Functionalism Exchange And Theoretical Strategy:

Functionalism, Exchange and Theoretical Strategy (RLE Social Theory) Michael Mulkay, 2014-08-13 M J Mulkay traces the development of certain recent versions of functionalism and exchange theory in sociology with special attention to theoretical strategy. He uses this term to refer to the policies which theorists adopt to ensure that their work contributes to their long range theoretical objectives. Such strategies are important, he believes, because they place limits on the theories with which they are associated. He shows how each of the theorists he studies devised a new strategy to replace the unsuccessful policies of a prior theory in a process of strategical dialectic. This often has unforeseen consequences for the direction of theoretical growth and the author interprets changes in theoretical perspective largely as products of these strategical innovations.

Functionalism, Exchange and Theoretical Strategy Michael Mulkay, 1992. This study examines the development of functionalism and exchange theory in sociology by looking closely at the work of five major theorists in chronological order. Particular attention is given to variations in theoretical strategy and to the way in which each theorist was led to devise a new strategy in response to the demonstrably unsatisfactory strategies of his predecessors. Intellectual change during this phase of sociological theory is seen to have been neither continuous nor cumulative but to have been characterized by radical alterations in direction as theorists tried unsuccessfully to find the procedures which would generate a truly scientific theory of society. The reasons for this disappointing pattern of uncertain theoretical development are studied in depth.

Developments in Sociology Robert Burgess, Anne Murcott, 2014-06-11. Appropriate as a supplemental text to courses in Sociology. Providing an overview grounded in research. *Developments in Sociology* focuses on the major areas of theoretical, methodological and substantive developments in sociology. Each author takes a field of study in which they are an acknowledged expert and highlights the way in which the subject has developed over the last fifty years.

Talcott Parsons Peter Hamilton, 1992. Talcott Parsons 1904-79 is widely regarded as one of the most important sociologists of the twentieth century. These four volumes provide an essential guide to the thought and work of this major sociologist.

Vilfredo Pareto John Cunningham Wood, Michael McLure, 1999. The articles reprinted here cover pure economic theory, political economy including sociological studies, Pareto's law of income distribution and miscellaneous matters and give a general overview of the man and his contributions.

Robert K. Merton and Contemporary Sociology Carlo Mongardini, 2018-04-17. This volume offers scholars of sociology and allied areas the fruits of an international conference on the contributions of the eminent Robert K. Merton. The assessment is good in content as well as in participants. It took place in Amalfi, Italy, with the participation of Merton himself and under the auspices of the Italian Sociology Association. Carlo Mongardini aptly summarizes the unique impact of Merton on the social theory of our century. His strength as a classic writer lies in his balance, unveiling complexity and in his humanism which looks beyond the apparent simplicity and coherence of social reality. A special treat is the final chapter by Merton reviewing Unanticipated Consequences and Kindred

Sociological Ideas In it he ranges from the historical antecedents of the concept to his own evolution in the use and expansion of the idea Merton approaches the development of his thought as installments rather than simple evolution and in so doing gives us unique insight into how he built upon his originating notions in the context of social science as it existed in the United States Tensions between integrating scholarship and reaching the general public provide a special insight into Merton that might prove new even to those who know his work well Contributors to this original volume include Volker Meja Nico Stehr Paolo Ammassari Gianni Statera Birgitta Nedelmann Harriet Zuckerman Piotr Sztompka Peter Gerlich Charles Crothers Elena Besozzi and Arnold Zongerle among others The chapters address the full range of Merton's work with special emphasis on such areas as anomie structural analysis the relationship of theory to research patterns of latent and manifest influence and even the application of Mertonian concepts to the analysis of Merton as a scholar This unusual compendium translated from the Italian will interest social researchers across the academic spectrum

Modern Reconstruction of Classical Thought Jeffrey Alexander, 2014-04-03 In this volume the author maintains that sociology must learn to combine the insights of both Durkheim and Marx and that it can only do so on the presuppositional ground that Weber set forth Alexander maintains that the idealist and materialist traditions must be transformed into analytic dimensions of multidimensional and synthetic theory This volume focusses on the writing of Talcott Parsons the only modern thinker who can be considered a true peer of the classical founders and examines his own profoundly ambivalent attempt to carry out this analytic transformation

The Silent Minority John Goyder, 2019-07-09 This book provides characteristics of nonrespondents on sample surveys and reports on several empirical studies undertaken to test theories of survey response and nonresponsive behaviour It presents a predictive model for survey response and evaluates attitudes about surveying

Sociological Dilemmas Piotr Sztompka, 2013-09-11 Sociological Dilemmas Toward a Dialectic Paradigm aims to build a new paradigm in sociological theory by using the method of dialectical critique patterned on the approach utilized by Karl Marx The book explores the sociological heritage with the theoretical works of Karl Marx as the primary basis of exposition and analysis Chapters are devoted to the discussion of the theoretical crisis of sociology the division of sociology between two opposing methodologies dissociation of sociology from the prescientific traditions of social thought and the conclusion reached by the author after an extensive analysis of sociological theories presented in the book The book will be of value to sociologists teachers and students of the social sciences

Society, History, and the Global Human Condition Zaheer Baber, Joseph

M. Bryant, 2010-12-18 This Festschrift for Irving M Zeitlin honors a scholar whose work has influenced and continues to influence sociology particularly classical sociological theory sociology of religion and historical sociology Irving M Zeitlin's scholarship and mentoring has also influenced and inspired a new generation of sociologists The essays presented here address a wide range of topics that include classical sociological theory globalization bureaucracy genocide resistance ethnic diversity the intifada anti-Semitism democracy geopolitical theory war literature science and national culture The contributions span a wide range of geographical areas that include Korea China India Poland Spain Germany the ex Soviet Union Canada and the United States These essays by eminent scholars located in many parts of the world affirm the incredibly broad range of expertise and learning that Irving M Zeitlin's work has engaged with The contributions to this volume also serve to highlight the contemporary relevance of the classical sociological tradition in making sense of the global human condition

Critical Criminology (Routledge Revivals) Ian Taylor, Paul Walton, Jock Young, 2013-01-11 First published in 1975 this collection of essays expands upon the themes and ideas developed in the editors previous work the visionary and groundbreaking text *The New Criminology* Directed at orthodox criminology this is a partisan work written by a group of criminologists committed to a social transformation a transformation to a society that does not criminalize deviance Included are American contributions particularly from the School of Criminology at Berkeley represented by Hermann and Julia Schwendinger and Tony Platt together with essays by Richard Quinney and William Chambliss From Britain Geoff Pearson considers deviancy theory as misfit sociology and Paul Hirst attacks deviancy theory from an Althusserian Marxist position The editors contribute a detailed introductory essay extending the position developed in *The New Criminology* and two other pieces which attempt to continue the task of translating criminology from its traditional correctionalist stance to a commitment to socialist diversity and a crime free set of social arrangements

Sociological Ambivalence and Other Essays Robert King Merton, 1976

Human Nature and Biocultural Evolution Joseph Lopreato, 2024-12-02 First published in 1984 *Human Nature and Biocultural Evolution* aims to delineate a theory of human nature viewed as an interrelated set of genetically programmed behavioral predispositions and a theory of biocultural evolution The author's approach is based on the hypothesis that innate predispositions and cultural environmental factors cooperate to determine human behavior and socio cultural forms Professor Lopreato begins by tracing the development of evolutionary biology up to sociobiology It is his argument that the social and biological disciplines have for over a century been moving towards a synthesis and that *Homo sapiens* is neither just another animal nor so unique a being that culture has become divorced from its genetic underpinnings The argument is supported with evidence from evolutionary biology and social science with a critical discussion of basic issues of behavioral science and with an analysis of certain famous theories in social science e.g theories of suicide anomie capitalism which prove to be richer and more complete when viewed from a biocultural perspective The theory of human nature is arrived at through a rich analysis of ethnographic psychological and

sociological arguments and data as well as facts and theories from comparative zoology In the process the author treats critically numerous theoretical problems associated with topics such as exploitation class consciousness structured inequality reciprocal behavior territorial aggression religious ritual socialization ethnicity and prejudice The author concludes with an examination of behavioral predispositions that are hypothesized to be at the base of cultural variation Political Science Leonardo Morlino,Dirk Berg-Schlosser,Bertrand Badie,2017-03-06 From the award winning team behind the International Encyclopaedia of Political Science Moving beyond mainstream traditional approaches to bring you a new advanced level introduction to political science A perfect introduction for postgraduates who are new to political science as well as upper level undergraduates looking to broaden and deepen their understanding of core topics this progressive account Guides you through all key areas of political science origins methodological foundations key topics and current issues Takes an international and pluralist perspective with all issues explored in a comparative way related to different cultural and historical contexts Includes pulled out descriptions of major concepts further reading and self assessment questions at the end of each chapter *The Antinomies of Classical Thought: Marx and Durkheim (Theoretical Logic in Sociology)* Jeffrey C. Alexander,2014-04-24 This volume challenges prevailing understanding of the two great founders of sociological thought In a detailed and systematic way the author demonstrates how Marx and Durkheim gradually developed the fundamental frameworks for sociological materialism and idealism While most recent interpreters of Marx have placed alienation and subjectivity at the centre of his work Professor Alexander suggests that it was the later Marx s very emphasis on alienation that allowed him to avoid conceptualizing subjectivity altogether In Durkheim s case by contrast the author argues that such objectivist theorizing informed the early work alone and he demonstrates that in his later writings Durkheim elaborated an idealist theory that used religious life as an analytical model for studying the institutions of secular society **Social Order and the General Theory of Strategy** Alexander Atkinson,2020-12-22 Is there a place left in international politics for the real use of violence as an instrument of policy in the nuclear age Originally published in 1981 Dr Atkinson attempts to answer this question with new considerations in the presentation of a general theory of strategy He argues that the classical theory of strategy so influential for the 19th century and for the better half of the 20th century was built on a mainly hidden structure of reasoning that still infests theory today The larger and socially rooted lessons that insurgent warfare can inform as best exemplified in the primary sources of the Chinese Civil War period reveal in a new light this hidden structure of which Clausewitz is the earliest and most eloquent example By this analysis of the insurgent and classical paradigm opposites the author intends to strip away the blinds of convention still circulating in theory today so that observers and students of international politics may see where new forms of politically motivated violence in the nuclear age seem more than ever to be headed Here we have perfect paradigm opposites In the conventional world battle field action and ideally decisive battle is the center of all other issues in which such conventional logic in the end sweeps up everything else and

runs it back through the logic into success or failure of armed power on the battle field Everything hangs on this In the revisionist insurgent world where social order is weaponized as an object and source of military power through its inherent and valuable armed power structures social order replaces narrow battle field action ideally focused on decisive battle and alternatively redirects the entire logic and all other considerations including previously heroic conventional military assets are remodeled to act against armed enemy power structures inherent as always in social order for the ultimate object of military victory Again everything is on this alone Which paradigm one the opposite mirror image of the other will prevail will depend on the stability and power of the nation state and its institutions the continued and unhappy collapse on which I base the General Theory

Making Global Knowledge in Local Contexts Katarzyna Kaczmarek, 2020-04-08 This book draws on extensive ethnographic research undertaken in Russia to show how the wider sociopolitical context the political system relationship between the state and academia as well as the contours of the public debate shapes knowledge about international politics and influences scholars engagement with the policy world Combining an in depth study of the International Relations discipline in Russia with a robust methodological framework the book demonstrates that context not only bears on epistemic and disciplinary practices but also conditions scholars engagement with the wider public and policymakers This original study lends robust sociological foundations to the debate about knowledge in International Relations and the social sciences more broadly In particular the book questions contemporary thinking about the relationship between knowledge and politics by situating the university within rather than abstracting it from the political setting The monograph benefits from a comprehensive engagement with Russian language literature in the Sociology of Knowledge and critical reading of International Relations scholarship published in Russia This text will be of interest to scholars and students in International Relations Russian and Post Soviet Studies the Sociology of Knowledge Science and Technology Studies and Higher Education Studies It will appeal to those researching the knowledge policy nexus and knowledge production practices
