Edutrends 2010 Restructuring Technology And The Future Of Education:

Edutrends 2010 David D. Thornburg,1992 *Rethinking Education in the Age of Technology* Allan Collins,Richard Halverson,2018 The digital revolution in education is well under way with more and more learners plugged into the online world How can schools make the most of both the technology and the learning potential of today's born digital students In this new edition of their groundbreaking book Collins and Halverson argue that new technologies have transformed our workplaces our lives and our culture and it is time we take the next step to transform learning in and out of schools The authors show how over time public schooling was so successful that it became synonymous with education But new technologies risk making schools obsolete and this book explains why and how today's educators policymakers and communities must adapt to provide all learners with access to the new learning tools of the 21st century Allan Collins and Richard Halverson are not by any means arguing that teachers or schools should go away Rather they are saying that they should open their doors and windows connect to other real and virtual places be crucial tour guides and send their children on flights of fancy through our modern memory palaces From the Foreword by James Paul Gee Arizona State University The most convincing account I've read about how education will change in the decades ahead the authors' analyses are impressive fair minded and useful Howard Gardner Harvard Graduate School of Education from first edition *The Educational Technology Profession* J. initiatives as is now routinely advocated in psychology and social science education The book features current scholarship and pedagogy involving innovative technology that impacts on student learning in psychology and related disciplines focusing also on student reactions to these novel technologies and proper assessments of how well they promote learning This text will serve as the standard reference on emerging technologies for undergraduate instructors **Teaching Middle School**
