensional applications This study named Art Education and Three Dimensions contains art art education the concept of three dimension and information and experiences about applications based on this concept In this context the place of three dimensions in art education was studied with reference to difference aspects The reason for addressing the concept of three dimensions is that this concept is the basis of existence in human life and that most of the sensing process is completed around it The inclusion of three dimensions within the scope of art education provides gains in different directions for the individual These gains are considered physical cognitive and sensory In this study the relevant field literature was reviewed and blended with the author s knowledge and experience of the field I owe a debt to my dear family who did not withhold their support during the creation of this book

Rethinking Design and Interiors Shashi Caan,2011-08-22 The world and the people living in it are increasingly and rapidly being affected by environmental and technological changes It is imperative that the design profession addresses these developments with a new way of thinking This book points the way for the design of interiors in this newly complex world and will be indispensable for students practitioners and theoreticians The book is divided into four chapters that explore aspects of the human experience of the interior from man s earliest search for shelter to an outline of past and current thinking on design psychology and well being An epilogue looks at such future concerns as population growth and sustainability and suggests how the design profession can confront these challenges Rethinking Design and Interiors is a fascinating exploration of how art and science can come together for the benefit of those who inhabit the built environment

Origen Panagiōtēs Tzamalikos,2007 Against claims that Origen causes History to evaporate into barren idealism his theology is shown to have no other source and aim than historical occurrences Fronting assertions that he has no eschatological ideas this Eschatology is explicated in all its clarity Light is cast upon the Aristotelian character of Origen s doctrine of apokatastasis proving this based on ontological necessity not a historical one

Edith Stein's Finite and Eternal Being Sarah Borden Sharkey,2023-02-13 There are few topics more central to philosophical discussions than the meaning of being and few thinkers offer a more compelling and original vision of that meaning than Edith Stein 1891 1942 Stein s magnum opus drawing from her decades working with the early phenomenologists and intense years as a student and translator of

medieval texts lays out a grand vision bringing together phenomenological and scholastic insights into an integrated whole The sheer scope of Stein s project in *Finite and Eternal Being* is daunting and the text can be challenging to navigate In this book Sarah Borden Sharkey provides a guide to Stein s great final philosophical work and intellectual vision The opening essays give an overview of Stein s method and argument and they place *Finite and Eternal Being* both within its historical context and in relation to contemporary discussions The author also provides clear detailed summaries of each section of Stein s opus drawing from the latest scholarship on Stein s manuscript *Edith Stein s Finite and Eternal Being A Companion* offers a unique guide opening up Stein s grand cathedral like vision of the meaning of being as the unfolding of meaning

Letters to Vanessa Jeremy Hayward,1997-09-02 The world we inhabit is enchanted every tree rock and star and even empty space itself is teeming with living energy and awareness And it s all nearer to us than our own breath Why then can t we see it Because according to Jeremy Hayward we are taught not to And because our cultural conditioning keeps us in denial about the fact that a strictly scientific worldview provides only a partial and unsatisfactory view of reality *Letters to Vanessa* is the guidebook for a generation caught in the crunch between the hard realities of science and the genuine yearning for an experience of the sacred In a series of letters addressed to his teenage daughter Dr Hayward points the way past the limits of science and shows how we can connect with the magical multidimensional universe of soul Along the way he presents the most recent findings of neuroscience cognitive psychology new biology and physics in a most engaging and understandable way He also provides practical meditation instructions that will enable everyone to reconnect with the joyous reality of ordinary life

I Believe in Trinity Jeffrey M S Vickers,2015-08-31 Trinity is not a biblical word but it is a biblical truth It describes the essential nature of the Godhead and explains the idea that the fullness of God indwells Yahweh Jesus and the Holy Spirit However rather than limiting his discussion to the horizontal equality between Yahweh Jesus and the Holy Spirit which can lead to the erroneous conclusion that Jesus is Yahweh in the flesh and that the Holy Spirit is the risen Christ the author focuses on the vertical equality demonstrated between Yahweh and God Jesus and God and the Holy Spirit and God This approach will lead serious students of the Bible to the more accurate conclusion that the horizontal equality between Yahweh Jesus and the Holy Spirit is not because each is a form of the other two but because the fullness of the Godhead Colossians 2 9 KJV dwells vertically and concurrently in each

The Nature of the Physical World Sir Arthur Stanley Eddington,1928

Space, Time, and Other,2016-05-23 This book by the late Fred Kersten known to many as the translator of Edmund Husserl s *Ideas I* takes up the challenge of Husserl s phenomenology as the will to return to the matters themselves providing extensive methodological reflections before proceeding to a series of painstaking phenomenological analyses based on a number of evocative examples such as the indeterminate mass of the hillside that looms up before me as I walk toward it in the dark

Chaos and Cosmos Karen Lang,2018-08-06 Writing in 1940 the prominent German art historian Erwin Panofsky asked How then is it possible to build up art history as a respectable

scholarly discipline if its objects come into being by an irrational and subjective process In *Chaos and Cosmos* Karen Lang addresses the power of art to resist the pressures of the transcendental vantage point history Uncovering the intellectual and cultural richness of the early years of academic art history in Germany the period from the 1880s to 1940 she explores various attempts within art history to transform aesthetic phenomena chaos into the cosmos of a systematic unified field of inquiry Lang starts by examining Panofsky's approach to aesthetic phenomena in his early theoretical essays alongside Ernst Cassirer's contemporaneous publications on the substance and function of scientific concepts and on Einstein's theory of relativity She then turns to the subject of aesthetic judgment through a rereading of Kantian subjectivity and Kant's uneasy legacy in art history From here Lang considers the different organizing theories of symbolic form proposed by Aby Warburg and Cassirer as well as Goethe's inspiration for both Alois Riegl's notion of age value and Walter Benjamin's conceptions of the aura concluding with an extended examination of objectivity and the figure of the art connoisseur Extensively illustrated with works of art from the Enlightenment to the present day this venturesome book illuminates an intellectual legacy that has profoundly shaped the study of the history of art in ways that have until now been largely unacknowledged Addressing the interplay of chaos and cosmos in terms of history art history philosophy and epistemology Lang traces shifts in point of view in art history and the way these shifts change aesthetic objects into historical objects and even objects of knowledge

 Building a Space Faring Civilization Advancing the Renaissance of Science Medicine and Human Performance in Civilian
 Spaceflight explores an expanding unique new trajectory for humankind the settlement of space by civilians For the first time
 in history average humans can contemplate journeys to Earth orbit the Moon and Mars with the idea of space settlement as a
 plausible reality As the numbers of spacefaring civilians grow medical personnel will be asked to meet their complex needs
 through an ever expanding discipline space medicine But this will require a rapidly advancing science to address what some
 are calling the next great age in space This book gathers some of the most accomplished thought leaders in the field of
 human spaceflight today Collectively they helped build the international space station ISS develop the field of orbital
 medicine guide the development of commercial orbital platforms plan missions to the Moon and Mars and forge the
 innovation necessary for the commercial spaceflight industry to thrive today The result is an exceptional source of wisdom
 experience and insight surrounding the current biomedical technical industrial legal and social implications of what is
 emerging as a true renaissance period in human history Describes the lessons learned from past explorers from the
 Renaissance to the present and how they can guide space exploration today Characterizes the risks encountered in the
 exploration and settlement of different domains of space Surveys the types of medical incidents civilian space travelers are
 likely to encounter based on professional astronaut reports Summarizes the types of biomedical assessment civilian space
 travelers will require in order to ready themselves for the dangers of space Explores the types of preparation training and
 medical countermeasures needed to live and work in space **Understanding Jonathan Edwards** Gerald R

Ernesto Laclau David Howarth, 2014-09-19 Ernesto Laclau has blazed a unique trail in political theory and philosophy
 since the early 1970s In so doing he has articulated a range of philosophical and theoretical currents into a coherent
 alternative to mainstream models and practices of conducting social and political science The editors have focused on work
 in three key areas Post Marxist Political Theory Discourse Hegemony Signification Laclau has developed an original
 conception of post Marxist political theory that is grounded on a materialist theory of discourse The latter is constructed from
 a range of theoretical and philosophical sources including poststructuralism psychoanalysis linguistic theory and post
 analytical philosophy The centerpiece of this approach is the category of hegemony which develops Antonio Gramsci's
 seminal contribution to Marxist theory and is in turn connected to a web of related concepts including articulation dislocation
 the logics of equivalence and difference political identification myth and social imaginary These ideas have informed a
 number of empirical and theoretical studies associated with the Essex School of Discourse Theory Analyzing Populism A
 central concern of Laclau's writings has been the question of populism both in Latin America where he began his

interrogation of the phenomenon especially the experience of Peronism and then in his engagement with the new social movements and socialist strategy more generally The concept of populism becomes a general way of exploring the primacy of politics in society Critical Engagements Laclau is first and foremost an engaged intellectual who has consistently sought to theorize contemporary events and reality and to debate with the leading intellectual figures of the day with respect to questions of political principle and strategy His recent debates with Judith Butler and Slavoj i ek in Contingency Hegemony Universality Contemporary Dialogues on the Left published in 2011 London Verso exemplify this critical ethos He continues to elaborate his approach by challenging and articulating related approaches and by situating his work in connection to the democratic Left
