Editing For Engineers:

Editing for Engineers John Barnard Bennett,1970 **The Craft of Editing** Michael Alley,2013-03-08 You are a hired gun of sorts a manager scientist or engineer called upon to edit a document Perhaps you are overseeing a long report or thesis reviewing a journal article or providing comments on a proposal For the document before you what changes do you suggest How do you clearly and efficiently communicate those changes to the author How do you convince the author and the other editors that those changes are needed The answers to these questions define how you edit someone s writing In business engineering and science the process of editing causes much strife In fact my experience in teaching professional writing over the past fifteen years has been that editing is the number one complaint that professionals have about the process of documenting their work Many professionals complain that this editing seems to arise more from whim than from logic that what flies in one document is often shot down in another Others complain that editors change too much essentially inserting their own individual styles Still others complain that the sign off process is so inefficient and taxing that they sometimes do not document work they know should be documented While in many cases these complaints are unfounded in many others they are legitimate This book addresses those complaints that are legitimate by showing managers scientists and engineers how to make their editing both more effective and more efficient **Editing for Engineers** Judith Jack,1987 Style Manual for Engineering Authors and Editors American Society of Mechanical Engineers,1927
