Leading Student Assessment Charles F. Webber, Judy L. Lupart, 2011-09-18 This book presents a new and refreshing look at student assessment from the perspective of leading educational theorists researchers and practitioners The authors call for boundary breaking assessment that reflects clear understandings of the purposes of assessment a balance of assessment creativity and realism the ability to detect solutions for assessment challenges and the capacity to question and imagine assessment alternatives The 14 chapters offer school and district educators policy makers researchers and university teacher preparation faculty with a comprehensive current overview of the state and art of student assessment Key questions are posed about assessment and critical challenges are presented along with sound evidence based solutions Student assessment is analyzed in terms of its relationship with classroom instructional practices and large scale testing programs Formative and summative assessments are compared and contrasted The role of psychological assessment in

informing classroom practices is profiled along with the need for student voice in fair assessment practices Readers will be challenged to consider the ecology of student assessment that is the impact of assessment in classrooms and schools through to the macro level of globalized societies The underpinning values and assumptions of student assessment are highlighted Finally a rationale is offered for reconceptualizing and redefining assessment Handbook of Strategies and Strategic Processing Daniel L. Dinsmore, Luke K. Fryer, Meghan M. Parkinson, 2020-01-27 Handbook of Strategies and Strategic Processing provides a state of the art synthesis of conceptual measurement and analytical issues regarding learning strategies and strategic processing Contributions by educational psychology experts present the clearest yet definition of this essential and quickly evolving component of numerous theoretical frameworks that operate across academic domains This volume addresses the most current research and theory on the nature of strategies and performance mechanisms for unearthing individuals strategic behaviors and both long established and emerging techniques for data analysis and interpretation Fundamental Statistics for the Behavioral Sciences David Howell, 2016-02-19 FUNDAMENTAL STATISTICS FOR THE BEHAVIORAL SCIENCES focuses on providing the context of statistics in behavioral research while emphasizing the importance of looking at data before jumping into a test This practical approach provides students with an understanding of the logic behind the statistics so they understand why and how certain methods are used rather than simply carry out techniques by rote Students move beyond number crunching to discover the meaning of statistical results and appreciate how the statistical test to be employed relates to the research questions posed by an experiment Written in an informal style the text provides an abundance of real data and research studies that provide a real life perspective and help students learn and understand concepts In alignment with current trends in statistics in the behavioral sciences the text emphasizes effect sizes and meta analysis and integrates frequent demonstrations of computer analyses through SPSS and R Important Notice Media content referenced within the product description or the product text may not be available in the ebook version
