solve the differential equations of projectile motion among them the Siacci method and the numerical methods The results obtained through the integration of differential equations of projectile flight are mostly analytical formulas that describe the projectile trajectory and make the exterior ballistics a comprehensible science The Differential Equations of Projectile Flight are also integrated numerically using some original PC programs that can be easily modified to be used in similar scenarios or other new ones and give the reader the possibility to solve a great variety of Exterior Ballistics problem Exterior Ballistics with Applications can be considered as an interdisciplinary applied mathematics and physics manuscript for the vast mathematics and physics models and techniques employed It is a great source for applications in physics calculus differential equations numerical methods and PC programming as well The book is illustrated with about 140 solved examples related to different artillery and infantry firearms that demonstrate the use of formulas and the solution methods of ballistics to find the elements of projectile trajectories Exterior Ballistics with Applications includes as well two interesting topics that can be considered as applications of exterior ballistics 1 Skydiving and parachute falling related with the trajectory of a parachutist launched from a horizontally flying airplane with un deployed parachute in different meteorological conditions and in presence of air resistance and wind 2 The ballistics of projectile fragments that is an important element of Terminal Ballistics necessary to study the effectiveness of fragmentation ammunitions on the personnel and objects and other problems related with the construction of fragmentation ammunitions or with Forensic Sciences Exterior Ballistics with Applications is comprehensive and serves as reference material to provide answers to problems encountered in the practice of motion of unguided projectiles skydiving and flying fragments of antipersonnel ammunitions
